PART 1: SCOPING AND OVERVIEW

1. Introduction	3
<i>Donald N. Zillman, Catherine Redgwell, Yinka O. Omorogbe, Lila Barrera-Hernández, and Barry Barton</i>	
I. What kind of energy transition is under way?	3
II. What factors call on us to look beyond the carbon economy?	6
III. What role for law?	10
IV. Our readership and the plan of the book	10
2. The Impact of Energy on Health, Environment, and Sustainable Development: The TANSAAFL Problem	13
<i>George (Rock) Pring, Alexandra Suzann Haas, and Benton Tyler Drinkwine</i>	
I. Introduction	13
II. Climate change	15
III. Fossil fuel impacts	18
IV. Alternative energy sources	23
V. Conclusion	37
3. Promoting Sustainable Development through the Use of Renewable Energy: The Role of the Law	39
<i>Yinka O. Omorogbe</i>	
I. Introduction	39
II. Energy and development	41
III. The role of the law	45
IV. The role of regional and international institutions	47
V. National legislation and the promotion of improved energy access	49
VI. Critical needs	58
VII. Conclusion	59

4. The Law of Energy Efficiency	61
<i>Barry Barton</i>	
I. Rationale for energy efficiency measures	63
II. The successfulness of energy efficiency measures	67
III. The sceptics confounded	69
IV. Energy efficiency measures work	71
V. Multiple non-price barriers	73
VI. Behavioural economics	74
VII. Paternalism	75
VIII. Markets	77
IX. New ideas in law and regulation	79
X. The prospect	80
 PART 2: INTERNATIONAL AND REGIONAL PERSPECTIVES 	
5. International Legal Responses to the Challenges of a Lower-Carbon Future: Climate Change, Carbon Capture and Storage, and Biofuels	85
<i>Catherine Redgwell</i>	
I. Introduction	85
II. Adapt, mitigate, and trade: the climate change regime	87
III. Non-carbon alternatives: new energy sources and technologies	100
6. The Development of Renewable Energy Technologies and Energy Efficiency Measures through Public International Law	109
<i>Adrian J. Bradbrook</i>	
I. The international significance of renewable energy and energy efficiency	109
II. The role of energy in international law	112
III. What has public international law achieved so far?	113
IV. The role and activities of international institutions and non-governmental organizations	127
V. Future directions of public international law	128
7. Are We There Yet? The Long Road to South America's Energy Future	133
<i>Lila K. Barrera-Hernández</i>	
I. Introduction	133
II. All the roads lead to governance	135

III. A friend in the dispute resolution business	157
IV. Regional trade as driver of governance: a snapshot	160
V. Conclusion	161
8. Increasing Access to Clean Energy in Africa: Challenges and Initiatives	163
<i>Fui S. Tsikata, Abeeku Brew-Hammond, and Y. B. Osafo</i>	
I. Introduction	163
II. Energy profile	165
III. The clean development mechanism	168
IV. Dealing with land tenure and institutional issues	174
V. A broader agenda	177
 PART 3: SECTORAL PERSPECTIVES AND TECHNOLOGY-BASED APPROACHES 	
9. Renewable Energy in National Legislation: Challenges and Opportunities	183
<i>Richard L. Ottinger with Lily Mathews and Nadia Elizabeth Czachor</i>	
I. Introduction	183
II. Barriers to use of renewable energy	184
III. Overcoming barriers to use of renewable energy	191
IV. Characteristics of successful renewable energy policies	204
V. Conclusion	206
10. The Use of Market-Based Instruments in the Transition from a Carbon-Based Economy	207
<i>Catherine Banet</i>	
I. Introduction	207
II. Rationale for market-based instruments	208
III. Green, white, and brown certificates as new market instruments	212
IV. Green certificates	213
V. White certificates	218
VI. Brown certificates	222
VII. Conclusions	228
11. Heavy Duty Transition Fuels: Oil Sands and Heavy Oil	231
<i>Alastair R. Lucas, Chidinma B. Thompson, and Olurotimi Williams Daudu</i>	
I. Introduction: hydrocarbon energy resources	231

II. Oil sands and heavy oil: unconventional oil	233
III. The bitumen-rich	234
IV. The significance of property rights	238
V. Oil sands policy and law	240
VI. Assessing the bitumen-rich states	242
VII. Conclusions	263
 12. Biofuels: EU Law and Policy	 265
<i>Iñigo del Guayo</i>	
I. Introduction	265
II. What are biofuels?	266
III. The legal relevance of a definition of biofuels	267
IV. The biofuels industry in the European Union	269
V. The existing legal framework	271
VI. 2006 Biofuels Strategy	275
VII. The role of biofuels in the new Energy Policy for Europe 2007	276
VIII. Towards a new legal framework for biofuels in the European Union	277
IX. Amendment of the directive: binding targets?	279
X. Filling the gaps for the sake of an integrated biofuels policy	281
XI. Biofuels and technology	283
XII. Conclusion: biofuels and the energy system	284
 13. Reducing Carbon-Based Electricity Generation: Is the Answer Blowing in the Wind?	 287
<i>Aileen McHarg and Anita Rønne</i>	
I. Introduction	287
II. Obstacles to the expansion of wind energy	290
III. The European Community law framework	292
IV. Wind energy in Denmark	295
V. Wind energy in the United Kingdom	305
VI. Conclusion	315
 14. The Role of Law in the Future of Nuclear Power	 319
<i>Donald N. Zillman</i>	
I. The status of nuclear power in the world	320
II. The risks of nuclear power	321
III. The revival of nuclear power	323

IV. The role of law in nuclear power's future	326
V. Conclusion	336
15. Legal Aspects of Carbon Capture and Storage	339
<i>Nigel Bankes and Martha Roggenkamp</i>	
I. Introduction	339
II. A policy overview of the development of CCS	340
III. The four stages of CCS	345
IV. The risks associated with CCS	348
V. The legal issues associated with CCS	350
VI. Conclusions	375
 PART 4: NATIONAL PERSPECTIVES	
16. China's Plight in Moving towards a Low-Carbon Future: Analysis from the Perspective of Energy Law	379
<i>Wang Mingyuan</i>	
I. Introduction	379
II. Background	380
III. Enhancement of energy efficiency and promotion of energy conservation	381
IV. Development of renewable energy	389
V. Promoting the development of new technology of nuclear energy and hydrogen energy	396
VI. Conclusion	398
17. Energy for the Future: Brazilian Law and Policy	399
<i>Yanko Marcius de Alencar Xavier</i>	
I. Introduction	399
II. Oil and gas regulation in Brazil	400
III. The 1988 federal constitution and the introduction of biomass into the Brazilian energy matrix	402
IV. Programs developed in Brazil for the use of biomass as energy source	404
V. Conclusion	417
18. The Indian Way: Exploring the Synergies between Development, Energy and Climate Goals	419
<i>Lavanya Rajamani</i>	
I. Introduction	419

II. India's international stance	421
III. India's domestic stance: a focus on co-benefits	426
IV. Synergies between development, energy, and climate goals	438
19. The Future of an Economy Based on Oil Exploitation: The Mexican Case	441
<i>José Juan González</i>	
I. Introduction	441
II. The importance of the oil industry for the Mexican economy	441
III. Changing the future through promoting alternative sources of energy to reduce dependence on the oil industry	445
IV. The role of legislation in promoting or preventing the use of alternative sources of energy	450
V. Conclusion	457
20. Law in the Schism: Its Role in Moving beyond the Carbon Economy in Australia	459
<i>Lee Godden</i>	
I. Introduction	459
II. Background	460
III. What has been happening?	466
IV. Environmental impact assessment	470
V. Emergent technologies	478
VI. Business and community partnerships	479
VII. Conclusion	480
21. In Search of the Optimum Energy Mix: Japanese Laws Promoting Non-Fossil-Fuel Energy	481
<i>Kazuhiro Nakatani</i>	
I. Introduction	481
II. Overview of Japanese policies and laws promoting alternative energy	482
III. Japan's basic law on energy policy	483
IV. Japanese laws for promoting new energy	486
V. Legal structure concerning nuclear energy in Japan	488
VI. Japan and ITER	494
VII. Concluding remarks	495

22. Energy Resources Management in Russia: Policy and Law	497
<i>Irina Krasnova</i>	
I. Introduction	497
II. The fuel and energy sector	498
III. Russian energy policy in the international context	500
IV. Priorities in the national energy policy	501
V. Hydrocarbons legislation	504
VI. Legislation on alternative energy resources	508
VII. Enhancement of energy efficiency	511
VIII. Legal protection of air from greenhouse gas pollution	512
IX. Conclusion	515
 23. Diversified Leadership for Moving beyond the Carbon Economy in the United States	 517
<i>John W. Gulliver and Keith A. Wheeler</i>	
I. The adjustment of the competitive economy in the United States	517
II. The role of the private sector	519
III. The role of the states	527
IV. Courts and the role of litigation	530
V. The future	536
 PART 5: PULLING THE THREADS TOGETHER: AN OVERVIEW OF THE CHALLENGES FOR LAW OF MOVING BEYOND A CARBON ECONOMY	
24. Overview and Conclusions	543
<i>Donald N. Zillman, Catherine Redgwell, Yinka O. Omorogbe, and Lila Barrera-Hernández</i>	
I. Moving beyond the carbon economy: is there a carbon crisis?	543
II. Meeting the crisis: no 'one size fits all' solution	546
III. The role of law in moving beyond the carbon economy	549
 <i>Index</i>	 553
