

Table of contents

Stage 7

1 States of matter

1.1	The particle theory of matter	1
1.2	Boiling, evaporating, and condensing	2
1.3	Questions, evidence, and explanations	3
1.4	Melting, freezing, and subliming	4
1.5	Energy and changes of state	5
1.6	Using particle theory to explain dissolving	6
1.7	Planning an investigation	7
1.8	Presenting evidence	8

2 Material properties

2.1	Introducing elements	9
2.2	Metal elements	10
2.3	Non-metal elements	11
2.4	Making conclusions from data	12
2.5	Metal alloys	13
2.6	Material properties	14
2.7	Polymers	15

3 Material changes

3.1	Acids and alkalis	16
3.2	The pH scale and indicators	17
3.3	Neutralisation	18
3.4	Planning investigations and collecting evidence	19

4 The Earth

4.1	The structure of the Earth	20
4.2	Igneous rocks	21
4.3	Sedimentary rocks	22
4.4	Sedimentary rock formation	23
4.5	Metamorphic rocks	24
4.6	Questions, evidence, and explanations	25
4.7	Explaining predictions	26
4.8	Soil	27

4.9	More about soil	28
4.10	Fossils	29
4.11	Estimating the age of the Earth	30
4.12	Human fossils	31

Stage 8

5 States of matter

5.1	The states of matter revisited	32
5.2	Explaining diffusion	33
5.3	Explaining density	34
5.4	Explaining gas pressure	35
5.5	Ideas and evidence	36
5.6	Doing an investigation	37

6 Material properties

6.1	Atoms	38
6.2	Elements and their symbols	39
6.3	Discovering the elements	40
6.4	Organising the elements	41
6.5	Interpreting data from secondary sources	42
6.6	Explaining differences between metals and non-metals	43
6.7	What are compounds?	44
6.8	Making a compound	45
6.9	Naming compounds and writing formulae	46
6.10	Oxides, hydroxide, sulfates, and carbonates	47
6.11	Chlorides	48
6.12	Mixtures	49
6.13	Separating mixtures – filtering and decanting	50
6.14	Separating mixtures – evaporation and distillation	51
6.15	Separating mixtures – fractional distillation	52
6.16	Separating mixtures – chromatography	53
6.17	Separating metals from their ores	54
6.18	What are you made of?	55

7	Material changes		10	The reactivity series	
7.1	Chemical reactions	56	10.1	The reactions of metals with oxygen	77
7.2	Writing word equations	57	10.2	The reactions of metals with water	78
7.3	Corrosion reactions	58	10.3	The reactions of metals with acids	79
7.4	Doing an investigation	59	10.4	The reactivity series	80
7.5	Using reactions to identify chemicals	60	10.5	Metals in the reactivity series	81
			10.6	Metal displacement reactions	82
			10.7	Extracting metals from their ores	83
			10.8	Writing symbol equations	84
Stage 9					
8	Material properties		11	Making salts	
8.1	Atomic structure	61	11.1	Making salts – acids and metals	85
8.2	Finding electrons	62	11.2	Making salts – acids and carbonates	86
8.3	Discovering the nucleus	63	11.3	Making salts – acids and alkalis	87
8.4	Protons, electrons, and the periodic table	64	11.4	Making salts – fertilisers	88
8.5	Proton number, nucleon number, and isotopes	65	12	Rates of reaction	
8.6	The Group 1 elements	66	12.1	Rates of reaction	89
8.7	The Group 2 elements	67	12.2	Concentration and reaction rate	90
8.8	The Group 7 elements	68	12.3	Temperature and reaction rate	91
8.9	Looking at secondary data	69	12.4	Surface area and reaction rate	92
8.10	Periodic trends	70	12.5	Catalysts and reaction rate	93
8.11	How scientists work: inside sub-atomic particles	71			
9	Energy changes		Student book answers 94		
9.1	Energy changes in chemical reactions	72	Workbook answers 113		
9.2	Investigating fuels	73			
9.3	Choosing fuels	74			
9.4	Investigating food energy	75			
9.5	Investigating endothermic changes	76
