Preface 5

1 Agility performance and its components 7

1.1 Reaction time 8

1.1.1 Measurement of reaction time 8

1.1.2 Factors affecting reaction time..... 15

1.2 Decision making..... 19

1.2.1 Anticipation..... 20

1.2.2 Measurement of coincidence-anticipation
timing accuracy 20

1.3 Movement speed..... 24

1.3.1 Measurement of movement time 25

1.3.2 Other tests of speed and frequency of movement..... 35

1.3.3 Change of direction speed and repeated sprint
ability tests 41

2 Agility testing 46

2.1 Agility time: choice reaction time plus movement time..... 49

2.1.1 Dealing with variables affecting agility time..... 52

2.1.2 Agility Index as a measurement tool based on stimuli
number and traveling distances 57

2.1.3 Differential contributions of reaction time
and movement velocity to the agility performance 63

2.1.4 The role of sensory processing and motor skill
performance in reactive agility..... 70

3 Sport-specific assessment of agility performance 74

3.1 Agility test adjustments..... 74

3.1.1 Number of contact mats..... 75

3.1.2 Distance between mats 78

3.1.3 Alignment of contact mats 80

3.1.4 Positioning of contact mats 84

3.1.5 Size of contact mats 87

4	The effect of exercise on agility performance.....	90
4.1	The effect of exercise of different intensity on agility time.....	90
4.2	The effect of exercise induced fatigue on neuromuscular performance.....	91
5	Agility competition	95
5.1	Agility time under simulated competitive and non-competitive conditions	95
5.2	The effect of agility training under simulated competitive and non-competitive conditions on agility time.....	100
6	Agility performance in subjects of different ages and performance levels.....	102
6.1	Age-related changes in agility performance	102
6.2	Agility performance in athletes of different sport specializations.....	108
7	Agility training	113
7.1	Acute agility adjustments.....	113
7.2	Chronic agility adaptations.....	115
	Concluding comments	129
	Appendix: Agility testing.....	131
	References	132
	About the authors.....	148
