Wood as the natural environment of wood-decaying fungi	5
Influence of carbon dioxide on the germination of spores	7
The effect of carbon dioxide on the growth and morphology of the mycelium of wood-decomposing fungi	9
Selective effect of carbon dioxide on fungal population	16
The influence of carbon dioxide on the formation of fungal fruit bodies	16
Changes in the concentration of gaseous components of the air in wood decomposed by fungi	20
Effect of carbon dioxide and oxygen on the respiration of fungi	35
Following the activity of some extracellular enzymes of wood-decaying fungi cultivated in increased carbon dioxide concentration in the atmosphere	42
The effect of CO ₂ on the metabolic activities of fungi	44
Summary	47
Literature	49
