MINT & BRIC

10
MINT vs. BRIC:
hydropower compared
Comparison highlights development paths, investment trends, and the role of hydropower in clean energy transitions

14
Fighting flood disinformation
How satellites helped stem the spread of disinformation during the August 2024 transboundary flooding in India and Bangladesh

Cybersecurity

16
Assessing threat levels
A look at collaborative warnings, global surveys and system vulnerabilities.

18
Protecting critical infrastructure
Spotlight on the Cybersecurity and Infrastructure Security Agency (CISA)

Small hydro

20
Hydro from waste water
Hydro turbine powers waste water treatment works

23
Into the vortex
Hydroelectric engineers tap into the power of vortices

Fish passage

24
A double-edged barrier
Recent research on fish passage strategies

28
Innovative fishway trial
A groundbreaking trial in Menindee, Australia will test Fishheart's cutting-edge fish passage technology, aiming to restore native fish migration in the Lower Darling-Baaka River

Civil engineering solution

30
The Path to Profitability
Advancements in Hydrodemolition

33
Grease-free turbine upgrade
Thordon Bearings makes its debut in Latin America

34
Cranes power infrastructure upgrades
Upgrades utilise cranes

36
Critical success
Helping resolve engineering project management challenges

38
Tunnelling technologies
Global infrastructure projects are benefiting from tunnelling technologies, including innovations in diamond drilling, trenchless pipe laying for grid expansion, and purpose-built excavators
