

CONTENTS

1 INTRODUCTION.....	9
2 THE AIMS OF RESEARCH WORK.....	11
3 DETERMINATION OF MATERIAL PARAMETERS OF ELASTOMER.....	12
4 APDL CREATION OF COMPUTATIONAL MODELS OF COMPOSITES	18
5 COMPUTATION SIMULATIONS OF BASIC EXPERIMENTS OF SINGLE- AND TWO-LAYER COMPOSITES	26
5.1 Materials of Specimens and Test Methods	26
5.2 Test Results	29
5.3 Computational Models	32
5.4 Comparison with Test Data and Discussion of Results.....	34
6 COMPUTATIONAL SIMULATIONS OF SHEAR AND SPECIFIC TENSILE TESTS OF COMPOSITES.....	39
6.1 Parameters of Composites	39
6.2 Computational Models for Shear Test Simulations	41
6.3 Computational Model for Specific Tensile Test Simulation.....	42
6.4 Results and Discussion for Shear Test Simulations	42
6.5 Results and Discussion for Tensile Test Simulation	45
7 COMPUTATIONAL SIMULATION OF BIAXIAL LOADING OF COMPOSITES	49
7.1 Sample for Test and Arcan	49
7.2 Arcan Cyclic Biaxial Test Results	50
7.3 Design of Computational Models.....	52
7.4 Results of Computational Simulation of Biaxial Loading	56
8 COMPUTATIONAL SIMULATION FOR PREDICTION OF MECHANICAL BEHAVIOUR OF SELECTED COMPOSITES.....	62
8.1 Models of Specific Shear Test of Multi-Layered Composites.....	62
8.2 Results from Simulation of Specific Shear Test	64
9 CONCLUSIONS.....	69
