

Contents

SECTION ONE. Fuel Metabolism / 1

- 1** Metabolic Fuels and Dietary Components / 3
- 2** The Fed or Absorptive State / 21
- 3** Fasting / 30

SECTION TWO. Chemical and Biologic Foundations of Biochemistry / 39

- 4** Water, Acids, Bases, and Buffers / 41
- 5** Structures of the Major Compounds of the Body / 54
- 6** Amino Acids in Proteins / 70
- 7** Structure–Function Relationships in Proteins / 88
- 8** Enzymes as Catalysts / 112
- 9** Regulation of Enzymes / 135
- 10** Relationship between Cell Biology and Biochemistry / 152
- 11** Cell Signaling by Chemical Messengers / 171

SECTION THREE. Gene Expression and the Synthesis of Proteins / 191

- 12** Structure of the Nucleic Acids / 193
- 13** Synthesis of DNA / 209
- 14** Transcription: Synthesis of RNA / 227
- 15** Translation: Synthesis of Proteins / 248
- 16** Regulation of Gene Expression / 265
- 17** Use of Recombinant DNA Techniques in Medicine / 288
- 18** The Molecular Biology of Cancer / 310

SECTION FOUR. Fuel Oxidation and the Generation of Adenosine Triphosphate / 333

- 19** Cellular Bioenergetics: ATP and O₂ / 336
- 20** Tricarboxylic Acid Cycle / 355
- 21** Oxidative Phosphorylation and Mitochondrial Function / 377
- 22** Generation of Adenosine Triphosphate from Glucose: Glycolysis / 396
- 23** Oxidation of Fatty Acids and Ketone Bodies / 414
- 24** Oxygen Toxicity and Free Radical Injury / 437
- 25** Metabolism of Ethanol / 457

SECTION FIVE. Carbohydrate Metabolism / 473

- 26** Basic Concepts in the Regulation of Fuel Metabolism by Insulin, Glucagon, and Other Hormones / 477
- 27** Digestion, Absorption, and Transport of Carbohydrates / 493
- 28** Formation and Degradation of Glycogen / 512
- 29** Pathways of Sugar Metabolism: Pentose Phosphate Pathway, Fructose, and Galactose Metabolism / 529
- 30** Synthesis of Glycosides, Lactose, Glycoproteins, and Glycolipids / 544
- 31** Gluconeogenesis and Maintenance of Blood Glucose Levels / 559

SECTION SIX. Lipid Metabolism / 583

- 32** Digestion and Transport of Dietary Lipids / 585
- 33** Synthesis of Fatty Acids, Triacylglycerols, and the Major Membrane Lipids / 597
- 34** Cholesterol Absorption, Synthesis, Metabolism, and Fate / 626
- 35** Metabolism of the Eicosanoids / 663
- 36** Integration of Carbohydrate and Lipid Metabolism / 678

SECTION SEVEN. Nitrogen Metabolism / 693

- 37** Protein Digestion and Amino Acid Absorption / 696
- 38** Fate of Amino Acid Nitrogen: Urea Cycle / 707
- 39** Synthesis and Degradation of Amino Acids / 723
- 40** Tetrahydrofolate, Vitamin B₁₂, and S-Adenosylmethionine / 744
- 41** Purine and Pyrimidine Metabolism / 759
- 42** Intertissue Relationships in the Metabolism of Amino Acids / 774

SECTION EIGHT. Tissue Metabolism / 795

- 43** Actions of Hormones That Regulate Fuel Metabolism / 797
- 44** The Biochemistry of Erythrocytes and Other Blood Cells / 823
- 45** Blood Plasma Proteins, Coagulation, and Fibrinolysis / 847
- 46** Liver Metabolism / 863
- 47** Metabolism of Muscle at Rest and during Exercise / 884
- 48** Metabolism of the Nervous System / 903
- 49** The Extracellular Matrix and Connective Tissue / 927

Appendix: Answers to Review Questions / 944**Index / 969**
