

Contents

[Italics denote topics which are exclusively Higher Level.]

1 STOICHIOMETRIC RELATIONSHIPS

(IB TOPIC 1)

Particulate nature of matter
The mole concept and chemical formulas
Chemical reactions and equations
Mass and gaseous volume relationships
Molar volume of a gas and calculations
Titration and atom economy
Multiple choice questions
Short answer questions

2 ATOMIC STRUCTURE

(IB TOPIC 2 AND TOPIC 12)

The nuclear atom
Mass spectrometer and relative atomic mass
Emission spectra
Electronic configuration
Evidence from ionization energies
Multiple choice questions
Short answer questions

3 PERIODICITY (IB TOPIC 3 AND TOPIC 13)

The periodic table
Periodic trends (1)
Periodic trends (2)
Periodic trends (3)
The transition metals
Transition metal complex ions
Colour of transition metal complexes
Multiple choice questions
Short answer questions

4 CHEMICAL BONDING AND STRUCTURE (IB TOPIC 4 AND TOPIC 14)

Ionic bonding
Covalent bonding
Shapes of simple molecules and ions
Resonance hybrids and allotropes of carbon
Intermolecular forces
Physical properties related to bonding type
Metals and alloys
Molecular orbitals
Oxygen and ozone
Hybridization (1)

Hybridization (2)
Multiple choice questions
Short answer questions

5 ENERGETICS / THERMOCHEMISTRY (IB TOPIC 5 AND TOPIC 15)

Measuring enthalpy changes
 ΔH calculations
Hess' Law and standard enthalpy changes
Bond enthalpies
Energy cycles
Entropy and spontaneity
Spontaneity of a reaction / Multiple choice questions
Multiple choice questions (continued)
Short answer questions

6 CHEMICAL KINETICS (IB TOPIC 6 AND TOPIC 16)

Rates of reaction and collision theory
Factors affecting the rate of reaction
Rate expression and order of reaction
Reaction mechanisms and activation energy
Multiple choice questions
Multiple choice questions (continued)
Short answer questions

7 EQUILIBRIUM (IB TOPIC 7 AND TOPIC 17)

The equilibrium law
Le Chatelier's principle and factors affecting the position of equilibrium
Equilibrium calculations
Multiple choice questions
Short answer questions

8 ACIDS AND BASES (IB TOPIC 8 AND TOPIC 18)

Theories and properties of acids and bases
The pH scale
Strong and weak acids and bases and simple pH calculations
Acid deposition
Lewis acids and bases
Calculations involving pH, pOH and pK_w
Calculations with weak acids and bases
Salt hydrolysis and buffer solutions

<i>Titration curves and indicators</i>	67	Spectroscopic identification of organic compounds – IR and ^1H NMR	103
Multiple choice questions	68	<i>Nuclear magnetic resonance (NMR) spectroscopy</i>	104
Short answer questions	69	<i>Applications of ^1H NMR spectroscopy</i>	105
9 REDOX PROCESSES		<i>Combination of different analytical techniques to determine structure</i>	106
(IB TOPIC 9 AND TOPIC 19)		<i>X-ray crystallography / Multiple choice questions</i>	107
Redox reactions (1)	70	Multiple choice questions continued	108
Redox reactions (2)	71	Short answer questions	109
Activity series and Winkler method	72	12 OPTION A – MATERIALS	
Electrochemical	73	Introduction to materials science	110
<i>Electrolysis</i>	74	Principles of extraction of metals from their ores	111
<i>Electroplating and standard electrode potentials</i>	75	Faraday calculations and properties and analysis of alloys	112
<i>Spontaneity of electrochemical reactions</i>	76	Catalysts	113
Multiple choice questions	77	Liquid crystals (1)	114
Short answer questions	78	Liquid crystals (2)	115
10 ORGANIC CHEMISTRY		Polymers	116
(IB TOPIC 10 AND TOPIC 20)		Nanotechnology	117
Fundamentals of organic chemistry	79	Environmental impact – plastics	118
Common classes of organic compounds	80	<i>Superconducting metals and X-ray crystallography</i>	119
Structural formulas	81	<i>Condensation polymers</i>	120
Structural isomers	82	<i>Environmental impact – heavy metals (1)</i>	121
3-D models of structural formulas	83	<i>Environmental impact – heavy metals (2)</i>	122
Properties of different homologous series	84	Short answer questions	123
Alkanes	85	13 OPTION B – BIOCHEMISTRY	
Alkenes	86	Introduction to biochemistry	124
Alcohols	87	Structure of proteins	125
Substitution and condensation reactions	88	Analysis of proteins	126
<i>Nucleophilic substitution</i>	89	Enzymes	127
<i>Electrophilic addition reactions (1)</i>	90	Lipids (1)	128
<i>Electrophilic addition reactions (2)</i>	91	Lipids (2)	129
<i>Electrophilic substitution reactions and reduction reactions</i>	92	Carbohydrates	130
<i>Synthetic routes</i>	93	Vitamins	131
<i>Stereoisomerism (1)</i>	94	Biochemistry and the environment	132
<i>Stereoisomerism (2)</i>	95	<i>Proteins and enzymes (1)</i>	133
<i>Stereoisomerism (3)</i>	96	<i>Proteins and enzymes (2)</i>	134
Multiple choice questions	97	<i>Nucleic acids</i>	135
Short answer questions	98	<i>The genetic code</i>	136
11 MEASUREMENT, DATA PROCESSING AND ANALYSIS		<i>Biological pigments (1)</i>	137
(IB TOPIC 11 AND TOPIC 21)		<i>Biological pigments (2)</i>	138
Uncertainty and error in measurement	99	<i>Stereochemistry in biomolecules</i>	139
Uncertainty in calculated results and graphical techniques	100	Short answer questions	140
Analytical techniques	101	14 OPTION C – ENERGY	
Spectroscopic identification of organic compounds – MS	102	Energy sources	141
		Fossil fuels (1)	142

Fossil fuels (2)	143	16 UNDERLYING PHILOSOPHY	
Nuclear fusion and nuclear fission (1)	144	Introduction	167
Nuclear fusion and nuclear fission (2)	145	Essential ideas (1)	168
Solar energy	146	Essential ideas (2)	169
Environmental impact – global warming	147	Nature of Science (1)	170
<i>Electrochemistry, rechargeable batteries and fuel cells (1)</i>	148	Nature of Science (2)	171
<i>Electrochemistry, rechargeable batteries and fuel cells (2)</i>	149	International-mindedness	172
<i>Nuclear fusion and nuclear fission (3)</i>	150	Utilization	173
<i>Nuclear fusion and nuclear fission (4)</i>	151	17 OBTAINING A HIGH FINAL GRADE	
<i>Photovoltaic cells and dye-sensitized solar cells (DSSC)</i>	152	Study methods	174
Short answer questions	153	The final examinations	175
15 OPTION D – MEDICINAL CHEMISTRY		Command terms	176
Pharmaceutical products and drug action	154	Internal Assessment (1)	177
Aspirin	155	Internal Assessment (2)	178
Penicillin	156	Extended Essays (1)	179
Opiates	157	Extended Essays (2)	180
pH regulation of the stomach	158	Extended Essays (3)	181
Buffer solutions	159	ANSWERS TO QUESTIONS	182
Antiviral medications	160	ORIGIN OF INDIVIDUAL QUESTIONS	190
Environmental impact of some medications	161	INDEX	191
<i>Taxol – a chiral auxiliary case study</i>	162	PERIODIC TABLE FOR USE WITH THE IB	196
<i>Nuclear medicine</i>	163		
<i>Drug detection and analysis (1)</i>	164		
<i>Drug detection and analysis (2)</i>	165		
Short answer questions	166
