

## SECTION 1 EMBRYOLOGY

- 1.1 Amphioxus and Human Embryo at 16 Days, 2
- 1.2 Differentiation of Somites into Myotomes, Sclerotomes, and Dermatomes, 3
- 1.3 Progressive Stages in Formation of Vertebral Column, Dermatomes, and Myotomes; Mesenchymal Precartilaginous Primordia of Axial and Appendicular Skeletons at 5 Weeks, 4
- 1.4 Fate of Body, Costal Process, and Neural Arch Components of Vertebral Column, with Sites and Time of Appearance of Ossification Centers, 5
- 1.5 First and Second Cervical Vertebrae at Birth; Development of Sternum, 6
- 1.6 Early Development of Skull, 7
- 1.7 Skeleton of Full-Term Newborn, 8
- 1.8 Changes in Position of Limbs Before Birth; Precartilaginous Mesenchymal Cell Concentrations of Appendicular Skeleton at 6 Weeks, 9
- 1.9 Changes in Ventral Dermatome Pattern During Limb Development, 10
- 1.10 Initial Bone Formation in Mesenchyme; Early Stages of Flat Bone Formation, 11
- 1.11 Secondary Osteon (Haversian System), 12
- 1.12 Growth and Ossification of Long Bones, 13
- 1.13 Growth in Width of a Bone and Osteon Remodeling, 14
- 1.14 Remodeling: Maintenance of Basic Form and Proportions of Bone during Growth, 15
- 1.15 Development of Three Types of Synovial Joints, 16
- 1.16 Segmental Distribution of Myotomes in Fetus of 6 Weeks; Developing Skeletal Muscles at 8 Weeks, 17
- 1.17 Development of Skeletal Muscle Fibers, 18
- 1.18 Cross Sections of Body at 6 to 7 Weeks, 19
- 1.19 Prenatal Development of Perineal Musculature, 20
- 1.20 Origins and Innervations of Pharyngeal Arch and Somite Myotome Muscles, 21
- 1.21 Branchiomic and Adjacent Myotomic Muscles at Birth, 22

## SECTION 2 PHYSIOLOGY

- 2.1 Microscopic Appearance of Skeletal Muscle Fibers, 24
- 2.2 Organization of Skeletal Muscle, 25
- 2.3 Intrinsic Blood and Nerve Supply of Skeletal Muscle, 26
- 2.4 Composition and Structure of Myofilaments, 27
- 2.5 Muscle Contraction and Relaxation, 28
- 2.6 Biochemical Mechanics of Muscle Contraction, 29
- 2.7 Sarcoplasmic Reticulum and Initiation of Muscle Contraction, 30
- 2.8 Initiation of Muscle Contraction by Electric Impulse and Calcium Movement, 31
- 2.9 Motor Unit, 32
- 2.10 Structure of Neuromuscular Junction, 33
- 2.11 Physiology of Neuromuscular Junction, 34
- 2.12 Pharmacology of Neuromuscular Transmission, 35
- 2.13 Physiology of Muscle Contraction, 36
- 2.14 Energy Metabolism of Muscle, 37
- 2.15 Muscle Fiber Types, 38
- 2.16 Growth Plate: Structure, Physiology, and Pathophysiology, 39
- 2.17 Growth Plate: Structure, Physiology, and Pathophysiology (Continued), 40
- 2.18 Growth Plate: Structure and Blood Supply, 41
- 2.19 Growth Plate: Peripheral Fibrocartilaginous Element, 42
- 2.20 Composition and Structure of Cartilage, 43
- 2.21 Bone Cells and Bone Deposition, 44
- 2.22 Composition of Bone, 45
- 2.23 Structure of Cortical (Compact) Bone, 46
- 2.24 Structure of Trabecular Bone, 47

- 2.25 Formation and Composition of Collagen, 48
- 2.26 Formation and Composition of Proteoglycan, 49
- 2.27 Structure and Function of Synovial Membrane, 50
- 2.28 Histology of Connective Tissue, 51
- 2.29 Bone Homeostasis: Dynamics, 52
- 2.30 Bone Homeostasis: Regulation of Calcium and Phosphate Metabolism, 53
- 2.31 Effects of Bone Formation and Bone Resorption on Skeletal Mass, 54
- 2.32 Four Mechanisms of Bone Mass Regulation, 55
- 2.33 Normal Calcium and Phosphate Metabolism, 56
- 2.34 Nutritional Calcium Deficiency, 58
- 2.35 Effects of Disuse and Stress (Weight Bearing) on Bone Mass, 59
- 2.36 Musculoskeletal Effects of Weightlessness (Space Flight), 60
- 2.37 Bone Architecture and Remodeling in Relation to Stress, 61
- 2.38 Stress-Generated Electric Potentials in Bone, 62
- 2.39 Bioelectric Potentials in Bone, 63
- 2.40 Age-Related Changes in Bone Geometry, 64
- 2.41 Age-Related Changes in Bone Geometry (Continued), 65

## SECTION 3 METABOLIC DISEASES

- 3.1 Parathyroid Hormone, 68
- 3.2 Primary Hyperparathyroidism: Pathophysiology, 69
- 3.3 Primary Hyperparathyroidism: Clinical Manifestations, 70
- 3.4 Differential Diagnosis of Hypercalcemic States, 71
- 3.5 Hypoparathyroidism: Pathologic Physiology, 72
- 3.6 Chronic Hypoparathyroidism: Clinical Manifestations, 74
- 3.7 Hypocalcemia: Clinical Manifestations, 75
- 3.8 Pseudohypoparathyroidism, 76
- 3.9 Mechanism of Parathyroid Hormone Activity on End Organ, 77
- 3.10 Mechanism of Parathyroid Hormone Activity on End Organ: Cyclic AMP Response to PTH, 78
- 3.11 Clinical Guide to Parathyroid Hormone Assay, 79
- 3.12 Clinical Guide to Parathyroid Hormone Assay (Continued), 80
- 3.13 Childhood Rickets, 81
- 3.14 Adult Osteomalacia, 82
- 3.15 Nutritional Deficiency: Rickets and Osteomalacia, 83
- 3.16 Vitamin D-Resistant Rickets and Osteomalacia Due to Proximal Renal Tubular Defects (Hypophosphatemic Rachitic Syndromes), 84
- 3.17 Vitamin D-Resistant Rickets and Osteomalacia Due to Proximal and Distal Renal Tubular Defects, 85
- 3.18 Vitamin D-Dependent (Pseudodeficiency) Rickets and Osteomalacia, 86
- 3.19 Vitamin D-Resistant Rickets and Osteomalacia Due to Renal Tubular Acidosis, 87
- 3.20 Metabolic Aberrations of Renal Osteodystrophy, 88
- 3.21 Rickets, Osteomalacia, and Renal Osteodystrophy, 89
- 3.22 Bony Manifestations of Renal Osteodystrophy, 90
- 3.23 Vascular and Soft Tissue Calcification in Secondary Hyperparathyroidism of Chronic Renal Disease, 91
- 3.24 Clinical Guide to Vitamin D Measurement, 92
- 3.25 Hypophosphatasia, 93
- 3.26 Osteoporosis: Risk Factors, 94
- 3.27 Osteoporosis: Involutional, 95
- 3.28 Osteoporosis: Clinical Manifestations, 96
- 3.29 Osteoporosis: Progressive Spinal Deformity, 97
- 3.30 Radiology of Osteopenia: Classification, 98
- 3.31 Radiology of Osteopenia: Imaging, 99
- 3.32 Radiology of Osteopenia: DXA, 100
- 3.33 Transiliac Bone Biopsy, 101

- 3.34 Treatment of Complications of Spinal Osteoporosis, 102
- 3.35 Treatment of Osteoporosis: Medications, 103
- 3.36 Treatment of Osteoporosis: Functional Domains of Bisphosphonate Chemical Structure, 104
- 3.37 Treatment of Osteoporosis: Inhibition of FPP Synthase, 105
- 3.38 Osteogenesis Imperfecta Type I, 106
- 3.39 Osteogenesis Imperfecta Type III, 107
- 3.40 Marfan Syndrome, 109
- 3.41 Marfan Syndrome (Continued), 110
- 3.42 Ehlers-Danlos Syndromes, 111
- 3.43 Ehlers-Danlos Syndromes (Continued), 112
- 3.44 Osteopetrosis (Albers-Schönberg Disease), 113
- 3.45 Paget Disease of Bone, 114
- 3.46 Paget Disease of Bone (Continued), 115
- 3.47 Pathophysiology and Treatment of Paget Disease of Bone, 116
- 3.48 Fibrodysplasia Ossificans Progressiva, 117

## SECTION 4 CONGENITAL AND DEVELOPMENTAL DISORDERS

### Dwarfism

- 4.1 Achondroplasia: Clinical Manifestations, 120
- 4.2 Achondroplasia: Clinical Manifestations (Continued), 121
- 4.3 Achondroplasia: Clinical Manifestations of Spine, 122
- 4.4 Achondroplasia: Diagnostic Testing, 123
- 4.5 Hypochondroplasia, 124
- 4.6 Diastrophic Dwarfism, 125
- 4.7 Pseudoachondroplasia, 126
- 4.8 Metaphyseal Chondrodysplasia, McKusick Type, 127
- 4.9 Metaphyseal Chondrodysplasia, Schmid Type, 128
- 4.10 Chondrodysplasia Punctata, 129
- 4.11 Chondroectodermal Dysplasia (Ellis-van Creveld Syndrome), Grebe Chondrodysplasia, and Acromesomelic Dysplasia, 130
- 4.12 Multiple Epiphyseal Dysplasia, Fairbank Type, 131
- 4.13 Pycnodysostosis (Pyknodysostosis), 132
- 4.14 Campomelic (Campomelic) Dysplasia, 133
- 4.15 Spondyloepiphyseal Dysplasia Tarda and Spondyloepiphyseal Dysplasia Congenita, 134
- 4.16 Spondylocostal Dysostosis and Dyggve-Melchior-Clausen Dysplasia, 135
- 4.17 Kniest Dysplasia, 136
- 4.18 Mucopolysaccharidoses, 137
- 4.19 Principles of Treatment of Skeletal Dysplasias, 138

### Neurofibromatosis

- 4.20 Diagnostic Criteria and Cutaneous Lesions in Neurofibromatosis, 139
- 4.21 Cutaneous Lesions in Neurofibromatosis, 140
- 4.22 Spinal Deformities in Neurofibromatosis, 141
- 4.23 Bone Overgrowth and Erosion in Neurofibromatosis, 142

### Other

- 4.24 Arthrogryposis Multiplex Congenita, 143
- 4.25 Fibrodysplasia Ossificans Progressiva and Progressive Diaphyseal Dysplasia, 144
- 4.26 Osteopetrosis and Osteopoikilosis, 145
- 4.27 Melorheostosis, 146
- 4.28 Congenital Elevation of Scapula, Absence of Clavicle, and Pseudarthrosis of Clavicle, 147
- 4.29 Madelung Deformity, 148
- 4.30 Congenital Bowing of the Tibia, 149
- 4.31 Congenital Pseudoarthrosis of the Tibia and Dislocation of the Knee, 150

### Leg-Length Discrepancy

- 4.32 Clinical Manifestations, 151
- 4.33 Evaluation of Leg-Length Discrepancy, 152

- 4.34 Charts for Timing Growth Arrest and Determining Amount of Limb Lengthening to Achieve Limb-Length Equality at Maturity, 153
- 4.35 Growth Arrest, 154
- 4.36 Ilizarov and De Bastiani Techniques for Limb Lengthening, 156

#### **Congenital Limb Malformation**

- 4.37 Growth Factors, 156
- 4.38 Foot Prehensility in Amelia, 157
- 4.39 Failure of Formation of Parts: Transverse Arrest, 158
- 4.40 Failure of Formation of Parts: Transverse Arrest (Continued), 159
- 4.41 Failure of Formation of Parts: Transverse Arrest (Continued), 160
- 4.42 Failure of Formation of Parts: Transverse Arrest (Continued), 161
- 4.43 Failure of Formation of Parts: Transverse Arrest (Continued), 162
- 4.44 Failure of Formation of Parts: Transverse Arrest (Continued), 163
- 4.45 Failure of Formation of Parts: Transverse Arrest (Continued), 164
- 4.46 Failure of Formation of Parts: Longitudinal Arrest, 165
- 4.47 Failure of Formation of Parts: Longitudinal Arrest (Continued), 166
- 4.48 Failure of Formation of Parts: Longitudinal Arrest (Continued), 167
- 4.49 Failure of Formation of Parts: Longitudinal Arrest (Continued), 168
- 4.50 Duplication of Parts, Overgrowth, and Congenital Constriction Band Syndrome, 169

### **SECTION 5 RHEUMATIC DISEASES**

#### **Rheumatic Diseases**

- 5.1 Joint Pathology in Rheumatoid Arthritis, 172
- 5.2 Early and Moderate Hand Involvement in Rheumatoid Arthritis, 173
- 5.3 Advanced Hand Involvement in Rheumatoid Arthritis, 174
- 5.4 Foot Involvement in Rheumatoid Arthritis, 175
- 5.5 Knee, Shoulder, and Hip Joint Involvement in Rheumatoid Arthritis, 176
- 5.6 Extraarticular Manifestations in Rheumatoid Arthritis, 177
- 5.7 Extraarticular Manifestations in Rheumatoid Arthritis (Continued), 178
- 5.8 Immunologic Features in Rheumatoid Arthritis, 179
- 5.9 Variable Clinical Course of Adult Rheumatoid Arthritis, 180

#### **Treatment of Rheumatoid Arthritis**

- 5.10 Exercises for Upper Extremities, 181
- 5.11 Exercises for Shoulders and Lower Extremities, 182
- 5.12 Surgical Management in Rheumatoid Arthritis, 183

#### **Synovial Fluid Examination**

- 5.13 Techniques for Aspiration of Joint Fluid, 184
- 5.14 Synovial Fluid Examination, 185
- 5.15 Synovial Fluid Examination (Continued), 186

#### **Juvenile Arthritis**

- 5.16 Systemic Juvenile Arthritis, 187
- 5.17 Systemic Juvenile Arthritis (Continued), 188
- 5.18 Hand Involvement in Juvenile Arthritis, 189
- 5.19 Lower Limb Involvement in Juvenile Arthritis, 190
- 5.20 Ocular Manifestations in Juvenile Arthritis, 191
- 5.21 Sequelae of Juvenile Arthritis, 192

#### **Osteoarthritis**

- 5.22 Distribution of Joint Involvement in Osteoarthritis, 193
- 5.23 Clinical Findings in Osteoarthritis, 194
- 5.24 Clinical Findings in Osteoarthritis (Continued), 195

- 5.25 Hand Involvement in Osteoarthritis, 196
- 5.26 Hip Joint Involvement in Osteoarthritis, 197
- 5.27 Degenerative Changes, 198
- 5.28 Spine Involvement in Osteoarthritis, 199

#### **Other**

- 5.29 Ankylosing Spondylitis, 200
- 5.30 Ankylosing Spondylitis (Continued), 201
- 5.31 Degenerative Changes in the Cervical Vertebrae, 202
- 5.32 Psoriatic Arthritis, 203
- 5.33 Psoriatic Arthritis (Continued), 204
- 5.34 Reactive Arthritis (formerly Reiter Syndrome), 205
- 5.35 Infectious Arthritis, 206
- 5.36 Tuberculous Arthritis, 207
- 5.37 Hemophilic Arthritis, 208
- 5.38 Neuropathic Joint Disease, 209
- 5.39 Gout and Gouty Arthritis, 210
- 5.40 Tophaceous Gout, 211
- 5.41 Calcium Pyrophosphate Deposition Disease (Pseudogout), 212
- 5.42 Nonarticular Rheumatism, 213
- 5.43 Clinical Manifestations of Polymyalgia Rheumatica and Giant Cell Arteritis, 214
- 5.44 Imaging of Polymyalgia Rheumatica and Giant Cell Arteritis, 215
- 5.45 Fibromyalgia, 216
- 5.46 Pathophysiology of Autoinflammatory Syndromes, 217
- 5.47 Cutaneous Findings in Autoinflammatory Syndromes, 218
- 5.48 Joint and Central Nervous System Findings in Autoinflammatory Syndromes, 219
- 5.49 Vasculitis: Vessel Distribution, 220
- 5.50 Vasculitis: Clinical and Histologic Features of Granulomatosis with Polyangiitis, 221
- 5.51 Key Clinical Features of Primary Vasculitic Diseases, 222
- 5.52 Renal Lesions in Systemic Lupus Erythematosus, 223
- 5.53 Cutaneous Lupus Band Test, 224
- 5.54 Lupus Erythematosus of the Heart, 225
- 5.55 Antiphospholipid Syndrome, 226
- 5.56 Scleroderma: Clinical Manifestations, 228
- 5.57 Scleroderma: Clinical Findings, 229
- 5.58 Scleroderma: Radiographic Findings of Acro-osteolysis and Calcinosis Cutis, 230
- 5.59 Polymyositis and Dermatomyositis, 231
- 5.60 Polymyositis and Dermatomyositis (Continued), 232
- 5.61 Primary Angiitis of the Central Nervous System, 233
- 5.62 Behçet Syndrome: Triad, 235
- 5.63 Behçet Syndrome: Positive Pathergy Test, 236

### **SECTION 6 TUMORS OF MUSCULOSKELETAL SYSTEM**

- 6.1 Initial Evaluation and Staging of Musculoskeletal Tumors, 238

#### **Benign Tumors of Bone**

- 6.2 Osteoid Osteoma, 239
- 6.3 Osteblastoma, 240
- 6.4 Enchondroma, 241
- 6.5 Periosteal Chondroma, 242
- 6.6 Osteocartilaginous Exostosis (Osteochondroma), 243
- 6.7 Chondroblastoma and Chondromyxoid Fibroma, 244
- 6.8 Fibrous Dysplasia, 245
- 6.9 Nonossifying Fibroma and Desmoplastic Fibroma, 246
- 6.10 Eosinophilic Granuloma, 247
- 6.11 Aneurysmal Bone Cyst, 248
- 6.12 Simple Bone Cyst, 249
- 6.13 Giant Cell Tumor of Bone, 250

#### **Malignant Tumors of Bone**

- 6.14 Osteosarcoma, 251
- 6.15 Osteosarcoma (Continued), 252
- 6.16 Osteosarcoma (Continued), 253

- 6.17 Chondrosarcoma, 254
- 6.18 Fibrous Histiocytoma and Fibrosarcoma of Bone, 255
- 6.19 Reticuloendothelial Tumors: Ewing Sarcoma, 256
- 6.20 Malignant Tumors of Bone: Adamantinoma, 257
- 6.21 Malignant Tumors of Bone: Plasmacytoma/Multiple Myeloma, 258
- 6.22 Tumors Metastatic to Bone, 259

#### **Benign Tumors of Soft Tissue**

- 6.23 Desmoid, Fibromatosis, and Hemangioma, 260
- 6.24 Lipoma, Neurofibroma, and Myositis Ossificans, 261

#### **Malignant Tumors of Soft Tissue**

- 6.25 Sarcomas of Soft Tissue, 262
- 6.26 Sarcomas of Soft Tissue (Continued), 263
- 6.27 Sarcomas of Soft Tissue (Continued), 264

#### **Procedures**

- 6.28 Tumor Biopsy, 265
- 6.29 Surgical Margins, 266
- 6.30 Reconstruction after Partial Excision or Curettage of Bone (Fracture Prophylaxis), 267
- 6.31 Limb-Salvage Procedures for Reconstruction, 268
- 6.32 Radiologic Findings in Limb-Salvage Procedures, 269
- 6.33 Limb-Salvage Procedures, 270

### **SECTION 7 INJURY TO MUSCULOSKELETAL SYSTEM**

- 7.1 Closed Soft Tissue Injuries, 272
- 7.2 Open Soft Tissue Wounds, 273
- 7.3 Treatment of Open Soft Tissue Wounds, 274
- 7.4 Pressure Ulcers, 275
- 7.5 Excision of Deep Pressure Ulcer, 276
- 7.6 Classification of Burns, 277
- 7.7 Causes and Clinical Types of Burns, 278
- 7.8 Escharotomy for Burns, 279
- 7.9 Prevention of Infection in Burn Wounds, 280
- 7.10 Metabolic and Systemic Effects of Burns, 281
- 7.11 Excision and Grafting for Burns, 282
- 7.12 Etiology of Compartment Syndrome, 283
- 7.13 Pathophysiology of Compartment and Crush Syndromes, 284
- 7.14 Acute Anterior Compartment Syndrome, 285
- 7.15 Measurement of Intracompartmental Pressure, 286
- 7.16 Incisions for Compartment Syndrome of Forearm and Hand, 287
- 7.17 Incisions for Compartment Syndrome of Leg, 288
- 7.18 Healing of Incised, Sutured Skin Wound, 289
- 7.19 Healing of Excised Skin Wound, 290
- 7.20 Types of Joint Injury, 291
- 7.21 Classification of Fracture, 292
- 7.22 Types of Displacement, 293
- 7.23 Types of Fracture, 294
- 7.24 Healing of Fracture, 295
- 7.25 Primary Union, 296
- 7.26 Factors That Promote or Delay Bone Healing, 297

### **SECTION 8 SOFT TISSUE INFECTIONS**

- 8.1 Septic Joint, 300
- 8.2 Etiology and Prevalence of Hematogenous Osteomyelitis, 301
- 8.3 Pathogenesis of Hematogenous Osteomyelitis, 302
- 8.4 Clinical Manifestations of Hematogenous Osteomyelitis, 303
- 8.5 Direct (Nonhematogenous) Causes of Osteomyelitis, 304
- 8.6 Direct (Nonhematogenous) Causes of Osteomyelitis (Continued), 305
- 8.7 Osteomyelitis after Open Fracture, 306
- 8.8 Recurrent Postoperative Osteomyelitis, 307
- 8.9 Delayed Posttraumatic Osteomyelitis in Diabetic Patient, 308

**SECTION 9 FRACTURE COMPLICATIONS**

- 9.1 Neurovascular Injury, 310
- 9.2 Acute Respiratory Distress Syndrome, 311
- 9.3 Infection, 312
- 9.4 Surgical Management of Open Fractures, 313
- 9.5 Gas Gangrene, 314
- 9.6 Implant Failure, 315
- 9.7 Malunion of Fracture, 316
- 9.8 Growth Deformity, 317
- 9.9 Posttraumatic Osteoarthritis, 318
- 9.10 Osteonecrosis, 319
- 9.11 Joint Stiffness, 320
- 9.12 Complex Regional Pain Syndrome, 321
- 9.13 Nonunion of Fracture, 322
- 9.14 Surgical Management of Nonunion, 323
- 9.15 Electric Stimulation of Bone Growth, 324
- 9.16 Noninvasive Coupling Methods of Electric Stimulation of Bone, 325
