

Contents

1	Overview	1
1.1	Foreign Compounds That Humans Expose	2
1.2	Metabolic Reactions of Foreign Compounds	2
1.3	Activation Enzymes	2
1.4	Detoxification Enzymes	2
1.5	Reactive Metabolic intermediates	3
1.6	Oxidative Stress, Electrophiles, and Free Radicals	3
1.7	Lifestyle Modifications	3
1.8	Metabolic Intermediate-Induced Cell Toxicities	4
1.9	Genetic Polymorphism of Metabolic Enzymes	4
1.10	Defenses Against Metabolic Intermediates	4
1.10.1	Inducibility of Metabolic Enzymes	4
1.10.2	Diversified Classes of Enzyme Modulators	5
1.10.3	Induction and Inhibition Compound	5
1.11	Defense Mechanisms: Nrf2-ARE Pathway	5
1.12	Health Effects of Metabolic Intermediates	5
1.13	Induction of Metabolic Enzymes for Health Benefits	6
1.14	Dietary Effects on Metabolic Enzymes	6
	Bibliography	7
2	Foreign Compounds: Foods, Drugs, Chemicals, and Lifestyles	9
2.1	Foods	9
2.1.1	Heterocyclic Amines	10
2.1.2	Nitrosamines	10
2.1.3	Polycyclic Aromatic Hydrocarbons	11
2.1.4	Azo Dyes	11
2.1.5	α,β -Unsaturated Aldehydes	12
2.1.6	Mycotoxin	12
2.2	Household Products	12
2.2.1	Benzene	13
2.2.2	Phenol	13
2.2.3	Phthalate	13

2.3	Pharmaceuticals	13
2.3.1	Acetaminophen	14
2.3.2	Xanthine	14
2.3.3	Terfenadine	14
2.3.4	Menadione	15
2.3.5	Diazepam	15
2.4	Environmental Chemicals	15
2.4.1	Diesel Exhausts	15
2.4.2	Arsenic	16
2.4.3	Polychlorinated Biphenyls	16
2.4.4	Dioxins	16
2.5	Lifestyles	17
2.5.1	Alcohol	17
2.5.2	Cigarette	17
	Bibliography	18
3	Transport and Excretion of Foreign Compounds	21
3.1	Lipophiles Versus Hydrophiles	22
3.2	Hydrogen Bonding	23
3.3	Sites of Action	23
3.4	Cell Membranes	24
3.5	Transport Mechanisms	24
3.5.1	Passive Diffusion	25
3.5.2	Facilitated Diffusion	25
3.5.3	Active Transport	26
3.6	Metabolic Pathways	26
3.6.1	Phase I Activation Metabolism	27
3.6.2	Phase II Detoxification Metabolism	27
3.7	Transport to External Cell Compartment	28
3.8	Metabolism Precedes Excretion	28
3.9	Excretion of Foreign Compounds	29
3.9.1	Renal Excretion	29
3.9.2	Reabsorption in the Kidney	30
3.9.3	Hepatic Excretion	30
3.9.4	Skin Excretion	31
	Bibliography	31
4	Metabolic Conversion of Foreign Compounds	33
4.1	Phase I Activation Metabolism	34
4.1.1	Oxidation Reactions	34
4.1.2	Hydroxylation Reactions	34
4.1.3	Dealkylation Reactions	35
4.1.4	Hydrolysis	35
4.1.5	Epoxidation	36
4.2	Phase II Detoxification Metabolism	36
4.2.1	Conjugation Reactions	37
4.2.2	Non-conjugation Reactions	39

4.3	Toxication and Detoxification	40
4.3.1	Toxication Activation	40
4.3.2	Deactivation of Toxicity	40
4.3.3	Activation Versus Deactivation: Competing Pathways	41
	Bibliography	42
5	Phase I Activation Enzymes	45
5.1	Activation of Foreign Compounds	46
5.2	Activation Enzymes	46
5.2.1	Oxidative Enzymes	47
5.2.2	Reductive Enzymes	51
5.2.3	Hydrolytic Enzymes	51
5.3	Catalytic Reactions	52
5.3.1	Oxidative Reactions	52
5.3.2	Reductive Reactions	54
5.3.3	Hydrolytic Reaction	55
	Bibliography	56
6	Phase II Detoxification Enzymes	59
6.1	Exclusion of Foreign Compounds	59
6.2	Detoxification Enzymes	60
6.3	Conjugation Enzymes	60
6.3.1	Uridine-Diphosphate-Glucuronosyltransferase	60
6.3.2	Glutathione S-Transferase	61
6.3.3	Sulfotransferase	62
6.3.4	N-Acetyltransferase	63
6.3.5	Methyltransferase	63
6.3.6	Acytransferase	64
6.4	Conjugation Enzyme-Catalyzed Reactions	64
6.4.1	Conjugation at O Atom	64
6.4.2	Conjugation at N Atom	65
6.4.3	Conjugation at C Atom	65
6.4.4	Conjugation at S Atom	66
6.4.5	Conjugation of Carboxylic Acid	66
6.4.6	Conjugation at OH Group	67
6.5	Non-conjugation Enzymes	67
6.5.1	Quinone Reductase	68
6.5.2	Epoxide Hydrolases	68
6.6	Non-conjugation Enzyme-Catalyzed Reactions	68
6.6.1	Quinone Reductase	68
6.6.2	Epoxide Hydrolase	69
	Bibliography	69
7	Catalytic Reactions of Activation Enzymes	71
7.1	Cytochrome P450	71
7.1.1	Hydroxylation of Aliphatic or Aromatic Compounds	72

7.1.2	Epoxidation of Ether	72
7.1.3	Dehydrogenation of Alcohol or Aldehyde	73
7.1.4	Oxidation of N - or S - Compound	73
7.1.5	Dealkylation of Ether, Amide, or Carboxylic Acid	74
7.1.6	Oxidation of Carbon on Aromatic Ring	74
7.1.7	Activation of Benzo[a]pyrene	74
7.2	Prostaglandin H Synthase	74
7.3	Flavin Monooxygenase	75
7.4	Amine Oxidase	75
7.5	Nitroreductase	76
7.6	Azoreductase	76
7.7	Molybdenum Hydroxylase	76
7.8	Alcohol Dehydrogenase	77
7.9	Ribonucleotide Reductase	77
7.10	Peroxidase	77
7.11	Carboxylesterase	78
	Bibliography	78
8	Catalytic Reactions of Detoxification Enzymes	81
8.1	Conjugation Reactions	82
8.1.1	Uridine Diphospho-Glucuronosyl Transferase	82
8.1.2	Glutathione S-Transferase	83
8.1.3	Sulfotransferase	84
8.1.4	Acyltransferase	85
8.1.5	N-Acetyltransferase	85
8.1.6	Methyltransferase	86
8.2	Non-conjugation Reactions	87
8.2.1	Quinone Reductase	87
8.2.2	Epoxide Hydrolase	87
8.3	Catalytic Actions on Atom or Molecule	88
8.3.1	Conjugation at O Atom	88
8.3.2	Conjugation at N Atom	89
8.3.3	Conjugation at C Atom	90
8.3.4	Conjugation at S Atom	90
8.3.5	Conjugation of Carboxylic Acid	91
8.4	Other Non-conjugation Reactions	91
	Bibliography	92
9	Reactive Intermediates and Their Interactions	95
9.1	Reactive Intermediate Species	95
9.1.1	Reactive Oxygen Species	97
9.1.2	Reactive Nitrogen Species	97
9.2	Enzyme-Catalyzed Reactive Intermediate Formation	98
9.2.1	Mediation by Activation Enzymes	98
9.2.2	Mediation by Detoxification Enzymes	99
9.3	Interactions with Cellular Components	100
9.3.1	Protein Adducts	101

9.3.2	DNA Adducts	101
9.3.3	Lipid Peroxidation	101
9.4	Factors Affecting Foreign Compound Toxicity	102
9.5	Defense Against Reactive Intermediates	102
9.5.1	Conjugation Reactions	102
9.5.2	Glutathione	103
9.5.3	Antioxidant Enzymes	103
	Bibliography	104
10	Metabolite-Associated Cell Toxicities	107
10.1	Intrinsic Toxicity	107
10.2	Reactive Intermediate-Related Toxicity	108
10.3	Lifestyle-Induced Toxicity	108
10.3.1	Alcohol	109
10.3.2	Cigarette	109
10.4	Toxic Effects on Cell Components	109
10.4.1	Protein Damage	110
10.4.2	DNA Damage	111
10.4.3	Lipid Peroxidation	111
10.5	Toxic Effects on Cellular Functions	112
10.5.1	Intervention with Mitochondria Functions	112
10.5.2	Interaction with Ion Transporters	113
10.5.3	Interference with Enzymatic Functions	113
10.5.4	Immune Suppression and Stimulation Effects	114
10.6	Chemical Carcinogenesis	115
10.7	Drug Metabolism Interference	115
	Bibliography	116
11	Oxidative Stress: Reactive Chemical Intermediates	119
11.1	Oxidative Stress	120
11.1.1	Reactive Oxygen Species	120
11.1.2	Free Radicals	121
11.2	Reactive Intermediate-Mediated Oxidative Stress	121
11.2.1	Oxidative Stress on Biomolecules	121
11.2.2	Oxidative Stress and Inflammation on Diseases	123
11.3	Electrophilic Stress	124
11.3.1	Foreign Compound-Mediated Electrophiles	124
11.3.2	Varieties of Electrophiles	125
11.3.3	Electrophilic Stress on Biomolecules	125
11.3.4	Electrophiles on Disease Conditions	126
11.3.5	Electrophiles on Drug Metabolism	127
11.4	Defense Against Oxidative Stress	127
11.4.1	Chemoprevention Inducers	127
11.4.2	Nrf2- ARE Pathway	128
	Bibliography	128

12	Metabolic Enzymes: Polymorphisms and Species Differences	131
12.1	Enzyme Polymorphisms on Xenobiotic Metabolism	132
12.2	Genetic Polymorphisms of Activation Enzymes	132
12.2.1	Cytochrome P450 (CYP450) Polymorphisms	133
12.2.2	Flavin-Containing Monooxygenase	136
12.2.3	Peroxidase	137
12.2.4	Carboxylesterase	137
12.2.5	Alcohol and Aldehyde Dehydrogenases Polymorphisms	137
12.3	Genetic Polymorphisms of Detoxification Enzymes	138
12.3.1	Glutathione S Transferase (GST)	139
12.3.2	UDP-Glucuronosyltransferase	140
12.3.3	Sulfotransferase	140
12.3.4	N-Acetyltransferase	141
12.3.5	Methyltransferase	141
12.3.6	Quinone Oxidoreductase	142
12.3.7	Epoxide Hydrolase	143
12.4	Enzyme Polymorphisms on Alcohol and Smoke	143
12.4.1	Alcoholism	143
12.4.2	Smoker	144
12.5	Species Difference in Metabolic Enzyme Activities	144
12.5.1	Susceptibility to Aflatoxin Toxicity between Humans and Mice	145
12.5.2	Resistance to Tamoxifen Toxicity in Humans, Not in Rats	145
12.5.3	Different 4-Ipomeanol Toxicity Between Humans and Rodents	146
	Bibliography	147
13	Defense Against Oxidative Stress: Nrf2-ARE Pathway	151
13.1	Transcription Factor Nrf2	151
13.1.1	Role of Nrf2 on Oxidative Stress	152
13.1.2	Keap1 Regulation of Nrf2 Activity	153
13.2	Activation of Nrf2-ARE Pathway	153
13.3	Nrf2-KeapP1-ARE Pathway	153
13.4	Molecular Mechanism of Nrf2-ARE Pathway	154
13.4.1	In the Absence of Oxidative Stress	154
13.4.2	In the Presence of Oxidative Stress	155
13.5	Cytoprotection Through Nrf2-ARE Pathway	155
13.5.1	Induction of Nrf2 – ARE Pathway	156
13.5.2	Enzyme Inducers for Cytoprotection	156
13.5.3	Over-Activation of Nrf2-ARE Pathway	157
13.6	Role of Nrf2 in Diseases	158
13.7	Nrf2-Inducing Compounds for Chemoprevention	158
	Bibliography	159

14	Inducibility of Metabolizing Enzymes	161
14.1	Inducibility of Activation Enzymes	162
14.2	Inducibility of Detoxification Enzymes	162
14.3	Lifestyle Modification	164
14.4	Monofunctional and Bifunctional Inducers	164
14.5	Balance Between Activation and Detoxification Metabolisms	165
14.6	Enzyme Modulation Against Potential Toxicity	166
14.6.1	Enzyme Modulation	167
14.6.2	Hypothesis of Detoxification Enzyme Induction	167
14.7	Inducer–Metabolic Enzyme Interactions	167
14.7.1	Michael Reaction Acceptors	168
14.7.2	Unsaturated Carbon–Carbon Bonds	169
14.7.3	Phenolic Hydroxyl Groups	170
	Bibliography	171
15	Inducibility of Metabolizing Enzymes	173
15.1	Defense Against Potential Metabolic Toxicity	174
15.1.1	Modification of Activation Enzymes	174
15.1.2	Modification of Detoxification Enzymes	174
15.1.3	Antioxidant Activities	175
15.2	Modification of Metabolic Enzymes	175
15.2.1	Modification of Activation Enzymes	175
15.2.2	Modulation of Detoxification Enzymes	176
15.3	Major Inducers of Metabolic Enzymes	177
15.3.1	Sulforaphane and Other Isothiocyanates	178
15.3.2	1,2-Dithiole-3-Thione and Derivatives	178
15.3.3	Indole-3-Carbinol	180
15.3.4	Flavonoids and Isoflavones	180
15.3.5	Polyphenols	182
15.3.6	Organosulfur Compounds	183
15.3.7	Terpenes and Terpenoids	184
15.4	Other Inducers	185
15.4.1	Phenobarbital	185
15.4.2	Grapefruit	185
	Bibliography	186
16	Diversified Classes of Enzyme Modulators	189
16.1	Substrate–Enzyme Interactions	189
16.1.1	Electrophilic and Nucleophilic Groups	190
16.1.2	Conjugation of Metabolite	190
16.2	Interaction of Modulator with Metabolic Enzyme	191
16.2.1	Enzyme–Substrate Interaction	192
16.2.2	Enzyme Conformation	192

16.3	Michael Acceptor Functionalities	192
16.4	Enzyme Modulators with Michael Acceptor Characteristics	193
16.5	Diversities of Enzyme Inducers	194
16.5.1	Ortho-Hydroxyl Group on Aromatic Ring	194
16.5.2	Chemical Structures of Enzyme Inducers	194
	Bibliography	201
17	Metabolite-Associated Disease Conditions	203
17.1	Metabolite-Associated Hepatotoxicity	204
17.1.1	Alcohol and Aldehyde	204
17.1.2	Aflatoxin-Induced Hepatic Carcinogenesis	205
17.1.3	Acetaminophen-Induced Hepatocyte Injury	205
17.1.4	Other Factors	206
17.2	Metabolic Intermediate-Associated Kidney Toxicities	206
17.3	Metabolite-Associated Cancer and Other Toxicities	207
17.3.1	Cancer	207
17.3.2	Neurodegeneration	208
17.3.3	Cataract	208
17.4	Drug Efficacy and Adverse Responses	208
17.4.1	Drug Efficacy	209
17.4.2	Drug Adverse Responses	209
17.5	Chemoprevention Against Toxicities	210
17.5.1	Toxic Metabolites	210
17.5.2	Chemoprevention	210
17.5.3	Induction of Detoxification Enzymes	210
17.5.4	Nrf2- Keap1 Pathway	211
	Bibliography	211
18	Metabolic Enzyme Induction for Health Benefits	215
18.1	Metabolic Enzyme Modulation	216
18.1.1	Activation Enzyme Modulation	216
18.1.2	Detoxification Enzyme Modulation	218
18.1.3	Balance Between Activation and Detoxification Inductions	219
18.2	Varieties of Metabolic Enzyme Inducers	220
18.2.1	Activation Enzyme Inducers	221
18.2.2	Detoxification Enzyme Inducers	222
18.3	Monofunctional and Bifunctional Inducers	223
18.3.1	Monofunctional Inducers	223
18.3.2	Bifunctional Inducers	224
18.4	Inducer-Drug Interactions	224
	Bibliography	225
19	Diet Effects on Metabolic Enzymes	229
19.1	Dietary Modulation of Metabolic Enzymes	230
19.1.1	Vegetables	230
19.1.2	Cruciferous Vegetables	230

19.1.3	Allium Vegetables	233
19.1.4	Root Vegetables	233
19.2	Fruits	235
19.2.1	Polyphenols	235
19.2.2	Eriodyctiol and Quercetin	235
19.2.3	Kaempferol and Pomegranate	236
19.2.4	Anthocyanin and Procyanidin	236
19.2.5	Triterpenes	236
19.3	Herbs	237
19.3.1	Ginseng	237
19.3.2	Herb–Drug Interaction	237
19.4	Beverage	237
19.4.1	Epigallocatechin-3-Gallate	237
19.4.2	Polyphenols	238
19.5	Alcohol	238
19.5.1	Acetaldehyde	238
19.5.2	Curcumin Protective Effect	238
19.6	Algae	239
19.6.1	Chlorophyll	239
19.6.2	Unsaturated Fatty Acid	239
19.6.3	Polysaccharide	239
19.7	Dietary Inducer–Drug Interactions	239
19.7.1	Grapefruit	240
19.7.2	Sulforaphane	240
19.7.3	Curcumin	240
	Bibliography	240
	Index	245
