<i>Contributors</i>	<i>xiii</i>
<i>Foreword</i>	<i>xxv</i>
<i>Preface</i>	<i>xxvii</i>

Part I: Genetics, molecular and cellular biology

1. The neuron navigator 2 gene and Alzheimer's disease	3
Chun Xu, Brenda Bin Su, Stephanie Lozano <i>and</i> Kesheng Wang	
2. Interlinking polymorphisms, estrogens, and Alzheimer disease	25
Lu Hua Chen, Leung Wing Chu <i>and</i> You-Qiang Song	
3. Linking EEGs, Alzheimer disease, and the phosphatidylinositol-binding clathrin assembly protein (PICALM) gene	41
Natalya Ponomareva, Tatiana Andreeva, Vitaly Fokin, Sergey Illarionov <i>and</i> Evgeny Rogaev	
4. CD36 gene polymorphisms and Alzheimer's disease	57
Omar Šerý, Nandu Goswami <i>and</i> Vladimir J. Balcar	
5. Genetic contributions to sporadic frontotemporal dementia	71
Jessie S. Carr, Daniel W. Sirkis <i>and</i> Jennifer S. Yokoyama	
6. Clinical response to cholinesterase inhibitors in dementia: the role of CYP2D6 and APOE genetic polymorphisms	89
Luís Felipe José Ravic de Miranda, Karina Braga Gomes <i>and</i> Paulo Caramelli	
7. A1 and A2 purinergic receptor expression in dementia	103
J. Mendiola-Precoma, L.C. Berumen, A. Rodríguez-Cruz <i>and</i> G. García-Alcocer	
8. Molecular aspects of metallothioneins in dementias	115
Gemma Comes, Anna Escrig, Yasmina Manso, Olaya Fernández-Gayol, Paula Sanchis, Amalia Molinero, Mercedes Giralt, Javier Carrasco <i>and</i> Juan Hidalgo	

9. Implication of microRNAs in Alzheimer's disease pathogenesis	131
Katarzyn Marta Zoltowska, Katarzyna Laskowska-Kaszub, Siranjeevi Nagaraj <i>and</i> Urszula Wojda	
10. Role of cellular oxidative stress in dementia	147
Giovanna Galliciotti, Antonella De Jaco, Diego Sepulveda-Falla, Emanuela D'Acunto <i>and</i> Elena Miranda	
11. Toward an integrative understanding of the neuroinflammatory molecular milieu in Alzheimer disease neurodegeneration	163
Juan M. Zolezzi, Paulina Villaseca <i>and</i> Nibaldo C. Inestrosa	
12. Wnt signaling and dementia	177
Carolina Alquézar <i>and</i> Ángeles Martín-Requero	
13. Linkage of atypical protein kinase C to Alzheimer disease	195
Robert V. Farese <i>and</i> Mini P. Sajan	
14. Linking histone deacetylases and phosphodiesterase 5 in novel treatments for Alzheimer's disease	213
Ana Garcia-Osta <i>and</i> Mar Cuadrado-Tejedor	
15. Nuclear factor erythroid 2-related factor 2 in Alzheimer's disease	227
Kelsey E. Murphy <i>and</i> Joshua J. Park	
16. Implications of alpha- and beta-secretase expression and function in Alzheimer's disease	245
Sven Reinhardt <i>and</i> Kristina Endres	
17. Methylation analysis of DNA in Alzheimer's disease	261
Fabio Coppedè	
18. The signalosome malfunctions in age-associated neuropathologies	275
Ricardo Puertas-Avendaño, David Quinto-Aleman, Miriam González-Gómez <i>and</i> Raquel Marin	
19. FAM3C in Alzheimer's disease: a risk-related molecule and potential therapeutic target	293
Masaki Nishimura, Naoki Watanabe, Emi Hibino, Masaki Nakano, Yachiyo Mitsuishi, Lei Liu <i>and</i> Takuma Sugi	

20. Amylin and amylin receptors in Alzheimer's disease	309
Wen Fu <i>and</i> Jack H. Jhamandas	
21. Mammalian target of rapamycin complexes: regulation and Alzheimer's disease	325
Henry Querfurth <i>and</i> Han-Kyu Lee	
22. Mammalian target of rapamycin complexes: protein synthesis and autophagy, Parkinson's disease, amyotrophic lateral sclerosis, and frontotemporal dementia	343
Henry Querfurth <i>and</i> Han-Kyu Lee	
23. Linking CD200 in brains and dementia: molecular aspects of neuroinflammation	357
Douglas Gordon Walker	

Part II: Neurological, physiological and imaging

24. Hippocampal atrophy associated with dementia risk factors and dementia	373
Hiroshi Yao, Yuko Araki, Fumio Yamashita, Makoto Sasaki <i>and</i> Manabu Hashimoto	
25. Inflammation and insulin resistance in Alzheimer's disease: partners in crime	389
Yuval Nash <i>and</i> Dan Frenkel	
26. Brain susceptibility to hypoxia/hypoxemia and metabolic dysfunction in Alzheimer's disease: insights from animal and in vitro models	407
Vito Antonio Baldassarro, Andrea Bighinati, Michele Sannia, Luciana Giardino <i>and</i> Laura Calzà	
27. Neuropeptides and neurolipids: what they are and how they relate to Alzheimer's disease	423
Iván Manuel, Laura Lombardero, Alberto Llorente-Ovejero <i>and</i> Rafael Rodríguez-Puertas	
28. Neurotransmitter receptors in Alzheimer's disease: from glutamatergic to cholinergic receptors	441
Laura Lombardero, Alberto Llorente-Ovejero, Iván Manuel <i>and</i> Rafael Rodríguez-Puertas	

29. Aβ42-α7-like nicotinic acetylcholine receptors and Alzheimer's disease	457
Hoau-Yan Wang <i>and</i> Amber Khan	
30. Synaptosomal bioenergetic defects in Alzheimer's disease	473
Pamela V. Martino Adami <i>and</i> Laura Morelli	
31. Limitations of amyloid imaging in Alzheimer's disease	491
David Weidman	
32. Linking gradient echo plural contrast imaging metrics of tissue microstructure with Alzheimer disease	507
Dmitriy A. Yablonskiy, Tammie L. Benzinger <i>and</i> John C. Morris	
33. Hypertensive disorders during pregnancy and later dementia: is there a connection?	521
Ellika Andolf	
34. Unraveling the contributions of sleep dysfunction to Alzheimer's disease	539
Elie Gottlieb, Natalie A. Grima, Mark Howard, Amy Brodtmann <i>and</i> Matthew P. Pase	

Part III: Behaviour and psychopathology

35. Overview of behaviors in dementia	555
Dorothy M. Grillo <i>and</i> Rachel Anderson	
36. Delirium superimposed on dementia: a clinical challenge from diagnosis to treatment	569
Morandi Alessandro, Pozzi Christian, Grossi Eleonora <i>and</i> Bellelli Giuseppe	
37. Self-consciousness deficits in dementia	583
Eva M. Arroyo-Anlló <i>and</i> Roger Gil	
38. Attentional impairments to novel images in dementia	597
Celina S. Liu, Michael Rosen, Nathan Herrmann <i>and</i> Krista L. Lanctôt	
39. Frontal lobe syndrome and dementias	617
Petronilla Battista, Chiara Griseta, Rosa Capozzo, Madia Lozupone, Rodolfo Sardone, Francesco Panza <i>and</i> Giancarlo Logroscino	

40. The stigma of dementia	633
Albert Aboseif <i>and</i> Benjamin K.P. Woo	
41. Delusions in dementias	647
Madia Lozupone, Maddalena La Montagna, Antonello Bellomo, Petronilla Battista, Davide Seripa, Antonio Daniele, Antonio Greco, Onofrio Resta, Giancarlo Logroscino <i>and</i> Francesco Panza	
42. Linking motor speech function and dementia	665
Matthew L. Poole <i>and</i> Adam P. Vogel	
43. Spatial navigation and Alzheimer's disease	677
Laura E. Berkowitz, Ryan E. Harvey <i>and</i> Benjamin J. Clark	
44. Violence and dementia	693
G. Cipriani, S. Danti, A. Nuti, L. Picchi <i>and</i> M. Di Fiorino	
45. Factors contributing to protection and vulnerability in dementia caregivers	709
Fan Zhang, Sheung-Tak Cheng <i>and</i> Manuel Gonçalves-Pereira	

Part IV: Diet, nutrition and environment

46. Nutritional status of dementia and management using dietary taurine supplementation	725
Mi Ae Bae <i>and</i> Kyung Ja Chang	
47. Selenium and Alzheimer's disease	739
Adriana Gisele Hertzog da Silva Leme <i>and</i> Barbara R. Cardoso	
48. Linking adiponectin and obesity in dementia	749
Małgorzata Bednarska-Makaruk	
49. The impact of the gut microbiome in Alzheimer's disease: cause or consequence?	769
Malena dos Santos Guilherme <i>and</i> Kristina Endres	
50. (-)-Epigallocatechin-3-gallate and Alzheimer's disease	783
Laura Xicota <i>and</i> Rafael de la Torre	

51. Lead, cadmium and Alzheimer's disease **813**

Kelly M. Bakulski, Howard Hu *and* Sung Kyun Park

Part V: Models and modelling in dementia

52. Alzheimer model 5xfad mice and applications to dementia: transgenic mouse models, a focus on neuroinflammation, microglia, and food-derived components **833**

Tatsuhiro Ayabe *and* Yasuhisa Ano

53. Use of 192 IgG-saporin as a model of dementia and its application **849**

J.W. Chang *and* Y.S. Park

54. Amyloid beta 1—42-induced animal model of dementia: a review **865**

Josiane Budni *and* Jade de Oliveira

55. Resources for the neuroscience of dementia **881**

Rajkumar Rajendram *and* Victor R. Preedy

Index **897**
