

Contents

1	Digital Phenotyping and Mobile Sensing in Psychoinformatics—A Rapidly Evolving Interdisciplinary Research Endeavor	1
	Harald Baumeister and Christian Montag	
Part I Privacy and Ethics		
2	Privacy in Mobile Sensing	13
	Frank Kargl, Rens W. van der Heijden, Benjamin Erb, and Christoph Bösch	
3	Ethical Considerations of Digital Phenotyping from the Perspective of a Healthcare Practitioner Including Updates	25
	Paul Dagum and Christian Montag	
Part II Applications in Psycho-Social Sciences		
4	Computerized Facial Emotion Expression Recognition	43
	Mattis Geiger and Oliver Wilhelm	
5	An Overview on Doing Psychodiagnostics in Personality Psychology and Tracking Physical Activity via Smartphones Including Updates	57
	Rayna Sariyska and Christian Montag	
6	Smartphones in Personal Informatics: A Framework for Self-Tracking Research with Mobile Sensing	77
	Sumer S. Vaid and Gabriella M. Harari	
7	Digital Brain Biomarkers of Human Cognition and Mood	105
	Paul Dagum	

8	Mining Facebook Data for Personality Prediction: An Overview	121
	Davide Marengo and Michele Settanni	
9	Orderliness of Campus Lifestyle Predicts Academic Performance: A Case Study in Chinese University	137
	Yi Cao, Jian Gao, and Tao Zhou	
10	From Outside In: Profiling, Persuasion and Political Opinion in the Age of Big Data	151
	Saurabh Dhawan and Simon Hegelich	
11	A Practical Guide to WhatsApp Data in Social Science Research	171
	Julian Kohne, Jon D. Elhai, and Christian Montag	
Part III Applications in Health Sciences		
12	Latest Advances in Computational Speech Analysis for Mobile Sensing	209
	Nicholas Cummins and Björn W. Schuller	
13	Passive Sensing of Affective and Cognitive Functioning in Mood Disorders by Analyzing Keystroke Kinematics and Speech Dynamics	229
	Faraz Hussain, Jonathan P. Stange, Scott A. Langenecker, Melvin G. McInnis, John Zulueta, Andrea Piscitello, Mindy K. Ross, Alexander P. Demos, Claudia Vesel, Homa Rashidisabet, Bokai Cao, He Huang, Philip S. Yu, Peter Nelson, Olusola A. Ajilore, and Alex Leow	
14	Studying Psychopathology in Relation to Smartphone Use: From Self-reports to Objectively Measured Smartphone Use Behavior	259
	Dmitri Rozgonjuk, Jon D. Elhai, and Brian J. Hall	
15	Connecting Domains—Ecological Momentary Assessment in a Mobile Sensing Framework	277
	Thomas Kubiak and Joshua M. Smyth	
16	Momentary Assessment of Tinnitus—How Smart Mobile Applications Advance Our Understanding of Tinnitus	285
	Winfried Schlee, Robin Kraft, Johannes Schobel, Berthold Langguth, Thomas Probst, Matheus P. C. G. Lourenco, Jorge Simoes, Patrick Neff, Ronny Hannemann, Manfred Reichert, and Rüdiger Pryss	

17	Mobile Crowdsensing in Healthcare Scenarios: Taxonomy, Conceptual Pillars, Smart Mobile Crowdsensing Services	305
	Rüdiger Pryss	
18	mHealth Applications: Potentials, Limitations, Current Quality and Future Directions	321
	Eva-Maria Messner, Thomas Probst, Teresa O'Rourke, Stoyan Stoyanov, and Harald Baumeister	
19	Using Chatbots to Support Medical and Psychological Treatment Procedures Challenges, Opportunities, Technologies, Reference Architecture	335
	Rüdiger Pryss, Robin Kraft, Harald Baumeister, Jens Winkler, Thomas Probst, Manfred Reichert, Berthold Langguth, Myra Spiliopoulou, and Winfried Schlee	
20	Persuasive e-Health Design for Behavior Change	347
	Harald Baumeister, Robin Kraft, Amit Baumel, Rüdiger Pryss, and Eva-Maria Messner	
21	Optimizing mHealth Interventions with a Bandit	365
	Mashfiqui Rabbi, Predrag Klasnja, Tanzeem Choudhury, Ambuj Tewari, and Susan Murphy	
22	Parkinsonism and Digital Measurement	379
	Salil Patel, Maksymilian Brzezicki, Zi H. Su, James J. FitzGerald, and Chrystalina A. Antoniadou	
23	Smart Sensors for Health Research and Improvement	395
	Patricia Garatva, Yannik Terhorst, Eva-Maria Messner, Walter Karlen, Rüdiger Pryss, and Harald Baumeister	
24	Smart Sensing Enhanced Diagnostic Expert Systems	413
	Yannik Terhorst, Johannes Knauer, and Harald Baumeister	
25	Ecological Momentary Interventions in Public Mental Health Provision	427
	Julia C. C. Schulte-Strathaus, Christian Rauschenberg, Harald Baumeister, and Ulrich Reininghaus	
Part IV Key Concepts		
26	Defining Big Data	443
	Andrea De Mauro	
27	Defining Ecological Momentary Assessment	447
	Ulrich W. Ebner-Priemer	
28	Defining Artificial Intelligence	451
	Felix Lindner	

29	Defining Machine Learning	455
	Simon Hegelich	
30	Defining Privacy	461
	Frank Kargl, Benjamin Erb, and Christoph Bösch	
31	Defining Digital Biomarkers	465
	Christian Montag, Jon D. Elhai, and Paul Dagum
