

Contents

Section 1: Eco-efficiency

How to enhance sustainable chemistry in a non-technological way? <i>G. L. L. Reniers & K. Sørensen</i>	3
Comparison of two pharmaceutical production processes using different eco-efficiency measuring methods <i>G. Van der Vorst, W. Aelterman, P. Van Broeck, S. Walraedt, K. Schaerlaekens, P. Stouthuyzen, H. Van Langenhove & J. Dewulf</i>	11
Solvents for sustainable chemical processes <i>P. Pollet, C. A. Eckert & C. L. Liotta</i>	21
A new and greener method to manufacture copolymer-1 <i>E. Ponnusamy</i>	33
Corning® Advanced-Flow™ reactor technology for process intensification <i>D. Chamrai</i>	39

Section 2: Smart processing technology for sustainability (Special session organised by Prof. M. Naito)

Smart powder processing for energy and environment <i>M. Naito, H. Abe & A. Kondo</i>	51
Advanced technique to reduce emissions of fine particulate matter using ultrasounds <i>B. Bergmans, M. Dormann, F. Idczak, S. Petitjean, D. Steyls & B. Vanderheyden</i>	61

Measurement and analysis of fine particulate matters (PM10/PM2.5) and condensable nanoparticles emission from stationary sources <i>H. Kamiya, K. Hada, T. Sekizawa, M. Yamada, M. Tsukada, W. Lenggoro, M. Wada, N. Kogure, Y. Yuping & W. W. Szymanski</i>	71
---	----

Reduction technology of carbon dioxide emission from a coal utilized power generation system <i>H. Makino & N. Noda</i>	83
--	----

Catalyst design with porous functional structures <i>J. Van Noyen, S. Mullens, F. Snijkers & J. Luyten</i>	93
---	----

Development of photonic and thermodynamic crystals conforming to sustainability conscious materials tectonics <i>S. Kiriwara, N. Ohta, T. Niki, Y. Uehara & S. Tasaki</i>	103
--	-----

Section 3: Improvement in catalysis

Strong bond cleavage promoted by silyl group migration in a coordination sphere <i>H. Nakazawa</i>	117
---	-----

Bridging the gap between cellulose chemistry and heterogeneous catalysis <i>S. Van de Vyver, J. Geboers, L. Peng, F. de Clippel, M. Dusselier, T. Vosch, L. Zhang, G. Van Tendeloo, C. J. Gommers, B. Goderis, P. A. Jacobs & B. F. Sels</i>	129
---	-----

Interests and challenges of organic solvent nanofiltration for sustainable chemistry: the case of homogeneous catalysis of metathesis <i>M. Rabiller-Baudry, G. Nasser, D. Delaunay, A. Keraani, T. Renouard, D. Roizard, H. Ben Soltane, C. Fischmeister, J. L. Couturier & D. Dhaler</i>	141
---	-----

Section 4: Multifunctional materials

Activated ceramic materials with deposition of photocatalytic titano-silicate micro-crystals <i>P. De Luca, A. Chiodo & J. B. Nagy</i>	155
---	-----

Developing a new certified reference material of brown algae for trace metal analysis <i>A. Santoro, M. Ricci, M. F. Tumba-Tshilumba & A. Held</i>	167
---	-----

Section 5: Bio-based materials

Preparation and characterization of biodegradable films from keratinous wastes of the leather industry

L. Barbosa, J. Costa, C. Rocha, O. M. Freitas, A. Crispim, C. Delerue-Matos & M. P. Gonçalves 177

Characterization of liquefied products from model woody components in the presence of mineral acid catalysts

Q. Wang, Q. Chen, P. Apaer, Q. Qian, T. Maezono, N. Mitsumura, H. Kurokawa & X. Guo 187

Basic study on combustion characteristics of waste rice husk and emission behavior from a new-type air vortex current combustor

Q. Wang, T. Maezono, Q. Chen, P. Apaer, Y. Wang, L. Gui, D. Niida, N. Mitsumura, M. Domon, I. Fujiwara & N. Yamaguchi 199

Section 6: Environmental health issues

Possibilities and limitations of LCA for the evaluation of soil remediation and cleanup

V. Cappuyns 213

Study of bisphenol A in sanitary landfill soil

N. C. Vieceli, E. R. Lovatel, E. M. Cardoso & I. N. Filho 225

Thread as a substrate for low-cost point-of-care diagnostics

X. Li, D. Ballerini, J. Tian & W. Shen 233

Author index 245
