

- Preface, v
Acknowledgements, vii

PART 1 Defining Low Vision

- 1 What Is Low Vision?, 1
- 2 Prevalence and Causes of Low Vision, 15
- 3 Clinical Measures of Visual Performance, 28
- 4 Patient Centred Outcome Measures, 60

PART 2 Magnification as a Strategy for Improving Visual Performance

- 5 Magnification, 71
- 6 Relative Size Magnification: Increasing the Object Size, 76
- 7 Relative Distance Magnification: Decreasing the Viewing Distance, 81
- 8 Transverse Magnification, 111
- 9 Angular Magnification, 119

PART 3 Other Methods for Visual Rehabilitation

- 10 Contrast and Glare, 145
- 11 Illumination and Lighting, 158
- 12 Aids for Peripheral Field Loss, 168

- 13 Special Training Techniques for Visual Field Loss, 180
- 14 Rehabilitation Techniques for Nystagmus, 189
- 15 Sensory Substitution, 196
- 16 Inclusive and Universal Design, 212

PART 4 Clinical Procedures

- 17 The Low Vision Assessment, 221
- 18 The Eye Examination, 230
- 19 Prescribing Magnification, 236
- 20 Instruction and Training in the Use of Magnifiers, 245
- 21 Evaluating Low Vision Services, 251
- 22 The Place of Low Vision in Optometric Practice, 261
- 23 Case Studies, 268

PART 5 Appendices

- Appendix 1: Useful Information, 295
Appendix 2: Sample Record Sheets, 298
Appendix 3: Patient Literature, 306
Appendix 4: Examples of Clinic Letters, 318

Index, 323
