

Contents

Part I Background

1 Human Ecology of Climate Change Hazards: Concepts, Literature Review, and Methodology	3
1.1 Concepts and Literature Review	4
1.1.1 Human Ecology	4
1.1.2 Human Ecology of Climate Change Hazards	8
1.1.3 Climate Change Hazards in Vietnam	12
1.2 Methodology	17
1.2.1 Integration of Time and Space	17
1.2.2 Integration of Biophysical with Socioeconomic Data	22
1.2.3 Stakeholder Delphi Survey	23
1.2.4 Analytical Complete (Unraveling Complexity)	27
1.2.5 Combination Methods	30
1.3 The Challenge	34
1.4 Conclusion	35
2 Climate Change-Associated Hazards, Impacts, and Vulnerability at Regional Level	37
2.1 Climate Change Hazard Impacts and Vulnerability Along the Vietnamese Northern Central Coast	38
2.1.1 The Northern Part of the Central Coast of Vietnam	38
2.1.2 Climate Change	39
2.1.3 Natural Hazards	43
2.1.4 Climate Change Vulnerability	44
2.2 Climate Change Hazards in the Vietnamese Northern Mountainous Region	53
2.2.1 Vietnamese Northern Mountainous Region	53
2.2.2 Natural Hazards	56
2.3 Conclusion	59

Part II Risks for Nature and Humans in the Lowland

3	Climate Change Hazards and Migration Along the Ky Anh Coast	
3.1	The Coast of Ky Anh	63
3.2	Tropical Storms and Coastal Erosion.	63
3.2.1	Hazards from Tropical Storms.	68
3.2.2	Coastal Erosion in the Period 1973–2013	68
3.3	Climate Change, Migration, and Adaptation.	72
3.4	Conclusion	75
		79
4	Gross Costs and Impact on Local Livelihood Capitals of Tropical Storms Along the Ky Anh Coast.	81
4.1	Local Perception and Sectorial Impact of Climate Change Hazards	82
4.1.1	Perception of Local Households	82
4.1.2	Observations and Opinion of Local Governments.	83
4.1.3	Stakeholders' Opinion	85
4.2	Valuation of Tropical Storm Damage	87
4.2.1	Gross Costs and Impact on Livelihood Capitals of the September 2013 Storm	87
4.2.2	Costs of the September 2013 Storm Compared with Other Storms During 2008–2013.	87
4.2.3	Trend and Cost Analysis of Tropical Storms.	90
4.3	Conclusion	92
5	Climate Change Adaptation of Local Communities Along Heavily Damaged Coasts	95
5.1	Delphi Survey Round 1	95
5.1.1	Revised Open Questions	95
5.1.2	Drivers	96
5.1.3	Pressure	96
5.1.4	State	97
5.1.5	Impacts.	98
5.1.6	Response	99
5.2	Delphi Survey Round 2	100
5.2.1	Statement Statistics	100
5.2.2	Kendall's W test.	103
5.2.3	Summary of Local Adaptation Capacity to Climate Change Hazards	103
5.3	Conclusion	105

Part III Risks for Nature and Humans in the Uplands

6	Impacts and Damage of Climate Change Hazards in the Van Chan Mountain	109
6.1	Climate Change	109

6.1.1	Van Chan Mountain	109
6.1.2	Climate Change	110
6.2	Natural Hazards	112
6.2.1	Natural Hazard Zones	112
6.2.2	Gross Cost of Natural Hazards	117
6.3	Conclusion	122
7	Comparing Local and Immigrant Household Preparedness for Natural Hazards in the Van Chan Mountain	125
7.1	Village-Scapes of Local and Immigrant Communities	125
7.2	Delphi Round 1	133
7.2.1	Impacts	133
7.2.2	Local Experience and Responses	134
7.3	Delphi Round 2	137
7.3.1	Statement Statistics	137
7.3.2	Kendall's W Test	140
7.4	Conclusion	141
 Part IV Policy Implications		
8	Building Resilient Landscapes and Green Cities Along the Coast and in the Upland of Vietnam	145
8.1	Human Ecological Aspects of Climate Change Hazards at a Local Scale	145
8.1.1	Risks for Nature and Humans in Lowlands	145
8.1.2	Risks for Nature and Humans in Uplands	146
8.2	Adaptation Policies and Measures	147
8.2.1	Coastal and Beach Protection	147
8.2.2	Green Cities	147
8.2.3	Sustainable Land Use, Integrated Land Use Planning, and Resilient Housing and Landscapes	150
8.2.4	Prospective Vision and Actions	151
8.3	National Challenges and International Cooperation	152
8.3.1	National Challenges and Local Effects	152
8.3.2	International Cooperation on Climate Change, Local Adaptation, and Hazard Prevention	154
8.4	Limitations of the Book	154
8.4.1	Uncertainties of Perception Studies Using a Likert Scale	154
8.4.2	Reliability of the Delphi Survey	155
8.4.3	Uncertainties on Damage Valuation	156
8.4.4	Added Value of the Book	157
8.5	Conclusion	159
