Preface	xv
List of Contributors	xvii
Introduction: Coastal Disasters and Climate Change in Vietnam	xxi
 Section 1 Typhoon, Storm Surge and Coastal Erosion	 1
 1 Tropical Cyclones and Storm Surges in Southern Vietnam	 3
<i>Hiroshi Takagi, Nguyen Danh Thao and Miguel Esteban</i>	
1.1 Introduction	3
1.2 Tropical Cyclones in Vietnam	3
1.2.1 Review of Past Literature	3
1.2.2 Track Analysis Using JTWC Data Between 1951 and 2010	5
1.2.3 Tropical Cyclone Landfall Along the Coasts of Vietnam	5
1.3 Storm Surges in Vietnam	8
1.3.1 Review of Past Literature	8
1.3.2 Storm Surge Simulation	10
1.3.3 Verification of the Model	11
1.3.4 Estimation of Storm Surge Height	12
1.4 Discussion	13
1.5 Conclusions	14
References	15
 2 Impacts of Typhoons on the Vietnamese Coastline: A Case Study of Hai Hau Beach and Ly Hoa Beach	 17
<i>Magnus Larson, Nguyen Manh Hung, Hans Hanson, Annika Sundström and Emma Södervall</i>	
2.1 Introduction	17
2.2 Typhoons and Their Impact	19
2.2.1 General	19
2.2.2 Wave Modeling	20
2.2.3 Wave Height Reduction	22

2.2.4 Runup Model	23
2.2.5 Erosion Model	23
2.3 Typhoons in Vietnam	24
2.3.1 General	24
2.3.2 Hai Hau Beach	26
2.3.3 Ly Hoa Beach	30
2.4 Analysis of Typhoon Impact	32
2.4.1 Flooding	32
2.4.2 Erosion	35
2.5 Effects of Climate Change on Typhoons	37
2.5.1 Changes in Physical Properties of Typhoons	37
2.5.2 Consequences for the Coastal Areas of Vietnam	38
2.6 Concluding Remarks	39
Acknowledgments	40
References	40
3 Coastline and River Mouth Evolution in the Central Part of the Red River Delta	43
<i>Nguyen Manh Hung and Magnus Larson</i>	
3.1 Introduction	43
3.2 Geography	44
3.3 Socioeconomic Conditions	44
3.4 Physical Setting and Hydrometeorological Parameters	47
3.4.1 Hydrology	47
3.4.2 Air Pressure and Wind Regime in Coastal Zone	48
3.4.3 Rainfall and Humidity Regimes	50
3.4.4 Marine Parameters	50
3.5 The History of RRD Evolution	52
3.6 Coastline and River Mouth Evolution in Central Part of the RRD	54
3.6.1 The Period from 1965 to 1989	55
3.6.2 The Period from 1991 to 2001	58
3.6.3 The Period from 2001 to 2010	63
3.6.4 Chronic Long-Term Erosion at Hai Hau Beach	65
3.7 Computations of Coastline Retreat at Hai Hau Beach	67
3.7.1 Data Input Description	68
3.7.2 Modeling of Sediment Transport and Coastline Evolution	69

3.7.3	Computational Grid Specifications	70
3.7.4	Simulation Procedure in SMS	71
3.7.5	Computation Results	72
3.8	Conclusions	76
	Acknowledgments	77
	References	77
4	Assessment of Vietnam Coastal Erosion and Relevant Laws and Policies	81
	<i>Le Van Cong, Nguyen Van Cu and Tomoya Shibayama</i>	
4.1	Introduction	81
4.2	Background	82
4.3	Present Status of Erosion	84
4.3.1	Northern Region (from Quang Ninh to Ninh Binh Province)	84
4.3.2	Central Region (from Thanh Hoa to Binh Thuan Province)	85
4.3.3	Southern Region (from Ba Ria—Vung Tau to Kien Giang Province)	89
4.4	Factors Influencing Coastal Erosion	92
4.4.1	Physical Factors	93
4.4.2	Human Factors	96
4.4.3	The Influence of SLR on Coastal Erosion	99
4.5	Major Solutions for Coastal Erosion	99
4.5.1	Structural Measures	100
4.5.2	Nonstructural Measures	101
4.6	Relevant Laws and Policies for Addressing Coastal Erosion	102
4.7	Conclusions	104
	References	105
5	Area Coastal Protection and the Use of Bamboo Breakwaters in the Mekong Delta	107
	<i>Klaus Schmitt and Thorsten Albers</i>	
5.1	Introduction	107
5.2	Coastal Protection	109
5.2.1	Area Coastal Protection	110
5.2.2	Mangroves	111

5.3	Bamboo Breakwaters	114
5.3.1	Field Measurements	115
5.3.2	Numerical Modeling	115
5.3.3	Physical Modeling	117
5.3.4	Spatial Arrangement	118
5.3.5	Bamboo T-Fence Design	120
5.3.6	Monitoring of Wave Attenuation and Sedimentation	122
5.3.7	Economic Considerations	126
5.4	Conclusions	128
	Acknowledgments	128
	References	128
6	Risk Analysis and Management in Coastal Regions of Vietnam	133
	<i>Mai Van Cong</i>	
6.1	What Is Risk? Risk Definition and Presentation	133
6.2	Discussion of Risk Measures	135
6.2.1	Individual Risk	135
6.2.2	Societal Risk	136
6.2.3	Damage (Economic) Risk	138
6.3	Risk Evaluation and Acceptable Risk in the Coastal Zone of Vietnam	138
6.3.1	Present Risks due to All Hazards in Vietnam	138
6.3.2	National Acceptable Risk Levels: Safety Standard for Vietnam	139
6.3.3	Present Risk due to Traffic Accidents	140
6.3.4	Historical Loss of Life due to Storms and Floods in Vietnam	141
6.3.5	Individual Risk due to Coastal Flooding in Vietnam	142
6.3.6	Societal Risk due to Flood on a Country Level	144
6.3.7	Evaluation of Flood Risk on a National Scale	146
6.3.8	Mortality Estimation due to Coastal Flooding	147
6.3.9	Discussion	148
6.4	Case Study: Flood Risk Analysis of Nam Dinh Coastal Zone	149
6.4.1	Loss of Life Estimates for Nam Dinh Coastal Zone	149
6.4.2	Population in Flooded Areas and Evacuation	149
6.4.3	Mortality Estimation	151

6.4.4	Acceptable Flood Risk for Nam Dinh Coastal Zone	152
6.4.5	Discussion	153
6.5	Conclusions	154
	References	154
7	Coastal Vulnerabilities in a Fast-Growing Vietnamese City	157
	<i>Hiroshi Takagi, Miguel Esteban and Tran Thu Tam</i>	
7.1	Introduction	157
7.2	Tourism-Induced Coastal Erosion at Mui Ne Town	158
7.3	Neighboring Coastal Communities Suffering from Coastal Erosion at Phan Thiet	162
7.4	SLR and Shoreline Retreat	167
7.5	TCs and Storm Surge	168
7.6	Discussion	169
7.7	Conclusions	170
	References	171
Section 2	Climate Change Induced Disasters	173
8	Climate Change in the Coastal Regions of Vietnam	175
	<i>Thanh Ngo-Duc</i>	
8.1	Introduction	175
8.2	Present-Day Climate in Vietnam	176
8.2.1	Data and Methods	176
8.2.2	Mean Climate Features in Coastal Regions of Vietnam	178
8.2.3	Tropical Cyclones	181
8.2.4	Present Climate Trends	182
8.2.5	Wind Trends	186
8.3	Future Climate Scenarios for Vietnam	188
8.3.1	Regional Climate Projections Methods	190
8.3.2	The 1994 and 1998 Climate Change Scenarios	191
8.3.3	The 2009 Climate Change Scenarios	193
8.3.4	The Updated 2012 Climate Change Scenarios	193
8.4	Conclusions	196
	References	197

9	Climate Change and Sea Level Rise in the Mekong Delta: Flood, Tidal Inundation, Salinity Intrusion, and Irrigation Adaptation Methods	199
	<i>To Quang Toan</i>	
9.1	Introduction	199
9.2	Data, Methodology, and Evaluated Results of Simulated Scenarios	201
9.2.1	Present Flooding and Spring Tidal Inundation in the Mekong Delta	201
9.2.2	Present Salinity Intrusion in the Mekong Delta	202
9.2.3	National Climate Change and SLR Scenarios	202
9.2.4	Hydraulic Modeling for the Mekong Delta Using MIKE11	202
9.2.5	Evaluation of Simulated Results on Flood and Tidal Inundation Change in the Context of Climate Change	205
9.2.6	Evaluation of Simulated Results on Salinity Intrusion Change in the Context of Climate Change	207
9.3	Possible Adaptation Measures for Flood, Tidal Inundation, and Salinity Intrusion Control	209
9.3.1	Vietnam's Water Resource Development Viewpoint	209
9.3.2	Case Study of a Deep Flooding Area in South Vam Nao (Cho Moi District, An Giang Province)	210
9.3.3	Case Study in a Coastal Zone Area with an Existing Ring Dike: The South Mang Thit Irrigation Project	212
9.3.4	Case Study of Salinity Intrusion Prevention with Mainstream River Sluice Gates	214
9.4	Conclusions and Recommendations	216
	References	217
10	Possible Impacts of Seawater Intrusion and Strategies for Water Management in Coastal Areas in the Vietnamese Mekong Delta in the Context of Climate Change	219
	<i>Nguyen Hieu Trung and Van Pham Dang Tri</i>	
10.1	Introduction	219
10.2	Water Resources	221
10.3	Impacts of Seawater Intrusion on Agriculture, Aquaculture, and Forestry in Coastal Plains of the VMD	224

10.4	Steps Forward: Is There Any Suitable Approach to Sustain the Development of Coastal Areas of the VMD?	225
10.5	Conclusions	228
	References	229
11	Tropical Cyclone Damage to Coastal Defenses: Future Influence of Climate Change and Sea Level Rise on Shallow Coastal Areas in Southern Vietnam	233

11.1	Introduction	233
11.2	Coastal Protection Around Vietnam and the Southern Delta	235
11.2.1	The Mekong Delta	235
11.2.2	Coastal Revetments and Dikes in Vietnam	237
11.3	Design of Shallow Water Breakwaters and Coastal Revetments	240
11.3.1	Sea Level Rise Scenarios	242
11.3.2	Rubble Mound Breakwaters, Dikes, and Coastal Revetments	242
11.3.3	Van der Meer Formula	243
11.3.4	Limiting Breaker Height	244
11.3.5	Run-Up	245
11.3.6	Shallow Breakwater Sections and Parameters	245
11.4	Future Requirement for Shallow Water Coastal Defences	247
11.5	Case Study of Phan Thiet	250
11.6	Conclusions	253
	References	254
12	Investigation on Floods in Can Tho City: Influence of Ocean Tides and Sea Level Rise for the Mekong Delta's Largest City	257
	<i>Hiroshi Takagi, Tran Van Ty and Nguyen Danh Thao</i>	
12.1	Introduction	257
12.2	Methodology	261
12.2.1	Data Analysis	261
12.2.2	Field Survey	262
12.3	Results and Discussion	262
12.3.1	Long-Period Oscillations	264
12.3.2	Short-Period Oscillations	266

12.3.3	Frequency and Inundation Depth at the Riverbank	267
12.3.4	Influence of SLR	269
12.4	Conclusions	271
	References	272
