

Konta, J.: The word of the Editor	9
Melka, K.: The opening address to the Fifth Meeting of the European Clay Groups . .	10
Plenary lectures:	
Konta, J.: Man and clay	11
Mackenzie, R. C.: Soil clays: Subjects for chemistry, mineralogy or physics?	25
Session 1, Crystal structure and crystallochemistry of clay minerals:	
Drits, V. A.: Some aspects of the study of the real crystal structure of clay minerals . .	33
Daynyak, L. G.: Structural features of layer silicates and EFG calculations for an interpretation of their Mössbauer spectra	43
Bookin, A. S., Smoliar B. B.: Simulation of bond lengths in coordination polyhedra of 2 : 1 layer silicates	51
Nikolaeva I. V., Anokhina, L. K., Kameneva, M. Yu., Kovalyova, L. T., Gabitova, R. U., Chalabov R. I.: Crystallochemical and typomorphic features of glauconite group minerals	57
Ben Brahim, J., Besson, G., Tchoubar, C.: Layer succession and water molecules arrangement in a homogeneous two-water layer Na-smectite	65
Horváth, I.: The structural and crystallochemical aspects in dehydroxylation of clays . .	77
Wiewióra, A., Weiss, Z., Krajiček, J.: Calculated and experimental X-ray diffraction patterns by transmission powder method	87
Árkai, P., Tóth, M. N.: The variance method investigation of illite crystallinity	91
Session 2, Mineralogy and geochemistry of the argillosphere:	
Stoch, L.: Evolution of clay minerals and circulation of elements in argillosphere . . .	99
Bidló, G.: Mineralogical investigation of Middle Pliocene and Pliocene-Pleistocene transitional clays	111
Güzel, N., Wilson, M. J.: High-magnesium clays from alluvial soils of the Acipayam plain, Southern Turkey	117
Králík, J., Němec, J., Uher, A.: Organic and clay diagenesis in sediments of the Ostrava—Karviná Coal Basin	125
Viczián, I.: Diagenetic transformation of mixed-layer illite/smectites in deep zones of the Pannonian Basin (Hungary)	135
Fiala, V., Cimprl, M.: Adsorption of uranium (VI) by clays	141
Bouška, Vl., Pešek, J.: Boron in the aleuropelites of the Bohemian Massif	147
Vitovskaya, I. V.: Nontronite — its structure and genesis	157
Stefanov, D.: Regularly interstratified chlorite/swelling chlorite from East Rhodopes, Bulgaria	163
Melka, K., Pošmourný, K.: Stilpnomelane from the Proterozoic of the Krkonoše Mts. .	169
Martín Patino, T., Saavedra, J., Millán, A.: A mineralogical study of aluminium hydroxides and oxihydroxides in profiles of granitic alterations in Spain's mid-west . . .	181
Session 3, Clay substance and recent environments:	
Veniale, F., Caucia, F., Cocito, S., Setti, M., Soggetti, F.: Clay substance and recent environments	187
Šimek, J., Previtali, F.: Relationships between clayey soils, parent rock and environmental conditions in the Appennines of Lombardy (N. Italy)	197
Kazansky, Yu. P.: On the role of clay minerals in continental sedimentation	205
Kurnosov, V., Kholodkevich, I.: Conditions of the formation of clay minerals in the basaltic shell of the ocean	209
Čichovský, L.: Changes due to weathering of calcareous marlstones of some historic buildings in Prague	215
Borovec, Z., Šrámek, J., Tolar, V.: Weathering of arkosic sandstones on historical buildings and statues, central Bohemia	225
Vuorinen, A., Carlson, L.: Interaction of silica and iron in formation of natural iron oxyhydroxide precipitates	235

Session 4, Interaction of clay and organic substance:

Degens, E. T.: Clay-organic interactions at 3 to 300 degrees Kelvin	241
Klubova, T. T.: Pattern of interactions of clay minerals and organic matter	253
Thomas, F., Andreux, F., Bottero, J. Y.: Etude thermodynamique de l'adsorption de l'ion dodecylammonium sur le kaolin et application aux mecanismes d'adsorption des amino-acides et des peptides	259
Herrmann, H., Lagaly, G.: ATP — clay interactions	269
Polakovič, J., Polakovičová, J., Sokoly, J.: Interaction between kaolinite surface and hematoxyline	279
Berlinger, H.: Thermoanalytische Untersuchungen der Montmorillonit-Aminosäuren- Komplexe	283

Session 5, Deposits of clay raw materials:

Störr, M.: Age correlation of the kaolins of Europe (Abstract)	291
Zlatanovic, V., Zafirovski, S., Pavlovski, B., Jašmakovski, B.: Beitrag zur Erforschung kaolinisierter Gesteine in der SR Makedonien	293
Mattias, P.: The refractory clays of Nurallao-Nuoro, Sardinia (Italy)	301
Kužvart, M., Neužil, J., Reichelt, M., Hlavsa, J., Janda, Z.: The deposit of refractory claystones at Kačice near Libušín (central Bohemia)	309
Šamajová, E., Kraus, I.: Distribution of smectites and zeolites in the West Carpathians	321
Kužvart, M., Neužil, J., Reichelt, M.: Petrographical-mineralogical character of the kaolin from the Vidnava deposit (north Moravia, Czechoslovakia)	329
Korecký, J., Melka, K., Šantrůček, P.: X-ray quantitative phase analysis of the kaolinite bond clay from the Cheb Basin in west Bohemia	341
Nikitina, A. P.: Distribution and genesis of clay minerals and free alumina minerals in the deposits of residual bauxites in the European part of the USSR	351
Slukin, A. D.: Role of kaolinite in the formation of bauxite	359
Mattias, P.: Bentonites in Italy — their occurrence and genesis	365
Todorova, T.: Genetic types of smectite deposits in Bulgaria	371
Atanasov, G., Goranov, A., Stefanov, D.: Paleogene montmorillonite clays from South Bulgaria	377

Session 6, Investigation methods of clay substance:

Thorez, J.: Qualitative clay mineral analyses biased by sample treatments	383
Krajčiček, J., Weiss, Z., Wiewióra, A.: Kaolins: Computer-aided X-ray quantitative phase analysis	391
Schomburg, J.: Contributions of dilatometric investigations of the diagnosis of layer silicates	397
Kromer, H., Schüller, K. H., Sevilgen, E.: Thermal analysis in the study of the sintering behaviour of clays	403
Kotov, N. V., Nikitina, A. P., Ivanov, V. P.: Experimental investigation of the trans- formation of some rocks formed in the weathering crust under elevated P_{H_2O} — T parameters	409

Session 7, Clay substance in soils:

Pedro, G., Tessier, D.: Importance de la prise en compte des parametres texturaux dans la caracterisation des argiles	417
De Coninck, F., Van Ranst, E.: Stability of gibbsite and mineralogy in soils on granitic rocks from Corsica	429
Stoch, L., Wilgat, M.: Swelling minerals of selected soils in Poland	437
Szerszeń, L., Chodak, T.: Clay minerals in soils of the arctic climatic zone exemplified by south-west Spitsbergen	445
Singer, A.: The clay mineralogy of basalt-derived paleosols	453
Henmi, T.: Importance of chemical composition (SiO_2/Al_2O_3 ratio) as factor affecting physico-chemical properties of allophanes from weathered volcanic ash and pumice	459
de Vidales, J. L. M., Sanz, J., Guijarro, J., Hoyos, M. A., Casas J.: Smectite origins in the volcanic soils of the Calatrava region (Central Spain)	465
Szendrei, G.: The stability and distribution of clay minerals in Hungarian salt affected soils	471
Borggaard, O. K.: Evidence in favour of considering soil iron oxides as composed of only two fractions	477

Session 8, Applied argillology:

Rosenqvist, I. T.: Mineralogical physical and chemical factors determining mechanical properties of remolded clays and clay sediments	485
Seidov, A. G., Kheirov, M. B., Daidbekova, E. A., Pashaly, N. V.: The role of clay minerals in oil and gas prospecting and development (on the example of the eastern Transcaucasus)	491
Ovcharenko, F. D.: The nature of the surface of clay minerals: its role in colloid and chemical phenomena	499
Bellinfante, N., García-Valdecasas, M., Tirado, J. L., Paneque G.: Ceramic applications of argillaceous materials from Cordoba (Spain)	505
Kreimeyer, R.: Die Ahängigkeit der Brennfarbe von Ziegeln von der Zusammensetzung der Ausgangssubstanz (The dependence of the firing color of bricks on the composition of the raw materials)	515
Dehne, G.: Die Abhängigkeit der Fluoremission beim Brand keramischer Produkte von den Brennbedingungen und der Zusammensetzung der Ausgangssubstanz . .	521
Urban, H., Babczinski, L., Wedemeyer, U.: Illite chemistry and ceramic properties of brick products	529
Huff, W. D.: Trace element variation in Ordovician K-bentonites and its use in stratigraphic correlation	535

Posters

Chodak, T., Jahn, A.: Studies on clay minerals in a Tertiary regolith from the Sudetes Mts.	541
Manceau, A., Calas, G.: Short and medium range order in nickeliferous clay minerals by X-ray absorption spectroscopy	547
Nørnberg, P., Dalsgaard, K.: The origin of clay minerals in soils on Danian chalk . . .	553
Patzkó, Á., Szántó, F.: The adsorption of cation active surfactants on clay minerals and the examination of organocomplexes	563
Tsipursky, S. I., Kameneva, M. Yu., Drits, V. A.: Structural transformations of Fe^{3+} -containing 2 : 1 dioctahedral phyllosilicates in the course of dehydration . . .	567
Weiss, Z., Ďurovič, S.: A unified classification and X-ray identification of polytypes of 2 : 1 phyllosilicates	579
Dalsgaard, K., Nørnberg, P.: Formation of structurized 'amorphous' ironoxide cutans in a soil below a Roman Iron Age barrow	585
Hofmann, H., Mosler, H.: Wechselwirkung von Tonen und Kaolin mit Säuren	591
Perez Rodriguez, J. L., Ruiz Carvajal, J., De la Rosa D., Maqueda, C.: Cation exchange capacity vs. mineralogical and engineering properties in Seville soils	603
Přikryl, J., Dvořák, J.: Modification of physico-chemical properties of clay/water suspensions by styrene maleic anhydride copolymer	609
Vladykin, N. V.: Zn-montmorillonite in alkali granite pegmatites (Abstract)	615
Van der Gaast, S. J., Kühnel, R. A.: Effects of different cations and relative humidity on hydration-dehydration mechanism of Wyoming montmorillonite (Abstract)	618
