## **An Introduction to Exercise and Sport Physiology**

**1**

Focus of Exercise and Sport Physiology	2
Acute and Chronic Responses to Exercise	2
The Evolution of Exercise Physiology	3
Exercise Physiology in the 21st-Century	14
Research: Turning Curiosity Into Science	16

## **PART I Exercising Muscle**

**27**

### **1 Structure and Function of Exercising Muscle**

**29**

Anatomy of Skeletal Muscle	31
Muscle Fiber Contraction	36
Muscle Fiber Types	40
Skeletal Muscle and Exercise	46

### **2 Fuel for Exercise: Bioenergetics and Muscle Metabolism**

**55**

Energy Substrates	56
Controlling the Rate of Energy Production	58
Storing Energy: High-Energy Phosphates	60
The Basic Energy Systems	61
Interaction of the Energy Systems	73
The Crossover Concept	74
The Oxidative Capacity of Muscle	75

### **3 Neural Control of Exercising Muscle**

**79**

Structure and Function of the Nervous System	80
Central Nervous System	88
Peripheral Nervous System	91
Sensory-Motor Integration	92

### **4 Hormonal Control During Exercise**

**101**

The Endocrine System	102
Endocrine Glands and Their Hormones: An Overview	105
Hormonal Regulation of Metabolism During Exercise	109
Hormonal Regulation of Fluid and Electrolytes During Exercise	116
Hormonal Regulation of Caloric Intake	120
Growth Hormone and Testosterone	122

## PART II Energy Expenditure and Fatigue

125

### 5 Energy Expenditure

127

- Measuring Energy Expenditure 128
- Estimating Energy Expenditure 133
- Predicting Energy Expenditure 136
- Energy Expenditure at Rest and During Exercise 137

### 6 Fatigue, Muscle Soreness, and Muscle Cramps

149

- Fatigue and Its Causes 150
- Critical Power: The Link Between Energy Expenditure and Fatigue 159
- Muscle Soreness 160
- Exercise-Induced Muscle Cramps 165

## PART III Cardiovascular and Respiratory Function

169

### 7 The Cardiovascular System and Its Control

171

- The Heart 172
- The Vascular System 184
- Blood 191

### 8 The Respiratory System and Its Regulation

195

- Pulmonary Ventilation 196
- Pulmonary Volumes 199
- Pulmonary Diffusion 200
- Transport of Oxygen and Carbon Dioxide in the Blood 206
- Gas Exchange at the Muscles 209
- Regulation of Pulmonary Ventilation 211
- Afferent Feedback From Exercising Limbs 212
- Exercise Training and Respiratory Function 214

### 9 Cardiorespiratory Responses to Acute Exercise

219

- Cardiovascular Responses to Acute Exercise 220
- Respiratory Responses to Acute Exercise 235
- Recovery From Acute Exercise 242

## PART IV Exercise Training

245

### 10 Principles of Exercise Training

247

- Terminology 248
- General Principles of Training 250
- Resistance Training Programs 252
- Anaerobic and Aerobic Power Training Programs 258

## 11 Adaptations to Resistance Training 267

Resistance Training and Gains in Muscular Fitness 268

Mechanisms of Gains in Muscle Strength 268

Interaction Between Resistance Training and Diet 279

Resistance Training for Special Populations 281

## 12 Adaptations to Aerobic and Anaerobic Training 287

Adaptations to Aerobic Training 288

Adaptations to Anaerobic Training 314

Adaptations to High-Intensity Interval Training 316

Specificity of Training and Cross-Training 317

## 13 Prescription of Exercise for Health and Fitness 321

Health Benefits of Regular Physical Activity and Exercise 322

Exercise and Cognitive Function 323

Physical Activity Recommendations 324

Health Screening 326

Exercise Prescription 329

Sedentary Behavior 331

Monitoring Exercise Intensity 333

Exercise Programming 338

Exercise and Rehabilitation of People with Diseases 341

## PART V Environmental Influences on Performance 343

## 14 Exercise in Hot and Cold Environments 345

Body Temperature Regulation 346

Physiological Responses to Exercise in the Heat 352

Health Risks During Exercise in the Heat 358

Acclimation to Exercise in the Heat 362

Exercise in the Cold 365

Physiological Responses to Exercise in the Cold 369

Health Risks During Exercise in the Cold 371

## 15 Altitude, Hyperbaric Environments, and Microgravity 375

Environmental Conditions at Altitude 376

Physiological Responses to Acute Altitude Exposure 378

Exercise and Sport Performance at Altitude 383

Acclimation: Chronic Exposure to Altitude 386

Altitude: Optimizing Training and Performance 390

Health Risks of Acute Exposure to Altitude 393

Hyperbaric Environments 395

Microgravity 402

## PART VI Optimizing Performance in Sport 409

### 16 Training for Sport 411

- Optimizing Training 412
- Periodization of Training 414
- Overtraining 417
- Tapering for Peak Performance 424
- Detraining 426

### 17 Nutrition, Body Composition, and Obesity 433

- Classification of Nutrients 434
- Water and Electrolyte Balance 446
- Nutrition and Athletic Performance 452
- Assessing Body Composition 457
- Body Composition, Weight, and Sport Performance 461
- Obesity 464
- Weight Loss Management Guidelines 473
- Role of Physical Activity in Weight Management and Risk Reduction 476

### 18 Ergogenic Aids in Sport 481

- Researching Ergogenic Aids 483
- Ergogenic Aids with Established Evidence of Efficacy 486
- Ergogenic Aids with Emerging Evidence of Efficacy 495
- Prohibited Substances and Techniques 495

## PART VII Special Considerations in Sport, Exercise, and Physical Activity 513

### 19 Children and Adolescents in Sport and Exercise 515

- Growth, Development, and Maturation 516
- Physiological Responses to Acute Exercise 519
- Physiological Adaptations to Exercise Training 524
- Physical Activity Patterns Among Youth 526
- Physical Activity Recommendations for Children and Adolescents 530
- Sport Performance and Specialization 531
- Special Issues 533

### 20 Aging in Sport and Exercise 537

- Height, Weight, and Body Composition 538
- Physiological Responses to Acute Exercise 542
- Physiological Adaptations to Exercise Training 551
- Recommended Physical Activity 554
- Sport Performance 556
- Special Issues 559

<b>21</b>	<b>Sex Differences in Sport and Exercise</b>	<b>563</b>
	Sex Versus Gender in Exercise Physiology	564
	Body Size and Composition	565
	Physiological Responses to Acute Exercise	566
	Physiological Adaptations to Exercise Training	569
	Sport Performance	571
	Special Issues	573

<b>22</b>	<b>Cardiovascular Disease and Physical Activity</b>	<b>587</b>
	Prevalence of Cardiovascular Disease	588
	Forms of Cardiovascular Disease	589
	Understanding the Disease Process	592
	Cardiovascular Disease Risk	596
	Reducing Risk Through Physical Activity	599
	Risk of Heart Attack and Death During Exercise	603
	Exercise Training and Rehabilitation of Patients with Heart Disease	604

Common Physiology Abbreviations	607
Glossary	609
References	627
Index	647
About the Authors	660
