

Content	
CHAPTER 1	7
General introduction	
CHAPTER 2	21
Potential implications of sperm dna methylation functional properties in aquaculture management	
CHAPTER 3	45
<i>In vivo</i> and <i>in vitro</i> aging of common carp <i>Cyprinus carpio</i> sperm after multiple hormonal application and stripping of males	
CHAPTER 4	63
Practical use of extender and activation solutions for short-term storage of common carp (<i>Cyprinus carpio</i> L.) milt in a hatchery	
CHAPTER 5	73
Elevated temperature promotes spermatozoa motility kinetics and fertilizing ability following short-term storage: an implication for artificial reproduction of common carp <i>Cyprinus carpio</i> in a hatchery	
CHAPTER 6	85
The plasma membrane contributes to temperature-induced spermatozoa motility kinetics in short-term stored sperm of common carp (<i>Cyprinus carpio</i>)	
CHAPTER 7	97
High temperature induces motility of zebrafish sperm after short-term storage	
CHAPTER 8	111
General discussion	113
English summary	121
Czech summary	123
Acknowledgments	125
List of publications	127
Training and supervision plan during study	129
<i>Curriculum vitae</i>	130
