Preface to the Third Edition	ix
Preface to the Second Edition	xi
Preface to the First Edition	xiii
1 Overview	1
1.0 Chaos, Fractals, and Dynamics	1
1.1 Capsule History of Dynamics	2
1.2 The Importance of Being Nonlinear	6
1.3 A Dynamical View of the World	9
Part I One-Dimensional Flows	13
2 Flows on the Line	15
2.0 Introduction	15
2.1 A Geometric Way of Thinking	16
2.2 Fixed Points and Stability	18
2.3 Population Growth	22
2.4 Linear Stability Analysis	25
2.5 Existence and Uniqueness	27
2.6 Impossibility of Oscillations	30
2.7 Potentials	31
2.8 Solving Equations on the Computer	34
3 Bifurcations	51
3.0 Introduction	51
3.1 Saddle-Node Bifurcation	52
3.2 Transcritical Bifurcation	57
3.3 Laser Threshold	60
3.4 Pitchfork Bifurcation	62
3.5 Overdamped Bead on a Rotating Hoop	68
3.6 Imperfect Bifurcations and Catastrophes	77
3.7 Insect Outbreak	81

4	Flows on the Circle	107
4.0	Introduction	107
4.1	Examples and Definitions	108
4.2	Uniform Oscillator	109
4.3	Nonuniform Oscillator	110
4.4	Overdamped Pendulum	115
4.5	Fireflies	117
4.6	Superconducting Josephson Junctions	121

Part II Two-Dimensional Flows 135

5	Linear Systems	137
5.0	Introduction	137
5.1	Definitions and Examples	137
5.2	Classification of Linear Systems	144
5.3	Love Affairs	152
6	Phase Plane	161
6.0	Introduction	161
6.1	Phase Portraits	161
6.2	Existence, Uniqueness, and Topological Consequences	164
6.3	Fixed Points and Linearization	166
6.4	Rabbits versus Sheep	171
6.5	Conservative Systems	176
6.6	Reversible Systems	180
6.7	Pendulum	185
6.8	Index Theory	191
7	Limit Cycles	219
7.0	Introduction	219
7.1	Examples	220
7.2	Ruling Out Closed Orbits	223
7.3	Poincaré–Bendixson Theorem	226
7.4	Liénard Systems	233
7.5	Relaxation Oscillations	235
7.6	Weakly Nonlinear Oscillators	238
8	Bifurcations Revisited	267
8.0	Introduction	267
8.1	Saddle-Node, Transcritical, and Pitchfork Bifurcations	267
8.2	Hopf Bifurcations	274
8.3	Oscillating Chemical Reactions	280
8.4	Global Bifurcations of Cycles	286

8.5	Hysteresis in the Driven Pendulum and Josephson Junction	291
8.6	Coupled Oscillators and Quasiperiodicity	300
8.7	Poincaré Maps	305

Part III Chaos 335

9 Lorenz Equations 337

9.0	Introduction	337
9.1	A Chaotic Waterwheel	338
9.2	Simple Properties of the Lorenz Equations	347
9.3	Chaos on a Strange Attractor	353
9.4	Lorenz Map	361
9.5	Exploring Parameter Space	365
9.6	Using Chaos to Send Secret Messages	370

10 One-Dimensional Maps 385

10.0	Introduction	385
10.1	Fixed Points and Cobwebs	386
10.2	Logistic Map: Numerics	389
10.3	Logistic Map: Analysis	394
10.4	Periodic Windows	398
10.5	Liapunov Exponent	402
10.6	Universality and Experiments	405
10.7	Renormalization	414

11 Fractals 435

11.0	Introduction	435
11.1	Countable and Uncountable Sets	436
11.2	Cantor Set	438
11.3	Dimension of Self-Similar Fractals	441
11.4	Box Dimension	445
11.5	Pointwise and Correlation Dimensions	448

12 Strange Attractors 461

12.0	Introduction	461
12.1	The Simplest Examples	461
12.2	Hénon Map	467
12.3	Rössler System	472
12.4	Chemical Chaos and Attractor Reconstruction	475
12.5	Forced Double-Well Oscillator	480

Part IV Collective Behavior	495
13 Kuramoto Model	497
13.0 Introduction	497
13.1 Governing Equations	498
13.2 Visualization and the Order Parameter	500
13.3 Mean-Field Coupling and Rotating Frame	506
13.4 Steady State	508
13.5 Self-Consistency	513
13.6 Remaining Questions	519
Answers to Selected Exercises	539
References	551
Author Index	571
Subject Index	575
