

Contents

<i>Preface</i>	<i>vi</i>
<i>Acknowledgments</i>	<i>vii</i>

1. CELL PHYSIOLOGY 1

- I. Cell Membranes 1
- II. Transport Across Cell Membranes 2
- III. Osmosis 4
- IV. Diffusion Potential, Resting Membrane Potential, and Action Potential 7
- V. Neuromuscular and Synaptic Transmission 12
- VI. Skeletal Muscle 16
- VII. Smooth Muscle 20
- VIII. Comparison of Skeletal Muscle, Smooth Muscle, and Cardiac Muscle 22

Review Test 23

2. NEUROPHYSIOLOGY 32

- I. Autonomic Nervous System (ANS) 32
- II. Sensory Systems 36
- III. Motor Systems 48
- IV. Higher Functions of the Cerebral Cortex 54
- V. Blood–Brain Barrier and Cerebrospinal Fluid (CSF) 55
- VI. Temperature Regulation 56

Review Test 58

3. CARDIOVASCULAR PHYSIOLOGY 66

- I. Circuitry of the Cardiovascular System 66
- II. Hemodynamics 66
- III. Cardiac Electrophysiology 71
- IV. Cardiac Muscle and Cardiac Output 76
- V. Cardiac Cycle 85

- VI. Regulation of Arterial Pressure 87
- VII. Microcirculation and Lymph 91
- VIII. Special Circulations 94
- IX. Integrative Functions of the Cardiovascular System: Gravity, Exercise, and Hemorrhage 97

Review Test 102

4. RESPIRATORY PHYSIOLOGY 115

- I. Lung Volumes and Capacities 115
- II. Mechanics of Breathing 117
- III. Gas Exchange 124
- IV. Oxygen Transport 126
- V. CO₂ Transport 131
- VI. Pulmonary Circulation 132
- VII. V/Q Defects 133
- VIII. Control of Breathing 135
- IX. Integrated Responses of the Respiratory System 137

Review Test 139

5. RENAL AND ACID–BASE PHYSIOLOGY 147

- I. Body Fluids 147
- II. Renal Clearance, Renal Blood Flow (RBF), and Glomerular Filtration Rate (GFR) 151
- III. Reabsorption and Secretion 155
- IV. NaCl Regulation 158
- V. K⁺ Regulation 163
- VI. Renal Regulation of Urea, Phosphate, Calcium, and Magnesium 166
- VII. Concentration and Dilution of Urine 167
- VIII. Renal Hormones 172
- IX. Acid–Base Balance 172
- X. Diuretics 181
- XI. Integrative Examples 181

Review Test 184

6. GASTROINTESTINAL PHYSIOLOGY 194

- I. Structure and Innervation of the Gastrointestinal Tract 194
- II. Regulatory Substances in the Gastrointestinal Tract 195
- III. Gastrointestinal Motility 199
- IV. Gastrointestinal Secretion 204
- V. Digestion and Absorption 214
- VI. Liver Physiology 219

Review Test 221

7. ENDOCRINE PHYSIOLOGY227

- I. Overview of Hormones 227
- II. Cell Mechanisms and Second Messengers 229
- III. Pituitary Gland (Hypophysis) 233
- IV. Thyroid Gland 238
- V. Adrenal Cortex and Adrenal Medulla 241
- VI. Endocrine Pancreas–Glucagon and Insulin 248
- VII. Calcium Metabolism (Parathyroid Hormone, Vitamin D, Calcitonin) 251
- VIII. Sexual Differentiation 255
- IX. Male Reproduction 256
- X. Female Reproduction 258

Review Test 263

1. CELL PHYSIOLOGY

Comprehensive Examination 271

Index 293

5. RENAL AND ACID–BASE PHYSIOLOGY

- I. Body Fluids, Starling Forces, and Osmolarity 141
- II. Renal Clearance, Renal Blood Flow (RBF), and Glomerular Filtration Rate (GFR) 151
- III. Reabsorption and Secretion 152
- IV. NaCl Regulation 158
- V. K⁺ Regulation 163
- VI. Renal Regulation of Urea, Phosphate, Calcium, and Magnesium 166
- VII. Concentration and Dilution of Urine 167
- VIII. Renal Hormones 172
- IX. Acid–Base Balance 172
- X. Diuretics 181
- XI. Integrative Examples 181
- Review Test 184

Review Test 58

6. GASTROINTESTINAL PHYSIOLOGY

3. CARDIOVASCULAR PHYSIOLOGY66

- I. Structure and Innervation of the Gastrointestinal Tract 192
- II. Regulatory Substances in the Gastrointestinal Tract 195
- III. Gastrointestinal Motility 199
- IV. Gastrointestinal Secretion 204
- V. Digestion and Absorption 214
- VI. Liver Physiology 219
- Review Test 221
