**Introduction: Rethinking Environmental Law**  
Endrius COCCIOLO, Jordi JARIA-MANZANO, Aitana DE LA VARGA-PASTOR  
and Maria MARQUES-BANQUE ..... 1

**PART I. CONNECTIVITY AND INTERSECTIONS**

**Linkages between Biodiversity and Climate Change: Twin Crises Need Twin Solutions**  
An CLIQUET..... 9

1. Introduction ..... 10

2. Biodiversity and Climate Crises: Interconnected and Mutually Reinforcing ..... 11

3. Linkages between Biodiversity and Climate Change in International Law: A One-Sided Love? ..... 13

4. May the Forest be with You ..... 28

5. Power to the Peatlands ..... 30

6. Strengthening the Linkages between Biodiversity and Climate Change ..... 32

7. Conclusion..... 39

**Biodiversity Protection in Transnational Value Chains**  
Carola GLINSKI ..... 41

1. Introduction: The Regulatory Challenge ..... 42

2. Regulatory Approaches: Overview..... 44

3. Intersections with Public International Law and Trade Law: Legality and Legitimacy through Consensus, Coherence and Participation ..... 47

4. Effectiveness of the Inclusion of Private Schemes ..... 52

5. Design of Interconnections ..... 55

6. Conclusion..... 61

**Exploring the Links between the World Health Organization Guidelines and the EU Air Quality Law: Scientific Authority and the Lawmaking Process**

|                                                                                                    |    |
|----------------------------------------------------------------------------------------------------|----|
| Camille BERTAUX .....                                                                              | 63 |
| 1. Introduction .....                                                                              | 64 |
| 2. WHO and the Environment: A Mutual Dependence.....                                               | 66 |
| 3. The Normative Powers of the WHO: A Variety of Instruments .....                                 | 68 |
| 4. Case Study: Interactions between WHO Air Quality Guidelines and Future EU Air Quality Law ..... | 75 |
| 5. Conclusion.....                                                                                 | 83 |

**EU Air Quality and Vehicles: An Incompatible Pair?**

|                                                               |     |
|---------------------------------------------------------------|-----|
| Jiri VODICKA .....                                            | 85  |
| 1. Introduction .....                                         | 86  |
| 2. Directive 2008/50 and Relevant Instruments .....           | 88  |
| 3. A Brief Introduction to Vehicle Emission Regulations ..... | 90  |
| 4. Synergies and Discords .....                               | 92  |
| 5. Conclusion.....                                            | 101 |

**The Energy Charter Treaty and its Implications for Preventing Plastics Production: Stirring the Plastic Soup?**

|                                                                        |     |
|------------------------------------------------------------------------|-----|
| Endrius COCCIOLO and Leonie REINS .....                                | 103 |
| 1. Introduction .....                                                  | 104 |
| 2. How the Plastic Industry Entrenches Fossil Fuel Lock-In .....       | 106 |
| 3. The Energy Charter Treaty and the UN Plastics Treaty Road Map ..... | 109 |
| 4. Earth System Law for the Transnational Regulation of Plastics.....  | 121 |
| 5. Conclusions .....                                                   | 124 |

**Power Purchase Agreements Affected by Unexpected Circumstances: A Contract Law Issue with Climate Consequences**

|                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------|-----|
| Gonzalo Vial FOURCADE .....                                                                                                      | 127 |
| 1. Introduction: A Problem in the Intersection between Climate Change and Contract Law .....                                     | 128 |
| 2. The Legal Discussion on Contracts Affected by Unexpected Circumstances.....                                                   | 130 |
| 3. The Relationship between Climate Change and Contracts Affected by Unexpected Circumstances .....                              | 133 |
| 4. Power Purchase Agreements Affected by Unexpected Circumstances: Illustrating Undesired Outcomes from Contract Law Rules ..... | 137 |

5. A Possible Way Forward to Address the Problem ..... 140

6. Conclusion..... 142

**Sustainability of Green Energy Production: A Comparative Perspective between Brazil and the United Kingdom**

Lissia Queiroz DE MENEZES and Tilak GINIGE..... 143

1. Introduction ..... 143

2. Green Hydrogen ..... 146

3. UK Policies and Regulations, and the Aim of a New Green Industrial Revolution ..... 148

4. Brazilian Legislation and Policies ..... 154

5. Conclusion ..... 158

**Fixing the Circular Economy: A Limited Right to Repair Faces Core Constraints from Voluntary Approaches and Private Law**

Alba Nogueira LÓPEZ..... 161

1. Introduction ..... 162

2. Methodology ..... 163

3. A Long Slow Path to the Right to Repair Proposal with Veto Power for the Regulatory Scrutiny Board ..... 164

4. How Comprehensive is the Legal Approach to Sustainable Products and Consumption? The Scope of the Right to Repair Proposal and the Full Harmonisation Approach ..... 166

5. Right to Repair or Information about Repairers?..... 169

6. Uneven Right to Repair Stemming from the Ecodesign Regulation Proposal ..... 175

7. Legal Intersections with Core EU Policies ..... 178

8. Conclusion..... 185

**The Relation between EU Chemicals, Product and Waste Legislation Governing Plastic Packaging and the Transition Towards a More Circular Plastic Packaging Chain in the EU**

Ida Mae DE WAAL ..... 187

1. Introduction ..... 188

2. Plastic Packaging and the Transition Towards a CE in the EU ..... 190

3. EU Chemicals, Product and Waste Legislation Governing Plastic Packaging in Light of the CE Transition ..... 192

4. Analysis: The Legal Framework Governing the Life Cycle of Plastic Packaging: In Line with the CE Transition? ..... 204

5. Conclusion..... 216

**Multi-Level Incentives for the Recovery of Valuable Resources  
from Biowaste: Balancing Competence for Circularity**

|                                                              |     |
|--------------------------------------------------------------|-----|
| Matija KAJIĆ .....                                           | 219 |
| 1. Introduction .....                                        | 220 |
| 2. Competence at the EU Level.....                           | 222 |
| 3. Competence at the Dutch National and Regional Level ..... | 227 |
| 4. Competence at the Municipal Level.....                    | 230 |
| 5. Conclusion.....                                           | 234 |

**PART II. CONFLICTS AND FRICTIONS**

**The Relationship between the Legal System and Technological Innovations  
in Freshwater Management: Understanding Potential Points of Friction**

|                                                                                             |     |
|---------------------------------------------------------------------------------------------|-----|
| Sophie MELCHERS.....                                                                        | 239 |
| 1. Introduction .....                                                                       | 240 |
| 2. Climate Adaptation and Circular Economy Goals Need Laws<br>and Policies .....            | 243 |
| 3. Climate Adaptation and Circular Economy Goals Require Technological<br>Innovations ..... | 249 |
| 4. The Potential Friction between the Legal System and Technological<br>Innovations .....   | 251 |
| 5. Conclusion.....                                                                          | 257 |

**Reducing Peat Oxidation and Greenhouse Gas Emissions in Dutch Peatlands:  
Bridging the Gap between Interconnected Environmental Challenges  
and the Fragmented Legal and Governance System**

|                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------|-----|
| Martijn VAN GILS .....                                                                                                       | 259 |
| 1. Introduction .....                                                                                                        | 260 |
| 2. Soil Subsidence, Peat Oxidation and GHG Emissions from Dutch<br>Peatlands .....                                           | 262 |
| 3. Legal Obligations to Reduce Peat Oxidation and GHG Emissions<br>from Peatlands.....                                       | 263 |
| 4. Measures to Reduce Peat Oxidation and GHG Emissions from<br>Peatlands .....                                               | 267 |
| 5. Responsibilities and Instruments of Public Authorities to Reduce<br>Peat Oxidation and GHG Emissions from Peatlands ..... | 268 |
| 6. The Gap between the Interconnected Environment and the Fragmented<br>Legal System, and how to Bridge it. ....             | 272 |
| 7. Conclusion.....                                                                                                           | 278 |

## Unveiling the Loophole of Compensatory Restoration after Damage in the EU

|                                                                  |     |
|------------------------------------------------------------------|-----|
| Francesca LEUCCI .....                                           | 281 |
| 1. Introduction .....                                            | 281 |
| 2. Compensatory Restoration in the EU .....                      | 282 |
| 3. Compensatory Restoration in the US .....                      | 283 |
| 4. Discussion .....                                              | 285 |
| 5. The Emergence of the Habitat Equivalency Analysis. ....       | 286 |
| 6. Equivalent Compensation of Environmental Losses or not? ..... | 287 |
| 7. The Practice of the HEA in the US. ....                       | 297 |
| 8. The Practice of the HEA in the EU. ....                       | 299 |
| 9. Conclusion. ....                                              | 301 |

## What are We Talking about when We Discuss the Rights of Future Generations in Climate Litigation?

|                                                                                                  |     |
|--------------------------------------------------------------------------------------------------|-----|
| Eva BALOUNOVÁ .....                                                                              | 303 |
| 1. Introduction .....                                                                            | 304 |
| 2. The Concept of Intergenerational Justice in (Positive) Law .....                              | 305 |
| 3. Intergenerational Justice in Climate Litigation. ....                                         | 308 |
| 4. Case Study: On Standing. ....                                                                 | 312 |
| 5. Case Study: On Merits. ....                                                                   | 316 |
| 6. Case Study: Sustainable Development as a Guarantee for the Rights of Future Generations. .... | 320 |
| 7. Conclusion. ....                                                                              | 322 |

## Uncertain Causation in Climate Change Liability Litigation

|                                                                                                |     |
|------------------------------------------------------------------------------------------------|-----|
| Albert RUDA-GONZALEZ .....                                                                     | 325 |
| 1. Introduction .....                                                                          | 325 |
| 2. Causal Uncertainty in Environmental Liability .....                                         | 328 |
| 3. Causation in Climate Change Litigation Cases: Pollution-Share Liability as a Panacea? ..... | 337 |
| 4. Conclusion. ....                                                                            | 342 |

|                     |     |
