 Introduction	 1
 PART I	
The role of law in the rise of the global ecological crisis	9
 1 The Anthropocene as a frame of reference	 11
2 The human dilemma in the Anthropocene	22
3 Energy transitions in history and their impacts	28
4 How conceptual factors like law helped lead to the Anthropocene	42
 PART II	
The failure of environmental law to respect key ecological limits	63
 5 An overview of the failures of environmental law	 65
6 Key examples of the inadequacy of environmental law	73
 PART III	
Ecological law: systems-based rules for a flourishing Earth	91
 7 What is ecological law?	 93

x *Contents*

8	A mutually enhancing human-Earth relationship as the primary goal for law	97
9	The systems-based perspective underlying ecological law	108
10	The limits-insistent narrative and planetary boundaries	114
11	Eleven core features of ecological law	127
12	Ecological integrity and attachment to place in ecological law	152
 PART IV		
	Getting from environmental to ecological law	167
13	A systems-based guide for moving from environmental to ecological law	169
14	Overcoming ecological challenges of international trade: an illustration	183
 PART V		
	Degrowth and ecological law	225
15	The degrowth movement as a testing ground for ecological law	227
