1	Historical Introduction	1
2	Normal Chromosomes	4
2.1	Introduction.....	4
2.2	Chromosome Number and Morphology.....	5
2.2.1	Non-Banding Techniques.....	5
2.2.2	Banding Techniques.....	5
2.2.3	X- and Y-Chromatin	7
2.3	Chromosome Band Nomenclature	7
2.3.1	Identification and Definition of Chromosome Landmarks, Regions and Bands.....	7
2.3.2	Designation of Regions, Bands and Subbands	8
2.4	High-Resolution Banding.....	9
2.5	Variation in Heterochromatic Segments, Satellite Stalks and Satellites.....	11
2.5.1	Variation in Length.....	11
2.5.2	Variation in Number and Position	12
2.6	Euchromatic Variants.....	12
2.6.1	Copy Number Variants and Structural Variants.....	13
2.6.2	Fragile Sites.....	13
3	Symbols and Abbreviated Terms	14
4	General Rules	18
4.1	Introduction.....	18
4.2	General Principles.....	19
4.2.1	Chromosome Abnormality Description Rules	20
4.3	Order of Cytogenomic Abnormalities.....	22
4.4	Nomenclature Rules.....	24
4.4.1	Spaces	24
4.4.2	Identification of Homologous Chromosomes.....	25
4.4.3	Number of Signals or Copies	25
4.4.4	Breakpoint Designation.....	25
4.4.5	Nucleotide Position.....	26
4.4.6	Gene Symbols	27
4.4.6.1	Gene Fusions.....	27
4.5	Clones, Mosaicism and Chimeras	27
4.5.1	Clones	27
4.5.2	Mosaicism and Chimerism	28
4.5.3	Nomenclature for Clones, Mosaics and Chimeras	28
4.6	Multiple Techniques	31
4.7	ISCN Formats	32
4.7.1	Karyotype Format.....	33
4.7.2	Microarray Format.....	34

5 Karyotype	35
5.1 General Principles	36
5.2 Normal Results	38
5.3 Numerical Abnormalities	38
5.3.1 Sex Chromosome Numerical Abnormalities	38
5.3.1.1 Constitutional	38
5.3.1.2 Neoplasia	39
5.3.2 Autosomal Numerical Abnormalities	40
5.4 Structural Abnormalities	40
5.4.1 Specification of Chromosomes and Breakpoints	40
5.4.2 Karyotype Format for Designating Structural Chromosome Abnormalities	42
5.4.2.1 Short System (Karyotype Format) for Designating Structural Chromosome Abnormalities	42
5.4.2.2 Detailed System (Karyotype Format) for Designating Structural Chromosome Abnormalities	42
5.4.3 Derivative and Recombinant Chromosomes	43
5.4.3.1 Derivative Chromosomes	43
5.4.3.2 Recombinant Chromosomes	45
5.5 Specification of Structural Rearrangements	46
5.5.1 Additional Material of Unknown Origin	47
5.5.2 Deletions	47
5.5.3 Derivative Chromosomes	48
5.5.4 Dicentric Chromosomes	54
5.5.5 Duplications	56
5.5.6 Fission	56
5.5.7 Fragile Sites	56
5.5.8 Homogeneously Staining Regions	57
5.5.9 Insertions	58
5.5.9.1 Insertions within a Chromosome	58
5.5.9.2 Insertions between Two Chromosomes	58
5.5.9.3 Complex Insertions	59
5.5.10 Inversions	60
5.5.11 Isochromosomes	60
5.5.12 Marker Chromosomes	61
5.5.13 Neocentromeres	63
5.5.14 Quadruplications	63
5.5.15 Recombinant Chromosomes	63
5.5.16 Ring Chromosomes	64
5.5.16.1 Ring Chromosomes Derived from One Chromosome	64
5.5.16.2 Ring Chromosomes Derived from More than One Chromosome	65
5.5.17 Telomeric Associations	66
5.5.18 Translocations	67
5.5.18.1 Reciprocal Translocations	67
5.5.18.1.1 Two-Break Rearrangements	67
5.5.18.1.2 Three-Break Rearrangements	68
5.5.18.1.3 Four-Break and More Complex Rearrangements	68

35	5.5.18.2	Whole-Arm Translocations	69
36	5.5.18.3	Robertsonian Translocations	70
38	5.5.18.4	Jumping Translocations.....	71
38	5.5.19	Tricentric Chromosomes.....	71
38	5.5.20	Triplications	71
39	5.6	Multiple Copies of Rearranged Chromosomes.....	72
40	5.7	Ploidy Anomalies	73
40	6	Neoplasia.....	75
40	6.1	Introduction.....	75
40	6.2	General Principles.....	76
42	6.3	Clones and Subclones	76
42	6.3.1	Clone Size	77
42	6.3.2	Order of Chromosome Abnormalities.....	78
43	6.3.3	Order of Clones.....	78
43	6.3.3.1	Cytogenetically Related Clones.....	78
45	6.3.3.2	Cytogenetically Unrelated Clones.....	79
46	6.3.3.3	Mixed Cytogenetically Related and Unrelated Clones	80
47	6.3.4	Clonal Evolution.....	81
47	6.3.5	Composite Karyotype.....	85
48	6.3.6	Incomplete Karyotype.....	88
54	6.3.7	Modal Number and Ploidy Levels.....	89
56	6.4	Constitutional Karyotype.....	91
56	6.5	Counting Chromosome Abnormalities	93
56	7	In situ Hybridization.....	96
57	7.1	Introduction.....	97
58	7.1.1.	General Principles and Rules	97
58	7.2	Prophase/Metaphase <i>in situ</i> Hybridization (ish)	98
59	7.2.1	Principles and Rules	98
60	7.2.2	Normal Signal Pattern.....	99
60	7.2.3	Abnormal Signal Pattern with a Single Probe.....	100
61	7.2.4	Abnormal Signal Pattern with Multiple Probes	102
63	7.2.5	Use of Diminished (dim) and Enhanced (enh) in Metaphase <i>in situ</i> Hybridization	105
63	7.2.6	Subtelomeric Metaphase <i>in situ</i> Hybridization	105
63	7.2.6.1	Normal Signal Pattern.....	106
64	7.2.6.2	Abnormal Signal Pattern	106
64	7.2.7	Multicolor Chromosome Painting	106
65	7.2.8	Partial Chromosome Painting	106
66	7.3	Interphase/Nuclear <i>in situ</i> Hybridization (nuc ish)	107
67	7.3.1	Principles and Rules	107
67	7.3.2	Normal Interphase Signal Pattern	108
68	7.3.3	Abnormal Interphase Signal Pattern	108
68	7.3.3.1	Order of Cell Lines and Clones in nuc ish.....	109
	7.3.4	Relative Position of Signals	111
	7.3.4.1	Adjacent Probes	111
	7.3.4.1.1	Normal Result	111

7.3.4.1.2	Abnormal Result.....	111
7.3.4.2	Dual-Fusion Probes.....	111
7.3.4.2.1	Normal Signal Pattern	111
7.3.4.2.2	Abnormal Signal Pattern	112
7.3.4.3	Break-Apart Probes.....	114
7.3.4.3.1	Normal Signal Pattern	114
7.3.4.3.2	Abnormal Signal Pattern	114
7.3.4.4	Tricolor Probes.....	115
7.3.4.4.1	Single Chromosome Normal Signal Pattern	115
7.3.4.4.2	Single Chromosome Abnormal Signal Pattern	116
7.3.4.4.3	Two or More Chromosomes Normal Signal Pattern.....	116
7.3.4.4.4	Two or More Chromosomes Abnormal Signal Pattern	116
7.4	Multiple Copies of the Same Gene in Neoplasia	117
7.5	Enumeration Probes.....	118
7.6	Mosaic and Chimera Signal Pattern	118
8	Microarray	119
8.1	Introduction.....	119
8.1.1	General Principles.....	119
8.2	Examples of Microarray Nomenclature.....	119
8.2.1	Normal Results.....	119
8.2.2	Abnormal Copy Number Results.....	119
8.2.3	Inheritance	119
8.2.4	Multiple Techniques	119
8.2.5	Mixed Cell Population and Uncertain Copy Number	119
8.2.6	Nomenclature Specific to Single Nucleotide Polymorphism (SNP) Microarray.....	119
8.2.7	Complex Array Results.....	119
8.2.7.1	Chromoanagenesis.....	119
8.2.7.1.1	Chromothripsis	119
8.2.7.1.2	Chromoanasythesis	119
8.3	Polar Bodies	119
8.3.1	Normal Polar Body Results	119
8.3.2	Abnormal Polar Bodies PB1	119
8.3.3	Abnormal Aneuploidy PB2.....	119
8.3.4	Abnormal Structural PB1.....	119
8.3.5	Abnormal Structural PB2.....	119
9	Genome Mapping	120
9.1	Introduction.....	120
9.2	General Principles.....	120
9.3	Nomenclature Rules.....	120
9.4	Nomenclature Examples.....	120
9.4.1	Normal Results.....	120
9.4.2	Abnormal Results.....	120
9.4.2.1	Aneuploidy of Whole Chromosomes or Chromosome Arms.....	120
9.4.2.2	Deletion	120
9.4.2.3	Duplication	120
9.4.2.4	Insertion.....	120

7.3.4.1.2	Abnormal Result.....	111
7.3.4.2	Dual-Fusion Probes.....	111
7.3.4.2.1	Normal Signal Pattern	111
7.3.4.2.2	Abnormal Signal Pattern	112
7.3.4.3	Break-Apart Probes.....	114
7.3.4.3.1	Normal Signal Pattern	114
7.3.4.3.2	Abnormal Signal Pattern	114
7.3.4.4	Tricolor Probes.....	115
7.3.4.4.1	Single Chromosome Normal Signal Pattern	115
7.3.4.4.2	Single Chromosome Abnormal Signal Pattern	116
7.3.4.4.3	Two or More Chromosomes Normal Signal Pattern.....	116
7.3.4.4.4	Two or More Chromosomes Abnormal Signal Pattern	116
7.4	Multiple Copies of the Same Gene in Neoplasia	117
7.5	Enumeration Probes	118
7.6	Mosaic and Chimera Signal Pattern	118
8	Microarray	121
8.1	Introduction	121
8.1.1	General Principles.....	122
8.2	Examples of Microarray Nomenclature	123
8.2.1	Normal Results.....	123
8.2.2	Abnormal Copy Number Results.....	123
8.2.3	Inheritance	125
8.2.4	Multiple Techniques	127
8.2.5	Mixed Cell Population and Uncertain Copy Number	129
8.2.6	Nomenclature Specific to Single Nucleotide Polymorphism (SNP) Microarray	131
8.2.7	Complex Array Results.....	134
8.2.7.1	Chromoanagenesis.....	136
8.2.7.1.1	Chromothripsis	137
8.2.7.1.2	Chromoanasythesis	137
8.3	Polar Bodies	138
8.3.1	Normal Polar Body Results	138
8.3.2	Abnormal Polar Bodies PB1	138
8.3.3	Abnormal Aneuploidy PB2.....	139
8.3.4	Abnormal Structural PB1.....	139
8.3.5	Abnormal Structural PB2.....	140
9	Genome Mapping	141
9.1	Introduction	142
9.2	General Principles	142
9.3	Nomenclature Rules	142
9.4	Nomenclature Examples	144
9.4.1	Normal Results.....	144
9.4.2	Abnormal Results.....	145
9.4.2.1	Aneuploidy of Whole Chromosomes or Chromosome Arms.....	145
9.4.2.2	Deletion	145
9.4.2.3	Duplication	148
9.4.2.4	Insertion.....	149

111	9.4.2.4.1 Intrachromosomal Insertion	150
111	9.4.2.4.2 Interchromosomal Insertion	150
111	9.4.2.5 Inversion and Translocation	151
112	9.4.2.6 Inheritance	153
114	9.4.2.7 Complex Genomes	154
114	9.4.2.7.1 Chromoanagenesis	155
114	9.4.2.7.1.1 Chromothripsis	155
115	9.4.2.7.1.2 Chromoanasythesis	157
