

D. Cirkl: Approaches to solving seating comfort problems using computational and experimental methods	7
P. Czubak, M. Klemiato: Resonance conveyor analysis	9
S. Chindada, L. Pešek: 3D FE numerical model study on friction induced vibration in pin on disk systems: stick slip phenomena	11
P. Chodkiewicz, R. Zalewski, J. Lengiewicz: Modeling and calibration of VPP dampers with the discrete element method	15
U. Ferdek, Ł. Łacny: Influence of impact on the chaotic vibrations of a rotor-stator system	19
D. Gabriel, J. Masák, L. Pešek, M. Mračko, I. Zolotarev, V. Bula, P. Šnábl, J. Souček, J. Snížek: Dynamic analysis of the data processing unit for the VIGIL mission	23
M. Gajowy: Verification of the energy method for determining transient resonance amplitudes	27
M. Hajžman, R. Bulín, M. Hrabačka, J. Rendl: On the friction modelling in joints of multibody systems	33
L. Kunat, E. Augustyn, D. Ziemianski: The impact of front axle suspension in agricultural tractors on the reduction of operator seat vibrations	35
Ł. Łacny, M. Prącik: On controlling rod tension in quasi-periodic mechanical structures	39
W. Łatas: Optimal vibroisolation of press subjected to polyharmonic excitation	41
S. Mazahir, L. Pešek: Modal analysis of a 3D-printed thick-walled cylinder: simulation and experimental validation	43
L. Pešek, C.S. Prasad, S. Chindada: Study of instability in two coupled subsystems due to falling friction characteristic	51
C.S. Prasad, X. Arnoult, L. Pešek: Study of bio-composites for superior damping, acoustic, mechanical, and physical characteristics	59

P. Procházka, C.S. Prasad, V. Skála: The design of a bypass tunnel to introduce radial flow component in the vicinity of the blade cascade	65
A. Rachwalska, G. Cieplik: Application of the liggghts program to model the motion of a vibrating conveyor taking into account the impact of the feed	69
D. Rodak: Damping properties of innovative torsion damper	73
P. Swacha: Ultrasonic fatigue testing procedure	77
P. Šnábl, L. Pešek, P. Procházka, C.S. Prasad, V. Skála, S. Chindada: Design and testing of flexible blade for aeroelastic experiments	79
E. Voronova, P. Procházka, M.L. Mekhalfia, D. Maturkanič, R. Hodbod': Experimental investigation of magnets properties	83
S. Wisniewski, D. Ziemianski: Alternative vehicle control methods for individuals with limited mobility	87
J. Zapoměl, J. Kozánek: Contactless damping of vertical rotors	91
