

Contents

Volume 1

Part I Optical Transmission Systems and Networks	1
1 Introduction and History of Optical Transmission	3
Benjamin James Puttnam and Polina Bayvel	
2 Optical Fiber and the Fiber Channel	13
Cristian Antonelli	
3 Optical Transceivers	55
Nikolaos-Panteleimon Diamantopoulos and Hidetaka Nishi	
4 Optical Amplification	91
Pavel Peterka and Josef Vojtěch	
5 Digital Transmission Systems	143
Ruben S. Luis	
6 Optical Networks and Interconnects	165
Carmen Mas-Machuca, Lena Wosinska, Marco Ruffini, and Jiajia Chen	
7 Optical Switching Systems and Flex-Grid Technologies	199
Michela Svaluto Moreolo, Salvatore Spadaro, and Nicola Calabretta	
8 The Future of Optical Communications	237
Georg Rademacher	
Part II Applications of Access Networks	257
9 Optical Access Technologies for Next-Gen Mobile Applications	259
Jim Zou	

10	Radio Access Network Convergence	277
	Christina Lim and Chathurika Ranaweera	
11	Coherent Optics for Access Networks: From P2P to P2MP	309
	Mu Xu and Zhensheng Jia	
12	Quantum Key Distribution in Access Networks	359
	Jing Wang and Zhensheng Jia	
Part III	Millimeter-Wave and THz Propagation	381
13	Overview of MMW/THz Wireless Propagation	383
	Akihiko Hirata	
14	Millimeter-Wave Propagation of 5G Wireless Access	403
	Minseok Kim	
15	5G Wireless Access Experiment	437
	Satoshi Suyama	
16	Propagation of Millimeter-Wave Fixed Wireless Backhaul/Fronthaul	465
	Ralf-Peter Braun and Thomas Schneider	
17	THz Propagation Simulator	483
	Bo Kum Jung	
18	THz Propagation Experiment	501
	Ho-Jin Song	
Part IV	Millimeter-Wave and THz Systems	519
19	High-Capacity Millimeter-Wave Transmission System	521
	Eisaku Sasaki	
20	MMW Fronthaul and Backhaul System	545
	Atsushi Kanno	
21	Millimeter-Wave Wireless LAN and PAN	571
	Keitarou Kondou	
22	Airport Surveillance System	581
	Naruto Yonemoto	
23	UTC-PD-Based Tx for Communications and Advanced Measurements	613
	Guillaume Ducournau	
24	THz Communication for Non-terrestrial Networks	639
	Kazuhiko Tamesue and Takuro Sato	

25	THz Using CMOS Approach	661
	Patrick Reynaert, Ariane De Vroede, Gabriel Guimaraes, and Dragan Simic	
26	THz Nondestructive Imaging for Historical Arts	701
	Kaori Fukunaga	
Part V	Radio-over-Fiber (RoF)	731
27	RoF for Mobile Fronthaul	733
	Kazuki Tanaka	
28	RoF for Indoor Network	761
	Seung-Hyun Cho	
29	RoF for High-Speed Trains	787
	Pham Tien Dat and Atsushi Kanno	
Volume 2		
Part VI	Free-Space Optical Communication (FSO)	813
30	FSO Basics	815
	Farah Al-Sallami, Sujan Rajbhandari, and Yalçın Ata	
31	Lightwave Propagation in the Air	861
	Yoshihisa Takayama	
32	FSO for Future Broadband Access Networks	885
	Isiaka A. Alimi and Paulo P. Monteiro	
33	High-Capacity Coherent FSO	913
	Marco A. Fernandes, Gil M. Fernandes, Paulo P. Monteiro, and Fernando P. Guiomar	
34	Optical Satellite Communications: Design Considerations and Research Outlook	945
	C. Willem Korevaar	
35	FSO and Optical Networks	963
	Yibeltal Chanie Manie, Cheng-Kai Yao, and Peng-Chun Peng	
36	RF/FSO and THz/FSO Relaying Systems	995
	Isiaka A. Alimi and Paulo P. Monteiro	
37	Underwater Visible Light Communication (UVLC)	1021
	Mohammed Elamassie, Callum Geldard, and Wasiu Popoola	

38	Visible Light Communication (VLC) Basics	1057
	Wasiu Popoola, Tilahun Zerihun Gutema, and Mohammed Elamassie	
39	Optical Wireless Power Transmission	1093
	Tomoyuki Miyamoto	
Part VII Regulatory Aspects		1121
40	Standardization of Wireless Fronthaul and Backhaul Using Passive Optical Network	1123
	Frank Effenberger and Yuanqiu Luo	
41	Spectrum and Standardization for THz Communications	1141
	Thomas Kürner and Iwao Hosako	
42	Standardization of Radio-over-Fiber Systems	1165
	Toshiaki Kuri	
Part VIII Visualization of Electromagnetic Waves		1203
43	Electro-optic and Magneto-optic Nonintrusive Field Sensing Technologies	1205
	Dong Ho Wu	
44	EO Sensing for 5G Antenna Characterization	1257
	Dong-Joon Lee and Young-Pyo Hong	
45	Millimeter-Wave and THz-Wave Visualization	1283
	Shintaro Hisatake	
46	Magnetic Field Visualization	1317
	Kazushi Ishiyama	
47	Antenna Measurement	1327
	Satoru Kurokawa	
Part IX Advanced Devices		1375
48	Advanced Monolithic and Heterogeneous Photonic Integration Technology	1377
	Atsushi Matsumoto and Naokatsu Yamamoto	
49	III–V on Silicon Integrated Optical Devices	1411
	Koji Takeda	
50	Introduction and History of Quantum Dot Lasers	1435
	Kouichi Akahane	
51	Semiconductor Optical Amplifiers	1453
	Romain Brenot	

52	High-Speed Photo-Diode with Advanced Driver/Control Circuits	1491
	Toshimasa Umezawa	
53	Antenna-Integrated EOM	1529
	Hiroshi Murata	
54	Gap-Embedded Patch-Antenna EOM	1555
	Yusuf Nur Wijayanto	
55	Semiconductor FACQW (Five-Layer Asymmetric Coupled Quantum Well) EOM	1609
	Taro Arakawa and Yusuke Miyazeki	
56	Optical Vector Modulation Using Laser Direct Modulation and Electro-absorption Modulator	1649
	Ukrit Mankong and Keizo Inagaki	
	Index	1695
