

Contents

Chapter 1 Principles of Pharmacology 1

- Rational Therapeutics
- Drug Administration
 - Formulation
 - Routes of Drug Administration
 - Dosing Regimens
- Pharmacokinetics
 - Drug Absorption
 - Drug Distribution
 - Drug Metabolism
 - Drug Excretion
 - Drug Clearance
- Drug Actions
 - Pharmacology at the Cellular Level
 - Pharmacology at the Organism Level
 - Pharmacology at the Population Level
- Drug Interactions
- Tolerance, Dependence and Withdrawal
- The Patient Profile

Chapter 2 Peripheral Nervous System 13

- Sympathomimetics
 - Direct Sympathomimetics
 - Indirect & Mixed Agents
- Sympathetic Blocking Agents (Sympatholytics)
 - Central Sympatholytics
 - Peripheral Presynaptic Sympatholytics
 - Peripheral Postsynaptic Sympatholytics
- Cholinomimetics
 - Direct Cholinergic Agonists
 - Cholinesterase Inhibitors
- Cholinergic Antagonists
 - Muscarinic Antagonists
 - Ganglion Blockers
- Neuromuscular Blockers
 - Neuromuscular Transmission and Blockade

- Reversing Neuromuscular Blockade
- Local Anesthetics

Chapter 3 Central Nervous System 34

Neurotransmitters of the Brain

- Norepinephrine
- Dopamine
- 5-Hydroxytryptamine (5-HT, Serotonin)
- Acetylcholine
- Gamma-amino butyric acid (GABA)
- Excitatory Amino Acids (EAA)
- The Opioids
- Other Neuropeptides

Antidepressants

CNS Stimulants

Antipsychotic Drugs

- Treatment of psychoses
- Undesirable Neurologic Effects

Antiemetics

Anti-Parkinson Drugs

Movement Disorder Drugs

Drugs to Treat Alzheimer's

Central Analgesics

- The Opioid System

Drugs to treat ALS

Anti-anxiety Agents

Anticonvulsants

- Types of Seizures and Drugs of Choice
- Principles of Anticonvulsant Therapy

General Anesthetics

Migraine Headache Therapy

Chapter 4 Cardiovascular and Hematology Drugs 59

Antihypertensives

- Diuretics
- Antiadrenergics
- Vasodilators

Angina and Heart Failure

- Treatment of Stable Angina

Treatment of Unstable Angina

Adjunctive Treatment of Myocardial Infarction

Heart Failure Drugs

- Acute Pulmonary Edema
- Management of Shock

Arrhythmias

Antiarrhythmic Agents

Lipid-lowering Agents

Anticoagulants, Antiplatelet Agents, and Thrombolytics

Chapter 5 Respiratory Drugs 87

Obstructive Lung Disease

Treatment Options

Chapter 6 Gastrointestinal Agents 93

Drugs for Stomach Disorders

Antidiarrheals

Drugs Used to Treat Constipation

Chapter 7 Anti-Infective Agents 99

Basic Strategies of Antimicrobial Therapy

The Enemies: Gram Positive Cocci
 The Enemies: Anaerobes
 The Enemies: Gram-negative Pathogens
 Bactericidal Cell Wall Inhibitors

- Penicillins (β -lactam drugs)
- Cephalosporins

 Antibiotics that Work Inside the Cell
 Antimetabolites
 Protein Synthesis Inhibitors
 Mycobacteria
 Antiviral Therapy
 Antiretroviral Therapy
 Antifungal Therapy
 Anti-parasitic Therapy

Chapter 8 Anticancer Drugs 123

Principles of Cancer Chemotherapy

- The cell cycle
- Resistance and Recurrence
- Toxicity of Anticancer Drugs
- Combination therapy

Alkylating Agents

Antimetabolites

Miscellaneous Anticancer Agents

Other Anticancer Agents

Hormonal Anticancer Agents

Hematopoietic Agents

Chapter 9 Anti-inflammatory and Immunomodulating Agents 138

Prostaglandin Inhibitors

Antiarthritic Agents

Antigout Agents

Immunomodulating Agents

Antihistamines

Chapter 10 Endocrine System 148

Anterior Pituitary Hormones

Posterior Pituitary Hormones

Other Hormones

Sex Hormones

- Androgens
- Androgen Inhibitor
- Estrogens
- Progestins
- Oral Contraceptives
- Progestin Only "Minipills"
- Levonorgestrel Implants (Norplant[®])

Oxytocin and Other OB/GYN Drugs

Adrenal Hormones

- Glucocorticoids
- Adrenocorticosteroid Hypersecretion
- Mineralocorticoids & Androgens

Thyroid Hormones

- Hyperthyroidism (thyrotoxicosis)
- Hypothyroidism

Pancreatic Hormones

- Diabetes Mellitus
- Insulin Replacement
- Oral Hypoglycemic Drugs

Anti-Obesity and Appetite Suppression Drugs

Index 161
