<i>Introduction to Digital Platforms and Global Law: Work Plan</i>	vii
1 Digital platforms: protagonists of the self-age	1
1 What we talk about when we talk about digital platforms	1
2 Digital platforms facing the regulatory environment: the twenty European milestones	9
3 Digital platforms and the regulated competition	27
4 Digital platforms between data access and data protection	41
5 Digital platforms and democracy	50
6 Digital platforms, AI and ethical constraints	56
7 Digital platforms and the blockchain path	71
8 Current misunderstandings about digital platforms	82
2 Digital platforms as private transnational legal orders	84
1 Transnational companies and transnational law	84
2 Digital platforms as private transnational legal systems	89
3 The legislative, executive and judiciary powers of digital platforms: checks and balances	96
4 From payment systems to private currencies: the path forward	102
5 Digital platforms as private, sovereign transnational orders	105
3 Plurality of private transnational legal orders and relations with other legal systems	107
1 Private transnational legal orders and state orders	108
2 Private transnational orders and international law	114
3 Private transnational orders and transnational systems	116
4 Relationship between private transnational orders	116
4 Digital platforms as subjects of transnational and international law	118
1 Atypical decentralization, based on monistic theories	121

2	Proof of the pluralism of the orders, in dualist theories	122
3	The dualism between international (interstate) and interindividual law of Arangio-Ruiz	124
4	The correct subjective qualification of digital platforms	127
5	Digital platforms and global law	133
1	The global response to digital platforms: inadequacy of the regulatory matrix	134
2	A new matrix and its tools: from regulation to negotiation	137
3	New centrality of uniform law instruments	139
4	The global law of digital platforms: a new paradigm	141
