

SECTION 1 CRANIAL NERVE AND NEURO-OPHTHALMOLOGIC DISORDERS

Overview of Cranial Nerves

- 1.1 Distribution of Motor and Sensory Fibers, 2
- 1.2 Overview of Cranial Nerves, 3
- 1.3 Nerves and Nuclei Viewed in Phantom From Behind, 4
- 1.4 Nerves and Nuclei in Lateral Dissection, 5

Cranial Nerve I: Olfactory Nerve

- 1.5 Olfactory Pathways, 6
- 1.6 Olfactory Receptors, 7
- 1.7 Olfactory Bulb and Nerve, 8

Cranial Nerve II: Optic Nerve

- 1.8 Eye, 9
- 1.9 Cranial Nerve II and Visual Pathways, 10
- 1.10 Optic Nerve Appearance, 11
- 1.11 Retinal Projections to Thalamus, Midbrain, and Brainstem, 12
- 1.12 Pupillary Light Reflex and the Accommodation Reflex, 13

Cranial Nerves III, IV, and VI (Oculomotor, Trochlear, and Abducens)

- 1.13 Oculomotor (III), Trochlear (IV), and Abducens Nerves (VI), 14
- 1.14 Nerves of Orbit and Cavernous Sinus, 15
- 1.15 Damage to Cranial Nerve III, 16
- 1.16 Control of Eye Movements, 17
- 1.17 Control of Eye Movements: Pathology, 18
- 1.18 Control of Eye Movements: Pathology (Continued), 19
- 1.19 Autonomic Innervation of the Eye, 20

Cranial Nerve V: Trigeminal Nerve

- 1.20 Trigeminal Nerve (V), 21
- 1.21 Trigeminal Nuclei: Afferent and Central Connections, 22
- 1.22 Trigeminal Nuclei: Central and Peripheral Connections, 23
- 1.23 Ophthalmic (V₁) and Maxillary (V₂) Nerves, 24
- 1.24 Mandibular Nerve (V₃), 25
- 1.25 Trigeminal Nerve Disorders, 26

Cranial Nerve VII: Facial Nerve

- 1.26 Pons: Level of the Genu of the Facial Nerve, 27
- 1.27 Facial Nerve (VII), 28
- 1.28 Muscles of Facial Expression: Lateral View, 29
- 1.29 Central Versus Peripheral Facial Paralysis, 30
- 1.30 Facial Palsy, 31

Taste Receptors and Pathways

- 1.31 Anatomy of Taste Buds and Their Receptors, 32
- 1.32 Tongue, 33

Cranial Nerve VIII: Vestibulocochlear Nerve

- 1.33 Vestibulocochlear Nerve (VIII), 34
- 1.34 Pathway of Sound Reception, 35
- 1.35 Pathologic Causes of Vertigo, 36
- 1.36 Canalith Repositioning (Epley Maneuver), 37
- 1.37 Afferent Auditory Pathways, 38
- 1.38 Centrifugal Auditory Pathways, 39
- 1.39 Vestibular Receptors, 40
- 1.40 Cochlear Receptors, 41

Cranial Nerve IX: Glossopharyngeal Nerve and Otic Ganglion

- 1.41 Glossopharyngeal Nerve (IX), 42
- 1.42 Otic Ganglion, 43

Cranial Nerve X: Vagus Nerve

- 1.43 Vagus Nerve (X), 44
- 1.44 Motor and Sensory Branches From the Vagus Nerve, 45
- 1.45 Neurogenic Disorders of Mouth and Pharynx (X and XII), 46

Cranial Nerve XI: Accessory Nerve

- 1.46 Accessory Nerve (XI), 47
- 1.47 Clinical Findings in Cranial Nerve XI Damage, 48

Cranial Nerve XII: Hypoglossal Nerve

- 1.48 Hypoglossal Nerve Intermedullary Course, 49
- 1.49 Hypoglossal Nerve (XII), 50
- 1.50 Disorders of Hypoglossal Nucleus and Nerve, 51

SECTION 2 SPINAL CORD: ANATOMY AND MYELOPATHIES

- 2.1 Spinal Cord, 54
- 2.2 Spinal Membranes and Nerve Roots, 55
- 2.3 Arteries of Spinal Cord and Nerve Roots, 56
- 2.4 Arteries of Spinal Cord: Intrinsic Distribution, 57
- 2.5 Veins of Spinal Cord, Nerve Roots, and Vertebrae, 58
- 2.6 Principal Fiber Tracts of Spinal Cord, 59
- 2.7 Somesthetic System of Body, 60
- 2.8 Corticospinal (Pyramidal) System: Motor Component, 61
- 2.9 Rubrospinal Tract, 62
- 2.10 Vestibulospinal Tracts, 63
- 2.11 Reticulospinal and Corticoreticular Pathways, 64
- 2.12 Spinal Origin or Termination of Major Descending Tracts and Ascending Pathways, 65
- 2.13 Cytoarchitecture of Spinal Cord Gray Matter, 66
- 2.14 Spinal Effector Mechanisms, 67
- 2.15 Spinal Reflex Pathways, 68
- 2.16 Spinal Cord Dysfunction, 69
- 2.17 Sensory Impairment Related to Level of Spinal Cord Injury, 70
- 2.18 Incomplete Spinal Cord Syndromes, 71
- 2.19 Acute Spinal Cord Syndromes, 72
- 2.20 Acute Spinal Cord Syndromes: Pathology, Etiology, and Diagnosis, 73
- 2.21 Spinal Tumors, 74
- 2.22 Extramedullary and Intramedullary Spinal Cord Tumors, 75
- 2.23 Neuroimaging (MRI) Characteristics of Spinal Tumors, 76
- 2.24 Syringomyelia, 77
- 2.25 Subacute Combined Degeneration, 78
- 2.26 Spinal Dural Fistulas and Arteriovenous Malformations, 79
- 2.27 Cervical Spondylosis, 80
- 2.28 Cervical Disk Herniation Causing Cord Compression, 81
- 2.29 Infectious and Hereditary Myelopathies, 82

SECTION 3 SPINAL TRAUMA

- 3.1 Spinal Column, 84
- 3.2 Atlas and Axis, 85
- 3.3 Cervical Vertebrae, 86
- 3.4 External Craniocervical Ligaments, 87
- 3.5 Internal Craniocervical Ligaments, 88
- 3.6 Thoracic Vertebrae, 89
- 3.7 Lumbar Vertebrae and Intervertebral Disk, 90
- 3.8 Sacrum and Coccyx, 91
- 3.9 Ligaments of Sacrum and Coccyx, 92

- 3.10 Biomechanics of Spine and Spinal Cord Injuries: Distractive Flexion, 93
- 3.11 Biomechanics of Spine and Spinal Cord Injuries: Compressive Flexion, 94
- 3.12 Biomechanics of Spine and Spinal Cord Injuries: Distractive Extension, 95
- 3.13 Cervical Spine Injury: Prehospital, Emergency Department, and Acute Management, 96
- 3.14 Traction and Bracing, 97
- 3.15 Anterior Cervical Spine Decompression and Stabilization, 98
- 3.16 Posterior Cervical Stabilization and Fusion, 99
- 3.17 Spinal Cord Injury Medical Issues, 100

SECTION 4 NERVE ROOTS AND PLEXUS DISORDERS

- 4.1 Cervical Disk Herniation, 102
- 4.2 Radiographic Diagnosis of Radiculopathy, 103
- 4.3 Back Pain and Lumbar Disk Disease, 104
- 4.4 Lumbar Disk Herniation: Clinical Manifestations, 105
- 4.5 L4–5 Disk Extrusion, 106
- 4.6 Lumbosacral Spinal Stenosis, 107
- 4.7 Spinal Nerves, 108
- 4.8 Dermal Segmentation, 109
- 4.9 Thoracic Nerves, 110
- 4.10 Thoracic Spinal Nerve Root Disorders, 111
- 4.11 Diabetic Lumbosacral Radiculoplexus Neuropathy, 112
- 4.12 Lumbar, Sacral, and Coccygeal Plexuses, 113
- 4.13 Brachial Plexus, 114
- 4.14 Brachial Plexus and Cervical Nerve Root Injuries at Birth, 115
- 4.15 Brachial Plexopathy, 116
- 4.16 Lumbosacral Plexopathy, 117
- 4.17 Cervical Plexus, 118

SECTION 5 MONONEUROPATHIES

- 5.1 Compression Neuropathies, 120
- 5.2 Chronic Nerve Compression, 121
- 5.3 Evaluation of Mononeuropathies, 122
- 5.4 Radiologic Studies in Compression Neuropathy, 123
- 5.5 Proximal Nerves of the Upper Extremity, 124
- 5.6 Suprascapular and Musculocutaneous Nerves, 125
- 5.7 Median Nerve, 126
- 5.8 Proximal Median Neuropathies, 127
- 5.9 Distal Median Neuropathies: Carpal Tunnel Syndrome, 128
- 5.10 Distal Median Neuropathies: Carpal Tunnel Syndrome (Continued), 129
- 5.11 Ulnar Nerve, 130
- 5.12 Ulnar Mononeuropathies: Potential Entrapment Sites, 131
- 5.13 Radial Nerve, 132
- 5.14 Radial Nerve Compression and Entrapment Neuropathies, 133
- 5.15 Femoral and Lateral Femoral Cutaneous Nerves, 134
- 5.16 Iliohypogastric, Ilioinguinal, Genitofemoral, and Obturator Nerves, 135
- 5.17 Sciatic and Gluteal Nerves, 136
- 5.18 Sciatic and Posterior Femoral Cutaneous Nerves, 137
- 5.19 Fibular (Peroneal) and Tibial Nerves, 138
- 5.20 Peroneal Nerve Compression, 139
- 5.21 Tibial Nerve, 140
- 5.22 Dermatome and Cutaneous Nerve Patterns, 141
- 5.23 Dermatomes, 142

SECTION 6 PERIPHERAL NEUROPATHIES

- 6.1 Peripheral Nerve, 144
- 6.2 Histology of Peripheral Nerve, 145
- 6.3 Cell Types of Nervous System, 146
- 6.4 Resting Membrane Potential, 147
- 6.5 Ion Channel Mechanics and Action Potential Generation, 148
- 6.6 Neurophysiology and Peripheral Nerve Demyelination, 149
- 6.7 Impulse Propagation, 150
- 6.8 Conduction Velocity, 151
- 6.9 Visceral Efferent Endings, 152
- 6.10 Cutaneous Receptors, 153
- 6.11 Pacinian Corpuscle, 154
- 6.12 Muscle and Joint Receptors, 155
- 6.13 Proprioceptive Reflex Control of Muscle Tension, 156
- 6.14 Charcot-Marie-Tooth Disease Overview (Hereditary Motor and Sensory Neuropathy), 157
- 6.15 Charcot-Marie-Tooth Disease: Common Types, 158
- 6.16 Early Onset and Other Rare Forms of Charcot-Marie-Tooth Disease and Inherited Neuropathies, 159
- 6.17 Hereditary Sensory and Autonomic Neuropathy, 160
- 6.18 Guillain-Barré Syndrome, 161
- 6.19 Guillain-Barré Syndrome (Continued), 162
- 6.20 Chronic Inflammatory Demyelinating Polyradiculoneuropathy, 163
- 6.21 Diabetic Neuropathies, 164
- 6.22 Monoclonal Protein-Associated Neuropathies, 165
- 6.23 Distal Acquired Demyelinating Symmetric (DADS) Neuropathy, 166
- 6.24 Vasculitic Neuropathy and Other Connective Tissue Disorders Associated With Neuropathy, 167
- 6.25 Sjögren Syndrome, 168
- 6.26 Immunopathogenesis of Guillain-Barré Syndrome, 169
- 6.27 Peripheral Neuropathy Caused by Heavy Metal Poisoning, 170
- 6.28 Metabolic, Toxic, and Nutritional Peripheral Neuropathies, 171
- 6.29 Leprosy and Other Infections Sometimes Causing Peripheral Neuropathy, 172

SECTION 7 AUTONOMIC NERVOUS SYSTEM AND ITS DISORDERS

- 7.1 General Topography of Autonomic Nervous System, 174
- 7.2 General Topography of Autonomic Nervous System (Continued), 175
- 7.3 Autonomic Reflex Pathways, 176
- 7.4 Cholinergic and Adrenergic Nerves, 177
- 7.5 Autonomic Nerves in Head and Neck, 178
- 7.6 Autonomic Nerves in Neck, 179
- 7.7 Autonomic Innervation of Eye, 180
- 7.8 Autonomic Innervation of Eye (Continued), 181
- 7.9 Autonomic Nerves in Thorax, 182
- 7.10 Innervation of Heart, 183
- 7.11 Innervation of Blood Vessels, 184
- 7.12 Carotid Body and Carotid Sinus, 185
- 7.13 Autonomic Nerves and Ganglia in Abdomen, 186
- 7.14 Innervation of Stomach and Proximal Duodenum, 187
- 7.15 Innervation of Intestines, 188
- 7.16 Autonomic Innervation of Small Intestine, 189

- 7.17 Enteric Plexuses, 190
- 7.18 Innervation of Liver and Biliary Tract, 191
- 7.19 Innervation of Adrenal Glands, 192
- 7.20 Autonomic Nerves and Ganglia in Pelvis, 193
- 7.21 Innervation of Kidneys, Ureters, and Urinary Bladder, 194
- 7.22 Innervation of Urinary Bladder and Lower Ureter, 195
- 7.23 Innervation of Reproductive Organs, 196
- 7.24 Female Reproductive Organs, 197
- 7.25 Autonomic Testing, 198
- 7.26 Cardiovascular Testing and Head-up Tilting, 199
- 7.27 Abnormal Pupillary Conditions, 200
- 7.28 Clinical Presentation of Autonomic Disorders, 201
- 7.29 Multiple System Atrophy, 202

SECTION 8 PAIN

- 8.1 Neuroanatomy of the Ascending Pain Pathways, 204
- 8.2 Neuroanatomy of the Ascending Pain Pathways (Continued), 205
- 8.3 Descending Nociceptive Pathways and Neurochemical Foundations of Descending Pain Modulation, 206
- 8.4 Endorphin System, 207
- 8.5 Nociceptive Processing and Central Nervous System Correlates of Pain, 208
- 8.6 Central Nervous System Neurotransmitters, Receptors, and Drug Targets, 209
- 8.7 Thalamic Pain Syndrome, 210
- 8.8 Clinical Manifestations Related to Thalamus Site in Intracerebral Hemorrhage, 211
- 8.9 Complex Regional Pain, 212
- 8.10 Herpes Zoster, 213
- 8.11 Occipital Neuralgia, 214
- 8.12 Myofascial Factors in Low Back Pain, 215
- 8.13 Posterior Abdominal Wall: Internal View, 216
- 8.14 Lumbar Zygapophyseal Joint Back Pain, 217
- 8.15 Low Back Pain and Effects of Lumbar Hyperlordosis and Flexion on Spinal Nerves, 218
- 8.16 Examination of the Patient With Low Back Pain, 219
- 8.17 Osteoporosis, 220
- 8.18 Diagnosis of Low Back, Buttock, and Hip Pain, 221
- 8.19 Hip Joint Involvement in Osteoarthritis, 222
- 8.20 Painful Peripheral Neuropathy, 223
- 8.21 Peripheral Neuropathies: Clinical Manifestations, 224
- 8.22 Functional Neurologic Disorders, 225
- 8.23 Somatoform Conversion Reactions, 226

SECTION 9 FLOPPY INFANT

- 9.1 Neonatal Hypotonia, 228
- 9.2 Congenital Myopathies, 229
- 9.3 Spinal Muscular Atrophy, 230
- 9.4 Treatment for Spinal Muscular Atrophy, 231
- 9.5 Infantile Neuromuscular Junction Disorders, 232
- 9.6 Arthrogryposis Multiplex Congenita, 233

SECTION 10 MOTOR NEURON AND ITS DISORDERS

- 10.1 Peripheral Nervous System: Overview, 236
- 10.2 Spinal Cord and Neuronal Cell Body With Motor, Sensory, and Autonomic Components of the Peripheral Nerve, 237
- 10.3 Motor Unit, 238

- 10.4 Motor Unit Potentials, 239
- 10.5 Primary Motor Neuron Disease, 240
- 10.6 Amyotrophic Lateral Sclerosis, 241
- 10.7 Clinical Manifestations of Amyotrophic Lateral Sclerosis (Continued), 242
- 10.8 Mimics of Amyotrophic Lateral Sclerosis, 243
- 10.9 Diagnosis of Amyotrophic Lateral Sclerosis, 244
- 10.10 Treatment of Amyotrophic Lateral Sclerosis, 245
- 10.11 Spinal Muscular Atrophy and Spinal Bulbar Muscular Atrophy, 246

SECTION 11 NEUROMUSCULAR JUNCTION AND ITS DISORDERS

- 11.1 Neuromuscular Junction, 248
- 11.2 Physiology of Neuromuscular Junction, 249
- 11.3 Synaptic Transmission, 250
- 11.4 Synaptic Transmission (Continued), 251
- 11.5 Repetitive Motor Nerve Stimulation, 252
- 11.6 Patient With Lambert-Eaton Myasthenic Syndrome, 253
- 11.7 Myasthenia Gravis, 254
- 11.8 Myasthenia Gravis (Continued), 255
- 11.9 Immunopathology of Myasthenia Gravis, 256
- 11.10 Presynaptic Neuromuscular Junction Transmission Disorders: Lambert-Eaton Myasthenic Syndrome and Infantile Botulism, 257
- 11.11 Congenital Myasthenic Syndromes, 258
- 11.12 Foodborne Neurotoxins, 259

SECTION 12 MUSCLE AND ITS DISORDERS

- 12.1 Muscle Fiber Anatomy: Basic Sarcomere Subdivisions, 262
- 12.2 Muscle Fiber Anatomy: Biochemical Mechanics of Contraction, 263
- 12.3 Muscle Membrane, T Tubules, and Sarcoplasmic Reticulum, 264
- 12.4 Muscle Response to Nerve Stimulation, 265
- 12.5 Metabolism of Muscle Cell, 266
- 12.6 Muscle Fiber Types, 267
- 12.7 Overview of Myopathies: Clinical Approach, 268
- 12.8 Dystrophinopathies, 270
- 12.9 Duchenne Muscular Dystrophy, 271
- 12.10 Dystrophinopathies (Continued), 272
- 12.11 Myotonic Dystrophy and Other Myotonic Disorders, 273
- 12.12 Myotonic Dystrophy and Other Myotonic Disorders (Continued), 274
- 12.13 Other Types of Muscular Dystrophy, 275
- 12.14 Polymyositis and Dermatomyositis, 276
- 12.15 Polymyositis and Dermatomyositis (Continued), 277
- 12.16 Inclusion Body Myositis, 278
- 12.17 Immunopathogenesis of Inflammatory Myopathies, 279
- 12.18 Endocrine, Toxic, and Critical Illness Myopathies, 280
- 12.19 Myopathies: Hypokalemia/Hyperkalemia and Periodic Paralysis Channelopathies, 281
- 12.20 Metabolic and Mitochondrial Myopathies, 282
- 12.21 Myoglobinuric Syndromes Including Malignant Hyperthermia, 283
