Part I	Introduction	
CHAPTER I	Introduction	
1	Background	5
2	Aim, method, design and scope of the research	7
Part II	Status of Article 6 EC	
CHAPTER II	The Content of Article 6 EC	
1	Introduction	15
2	Genesis of Article 6 EC and enumeration of similar Treaty provisions	16
2.1	Intro	16
2.2	Development of the integration idea, insertion and further evolution in the EC Treaty	17
2.3	Recent policy initiatives relating to the integration principle	25
2.4	Similar clauses in the EC Treaty	27
3	Scope <i>ratione personae</i>	30
3.1	Introduction	30
3.2	The wording of Article 6 EC	30
3.3	Relevant case law	31
3.4	Three additional comments	33
3.4.1	Introduction	33
3.4.2	Integration through implementation	34
3.4.3	Environmental Action Programmes and Declarations	34
3.4.4	The effect of the principle of Community loyalty or solidarity	35
3.4.5	Similar obligations in other legal instruments	37
3.5	Summary	37
4	Scope <i>ratione materiae</i>	38
4.1	Introduction	38
4.2	Discussion before the Treaty of Amsterdam	38
4.3	Wording currently in force: the Amsterdam version	41
4.4	Limited to EC policies and activities?	43
4.5	Summary	44
5	Scope <i>ratione temporis</i>	45
5.1	Introduction	45
5.2	'Definition' of Community policies and activities	45
5.2.1	(Integration at the) Policy-design stage	45
5.2.2	Adoption by the Council/Council & Parliament	47
5.3	'Implementation' of Community policies and activities	48

5.3.1	Implementation of Community legislative norms	48
5.3.1.1	Implementation by the Member States	48
5.3.1.2	Implementation by the Council and Commission	49
5.3.1.3	Implementation includes enforcement	50
5.3.2	Implementation through 'other reviewable acts'	50
5.3.3	Involvement of (other) committees	51
5.4	Summary	52
6	Ratio legis	53
6.1	Introduction	53
6.2	Evolution of the concept of 'sustainability' in EC/EU Treaties	54
6.2.1	Paris, Rhodes, Dublin and Rome Summit	54
6.2.2	After the Treaty of Maastricht	55
6.2.3	The Treaty of Amsterdam	56
6.3	The sustainable development concept in international law	57
6.3.1	The Brundtland definition and its aftermath	57
6.3.2	Four recurring elements in international agreements	59
6.3.3	Strong and weak versions of sustainable development	59
6.3.4	A commonly accepted (legal) definition and the vagueness of the wording	60
6.4	The meaning of the concept in EU/EC law	62
6.4.1	Definitions of sustainable development in EC law and policy	62
6.4.1.1	Definitions in the context of the EC cooperation policy	62
6.4.1.2	Definition in environmental action programmes	64
6.4.1.3	Definition in specific policy documents	66
6.4.2	Core meaning and importance of the concept in and for EC law and policy	67
6.4.2.1	Core meaning of the concept in EC law and policy	67
6.4.2.2	Political importance of the concept for EC law and policy	69
6.4.2.3	Legal importance or relevance of the concept in EC legal order	71
6.5	Summary	72
7	What are environmental protection requirements?	72
7.1	Introduction	72
7.2	Views in literature and own views	73
7.2.1	Various possible interpretations	73
7.2.2	All of the objectives in Article 174, 1 EC	74
7.2.3	The environmental 'principles' and 'criteria'	76
7.2.4	Environmental policy?	78
7.3	Summary	79
8	What is integration?	80
8.1	Introduction	80
8.2	Views in literature	81

8.2.1	'Take into account' versus 'observe'	81
8.2.2	Priority issue or interpretation	84
8.3	Priority interpretation of the integration concept	86
8.4	Two other interpretations of the integration concept	89
8.4.1	Introduction	89
8.4.2	Weak interpretation: 'must be taken into account'	90
8.4.3	Strong interpretation: 'must be observed'	93
8.4.4	Application of the two different interpretations to an example	98
9	Conclusions	100
9.1	Arguments in favour and against the two possible interpretations: most plausible interpretation	100
9.1.1	Introduction	100
9.1.2	In light of the wording and a comparison with similar clauses	100
9.1.3	In light of the aim of the principle	103
9.1.4	In light of relevant case law of the ECJ	104
9.1.5	Comments: the most plausible interpretation and the underlying idea	105
9.2	Summary	108
CHAPTER III	The Legal Consequences of Articles 6 and 174 EC	
I	Introduction	113
2	Views in literature	114
2.1	Interpreting the SEA version of the provisions	114
2.1.1	Article 130r, 1 EC: the environmental objectives	114
2.1.2	Article 130r, 2 first sentence EC: the environmental principles	115
2.1.2.1	Principles of preventive action, rectification at source and polluter pays	115
2.1.2.2	High level of protection and subsidiarity: also environmental principles?	117
2.1.2.3	Article 130r, 2 second sentence EC: the 'Querschnittsklausel'	118
2.1.3	Article 130r, 3 EC: the environmental criteria	119
2.2	More recent literature	119
2.2.1	Article 6 EC: the integration principle or clause	119
2.2.2	Article 174, 1 EC: the environmental objectives	120
2.2.3	Article 174, 2 EC: the environmental principles	121
2.2.3.1	Two new principles: a high level of protection and the precautionary principle	121
2.2.3.2	Views on all the environmental principles of Article 174, 2 EC	122
2.2.3.3	Subsidiarity principle	123

2.2.4	Article 174, 3 EC: the environmental criteria	124
2.3	Summary	124
2.3.1	Different views, various criteria and confusing terminology	124
2.3.2	Article 6 EC: different norm, different implications?	125
2.3.3	Search for answers in jurisprudence	126
3	Rules and principles in legal theory	126
3.1	Introduction	126
3.2	Hart and Positivism	127
3.3	Dworkin's Distinction	127
3.3.1	A 'general' attack on positivism	127
3.3.2	Rules versus principles	128
3.3.3	Legal principles versus non-legal principles	130
3.4	Answer of Hart to Dworkin's Criticism	131
3.5	Re(de)fining Hart and Dworkin and principles in the EC legal order	132
3.6	Application of legal theory to the provisions in Articles 6 and 174 EC	136
3.6.1	Intro: can principles be part of a legal order?	136
3.6.2	Are the provisions in question rules or principles?	137
3.6.2.1	Article 174 EC	137
3.6.2.2	Article 6 EC	139
3.6.3	Are the provisions in question legal or non-legal principles?	141
3.7	Summary and next step	143
4	Legal consequences as appears from case law of the ECJ	143
4.1	Introduction	143
4.2	Overview of relevant case law	144
4.2.1	The case law in relation to all the provisions	144
4.2.1.1	<i>Peralta</i> case	144
4.2.1.2	<i>Safety Hi-Tech and Bettati</i> cases	144
4.2.2	Case concerning the high level of protection principle	147
4.2.3	Cases concerning the prevention and the precautionary principles	148
4.2.3.1	<i>Mondiet</i> case	148
4.2.3.2	Cases concerning wild birds, British beef and brown bees: the difference between precaution and prevention	150
4.2.3.3	GMO case	153
4.2.3.4	Waste law cases	154
4.2.3.5	Summary	156
4.2.4	Case concerning the rectification at source principle	156
4.2.5	Case concerning the polluter pays principle	158
4.2.6	Case concerning the integration principle	158
4.2.7	Summary and next step	164

4.3	Analysis: direct and indirect legal consequences of Articles 6 and 174 EC	164
4.3.1	Introduction	164
4.3.2	The direct legal consequences	165
4.3.2.1	Criterion of validity of Community legislation	165
4.3.2.2	The role of the integration principle in the legal basis discussion	169
4.3.2.3	Limits to bringing an action on the basis of the environmental provisions	175
4.3.3	The indirect legal consequences	178
4.3.3.1	Introduction	178
4.3.3.2	Interpretation of EC environmental law in light of Article 174 EC	179
4.3.3.3	Interpretation of EC non-environmental law in light of Article 174 EC	180
4.3.3.4	Lacunae-filling interpretation	180
4.4	Summary	181
5	Conclusions	181

Part III Integration in Practice

CHAPTER IV Methodology of Examining Integration in Practice

I	Introduction	189
2	Research aim and method	189
3	Scope of the research	191
4	Terminology	194
5	Design of the 'sectoral' chapters	194

CHAPTER V The Common Agricultural Policy and the Environment

I	Introduction	199
2	Characteristics of the agricultural sector	200
2.1	Economic importance and specific features of the sector	200
2.2	Effects on the environment	200
2.2.1	Introduction	200
2.2.2	Negative effects of the agricultural sector	201
2.2.3	Positive effects of the agricultural sector	201
2.2.4	The net balance and interdependence	203
2.2.5	Summary and next step	204
3	The Common Agricultural Policy (CAP)	204
3.1	Development of the EC Treaty Title on the CAP	204
3.1.1	The need for a common agricultural policy	204
3.1.2	The Treaty provisions on the CAP: primary agricultural law	206

3.1.3	The first years of the CAP	210
3.1.4	Financing of the CAP	211
3.1.5	Competition and State aid rules	213
3.1.6	Producer and interbranch organisations	214
3.2	Main features of the market and price policy	217
3.2.1	The market and price policy as originally developed	217
3.2.2	The market and price policy in the 70s and early 80s	218
3.2.3	Reform of the market and price policy prior to 1992	220
3.2.4	The 1992 reform of the market and price policy	222
3.2.5	The Agenda 2000 reform of the market and price policy	226
3.3	The main features of structural measures	234
3.3.1	Introduction	234
3.3.2	Improving the efficiency of agricultural structures	234
3.3.3	Disadvantaged and problem regions or (agriculturally) LFAs	239
3.3.4	Processing and marketing conditions for agricultural products	241
3.3.5	Forestry measures	243
3.3.6	Environmentally Sensitive Areas (ESA) and agri-environment measures	245
3.3.7	Organic production	248
3.4	Approximation of laws: plant protection products legislation	249
3.5	Agricultural research	252
3.6	Main features of secondary 'agriculture-specific' environmental legislation	253
4	Integration of environmental protection requirements into the CAP	254
4.1	Introduction	254
4.2	Are the most environmentally damaging practices encouraged?	255
4.2.1	By way of direct regulation?	255
4.2.2	By way of economic/market-based instruments?	255
4.2.2.1	Price support, direct aid and quotas	255
4.2.2.2	Structural aid	259
4.2.3	By way of promoting R&D?	260
4.3	Are environmentally friendly and/or the least environmentally damaging practices encouraged?	261
4.3.1	By way of direct regulation?	261
4.3.1.1	By way of (traditional) c&c legislation	261
4.3.1.2	By way of cross-compliance?	263
4.3.1.3	Declaration of generally binding	269
4.3.2	By way of economic/market-based instruments?	269
4.3.2.1	Instrument of financial aid	269

4.3.2.2	By way of other economic/market-based instruments?	280
4.3.3	By way of promoting R&D, information exchange and/or training?	282
4.3.3.1	Supporting R&D	282
4.3.3.2	Information and training programmes	283
4.4	Comments	284
4.4.1	Introduction: the CAP objectives and the environment	284
4.4.2	Integration failures	285
4.4.3	Integration efforts (incl. nature of instruments used)	286
4.4.4	Net balance and future action	288
5	Conclusion	289
 CHAPTER VI	 The Common Transport Policy and the Environment	
I	Introduction	293
2	Characteristics of the transport sector	293
2.1	Economic importance and specific features of the sector	293
2.2	Effects on the environment	294
3	The Common Transport Policy (CTP)	296
3.1	Development of the EC Treaty title on the CTP	296
3.1.1	The need for a Common Transport Policy	296
3.1.2	The Treaty provisions on the CTP: primary transport law	297
3.1.3	Relationship with the general rules of the EC Treaty	300
3.1.4	The initial development of a transport policy for the EC	302
3.2	Main features of secondary transport law	304
3.2.1	Introduction	304
3.2.2	Market operation	304
3.2.2.1	Market access	304
3.2.2.2	Access to the occupation and recognition of diploma's	318
3.2.2.3	Transport prices and terms	320
3.2.3	Fiscal harmonisation	323
3.2.4	Social harmonisation	324
3.2.5	Harmonisation of technical and safety specifications	327
3.2.5.1	Introduction	327
3.2.5.2	Road transport	328
3.2.5.3	Railways	332
3.2.5.4	Inland waterways	333
3.2.5.5	Air transport	334
3.2.5.6	Maritime transport	337
3.2.6	Transport infrastructure	340
3.2.6.1	Introduction	340
3.2.6.2	Coordination of infrastructure investment	341
3.2.6.3	Transport infrastructure charging	343

3.2.6.4	Traffic management	347
3.2.6.5	Spatial planning	350
3.2.7	Transport research	350
3.3	Main features of secondary 'transport-specific' environmental legislation	352
4	Integration of environmental protection requirements into the CTP	353
4.1	Introduction	353
4.2	Are the most environmentally damaging practices encouraged?	354
4.2.1	By way of direct regulation	354
4.2.2	By way of economic/market-based instruments?	357
4.2.2.1	Instrument of financial aid	357
4.2.2.2	Other economic instruments	359
4.2.3	By way of promoting R&D	360
4.3	Are environmentally friendly and/or the least environmentally damaging practices encouraged?	361
4.3.1	By way of direct regulation?	361
4.3.1.1	By way of (traditional) c&c legislation	361
4.3.1.2	By way of cross-compliance	364
4.3.2	By way of economic/market-based instruments?	365
4.3.2.1	Financial support to the deployment of ITS	365
4.3.2.2	Fiscal instruments	366
4.3.3	By way of promoting R&D, information exchange and/or training	368
4.3.3.1	R&D and demonstration projects	368
4.3.3.2	Information exchange and training	369
4.4	Comments	370
4.4.1	Introduction: the CTP objectives and the environment	370
4.4.2	Integration failures	371
4.4.3	Integration efforts (incl. nature of instruments used)	373
4.4.4	Net balance and future action	376
5	Conclusion	378
CHAPTER VII	The EC Energy Policy and the Environment	
I	Introduction	381
2	Characteristics of the energy sector	382
2.1	Economic importance	382
2.2	Effects on the environment	382
3	The European Community energy policy	386
3.1	Development of the EC energy policy	386
3.1.1	The need for an EC energy policy	386

3.1.2	The Treaty provisions on the EC energy policy: primary energy law	387
3.2	Main features of secondary energy law	390
3.2.1	Introduction	390
3.2.2	Economic policy measures: oil crisis measures	390
3.2.3	Market operation	392
3.2.3.1	Market access	392
3.2.3.2	Price transparency regulation	397
3.2.4	Fiscal harmonisation	398
3.2.5	Technical harmonisation	403
3.2.5.1	Introduction	403
3.2.5.2	Harmonisation of fuel quality standards	404
3.2.5.3	Harmonisation of energy efficiency standards (incl. labelling)	405
3.2.6	Energy infrastructure	409
3.2.7	Energy R&D and demonstration programmes	410
3.3	Main features of secondary 'energy-specific' environmental legislation	416
4	Integration of environmental protection requirements into the EC energy policy	421
4.1	Introduction	421
4.2	Are the most environmentally damaging practices encouraged?	422
4.2.1	By way of direct regulation?	422
4.2.2	By way of economic/market-based instruments?	424
4.2.3	By way of promoting R&D, information exchange and/or training	429
4.3	Are environmentally friendly and/or the least environmentally damaging practices encouraged?	430
4.3.1	By way of direct regulation?	430
4.3.1.1	By way of (traditional) c&c legislation	430
4.3.1.2	By way of cross-compliance	432
4.3.2	By way of economic/market-based instruments?	434
4.3.3	By way of promoting R&D, information exchange and/or training	439
4.4	Comments	440
4.4.1	Intro: the energy objectives and the environment	440
4.4.2	Integration failures	442
4.4.3	Integration efforts (including nature of instruments used)	444
4.4.4	Net balance and future action	446
5	Conclusion	449

Part IV

Conclusions

CHAPTER VIII

Comparative Analysis and Evaluation of the Integration

I	Introduction	455
2	Various types of integration: strength of the integration	456
2.1	Various integration types	456
2.1.1	Intro	456
2.1.2	No conflict situation	456
2.1.3	Conflict situation	458
2.2	Evaluation and comparison of the strength of the integration (in conflict situations)	461
3	The nature of the instruments used to integrate: form of the integration	463
4	Link with theory: is the integration sufficient?	467

CHAPTER IX

Summary and Concluding Remarks
