

STUDIES IN QUANTITATIVE GENETICS

I. CETL, J. BENEDÍK and J. VAGERA

*Department of Genetics, Faculty of Science,
J. E. Purkyně University, Brno*

*Department of Biology, Pedagogical Faculty,
Palacký University, Olomouc*

I. VIABILITY AND LETHALITY STUDIES ON SECOND CHROMOSOMES EXTRACTED FROM MORAVIAN NATURAL POPULATIONS OF *DROSOPHILA MELANOGASTER*

I. CETL and J. BENEDÍK

CONTENTS

The relations between genotypes in viability tests	5
Material and methods	6
Results	7
Discussion	10
Summary	12
Viability and lethality studies in a large population	12
Material and methods	12
Results	13
1. Viability and lethality in the October and December samplings	13
2. Allelism tests of lethals	17
Discussion	17
Summary	19
Literature	20

II. MICROMUTATIONS AND MACROMUTATIONS INDUCED IN EINKORN WHEAT (*TRITICUM MONOCOCCUM* L.) BY THE EFFECT OF N-NITROSO-N-METHYLUREA, BUTYLMETHANE SULPHONATE AND X-RAYS

J. VAGERA

CONTENTS

Introduction	21
Material and methods	22
Results	25
1 Results in M_1	25
a) Germination, chlorophyll chimeras, and morphological changes	25
b) Tillering and heading	28
c) Quantitative properties	28

2 Results in M_2	32
a) Germination and chlorophyll mutations	32
b) Development advance, tillering and heading	39
c) Quantitative properties	40
3 Results in M_3	64
a) Selection of some quantitative properties	64
b) Characteristics of some induced mutants	64
Discussion	67
1 About results in M_1	67
2 About results in M_2	71
3 About results in M_3	77
Summary	78
Literature	80
