
Table of Contents

Section I: Bioavailability

Chapter 1
Coal Fly Ash Application to Soils and its Effect on Boron Availability to Plants 3
Theodora Matsi and Christos Tsadilas

Chapter 2
Bioavailability of Trace Elements in Relation to Root Modification in the Rhizosphere 25
Ioannis K. Mitsios and Nicholas G. Danalatos

Chapter 3
Availability of Heavy Metals Applied to Soil through Sewage Sludge 39
V. Antoniadis, Christos Tsadilas, V. Samaras, and J. Sgouras

Chapter 4
Influence of Fly Ash Application on Heavy Metal Forms and Their Availability 63
Christos Tsadilas, E. Tsantila, S. Stamatiadis, V. Antoniadis, and V. Samaras

Chapter 5
Arsenic Concentration and Bioavailability in Soils as a Function of Soil Properties:
a Florida Case Study 77
Dibyendu Sarkar and Rupali Datta

Section II: Biogeochemistry

Chapter 6
Solubility, Mobility, and Bioaccumulation of Trace Elements: Abiotic Processes
in the Rhizosphere 97
Brett Robinson, Nanthi Bolan, Santiago Mahimairaja, and Brent Clothier

Chapter 7
Appraisal of Fluoride Contamination of Groundwater through Multivariate Analysis:
Case Study 111
S. Tripathy, M.K. Panigrahi, and N. Kundu

Chapter 8
Geochemical Processes Governing Trace Elements in CBNG-Produced Water 125
K.J. Reddy, Q.D. Skinner, and B.H. Hulin

Chapter 9

- Temporal Trends of Inorganic Elements in Kentucky Lake Sediments 147
Bommanna G. Loganathan, Clark Alexander, I-Lun Chien, and Kenneth S. Sajwan

Chapter 10

- Chemical Association of Trace Elements in Soils Amended with Biosolids:
Comparison of Two Biosolids 155
Kenneth S. Sajwan, S. Paramasivam, A.K. Alva, and J. Afolabi

Section III: Biotechnology

Chapter 11

- Microbial Genomics as an Integrated Tool for Developing Biosensors for Toxic Trace
Elements in the Environment..... 169
Ranadhir Chakraborty and Pradosh Roy

Chapter 12

- Arbuscular Mycorrhizal Fungi and Heavy Metals: Tolerance Mechanisms and
Potential Use in Bioremediation..... 211
*Ma. del Carmen Angeles González Chávez, Jaco Vangronsveld, Jan Colpaert,
and Corinne Leyval*

Chapter 13

- Role of Arbuscular Mycorrhiza and Associated Microorganisms in Phytoremediation of
Heavy Metal-Polluted Sites235
K. Turnau, A. Jurkiewicz, G. Lingua, J.M. Barea, and V. Gianinazzi-Pearson

Chapter 14

- Plant Metallothionein Genes and Genetic Engineering for the Cleanup of Toxic
Trace Elements..... 253
M.N.V. Prasad

Chapter 15

- “Metallomics” — a Multidisciplinary Metal-Assisted Functional Biogeochemistry:
Scope and Limitations 271
M.N.V. Prasad

Chapter 16

- Detoxification/Defense Mechanisms in Metal-Exposed Plants 291
B.P. Shaw, M.N.V. Prasad, V.K. Jha, and B.B. Sahu

Chapter 17

- Bacterial Biosorption of Trace Elements 325
Kyoung-Woong Kim and So-Young Kang

Chapter 18

Electroremediation of Heavy Metal-Contaminated Soils — Processes and Applications..... 341

Alexandra B. Ribeiro and Jose M. Rodríguez-Maroto

Chapter 19

Application of Novel Nanoporous Sorbents for the Removal of Heavy Metals, Metalloids, and Radionuclides..... 369

Shas V. Mattigod, Glen E. Fryxell, Kent E. Parker, and Yuehe Lin

Section IV: Bioremediation

Chapter 20

Phytoremediation Technologies Using Trees 383

I.D. Pulford and N.M. Dickinson

Chapter 21

Stabilization, Remediation, and Integrated Management of Metal-Contaminated Ecosystems by Grasses (Poaceae) 405

M.N.V. Prasad

Chapter 22

Physiology of Lead Accumulation and Tolerance in a Lead-Accumulating Plant (*Sesbania drummondii*) 425

Nilesh Sharma and Shivendra Sahi

Chapter 23

Temperate Weeds in Russia: Sentinels for Monitoring Trace Element Pollution and Possible Application in Phytoremediation..... 439

D.I. Bashmakov, A.S. Lukatkin, and M.N.V. Prasad

Chapter 24

Biogeochemical Cycling of Trace Elements by Aquatic and Wetland Plants: Relevance to Phytoremediation 451

M.N.V. Prasad, Maria Greger, and P. Aravind

Chapter 25

Metal-Tolerant Plants: Biodiversity Prospecting for Phytoremediation Technology 483

M.N.V. Prasad and H. Freitas

Chapter 26

Trace Elements in Plants and Soils of Abandoned Mines in Portugal: Significance for Phytomanagement and Biogeochemical Prospecting..... 507

M.N.V. Prasad, J. Pratas, and H. Freitas

Chapter 27	
Plants That Accumulate and/or Exclude Toxic Trace Elements Play an Important Role in Phytoremediation	523
<i>M.N.V. Prasad</i>	
Chapter 28	
Phytoremediation of Trace Element Contaminated Soil with Cereal Crops: Role of Fertilizers and Bacteria on Bioavailability	549
<i>Irina Shtangeeva</i>	
Chapter 29	
Phytomanagement of Radioactively Contaminated Sites.....	583
<i>H. Vandenhove</i>	
Chapter 30	
Efficiency and Limitations of Phytoextraction by High Biomass Plants: The Example of Willows	611
<i>Catherine Keller</i>	
Section V: Risk Assessment	
Chapter 31	
Risk Assessment, Pathways, and Trace Element Toxicity of Sewage Sludge-Amended Agroforestry and Soils	633
<i>K. Chandra Sekhar and M.N.V. Prasad</i>	
Chapter 32	
Trophic Transfer of Trace Elements and Associated Human Health Effects.....	659
<i>Amit Love and C.R. Babu</i>	
Chapter 33	
Trace Metal Accumulation, Movement, and Remediation in Soils Receiving Animal Manure	689
<i>Karamat R. Sistani and Jeffrey M. Novak</i>	
Subject Index	707
Biodiversity Index	717
