

TABLE OF CONTENTS

Gebrehiwot S, Anukka H., Espinosa-Leal L.

The Strain Rate Sensitivity of Polylactic Acid
(CR-PLA) Polymer: an Experimental Investigation 7

Himmel J., Vomáčko V.

Failure Analysis of Composite Bicycle
Saddle Rails Using Numerical Simulations 11

Hutař P., et al.

Fatigue Life of Additively Manufactured Polymer Composites 16

Knápek T.

Study of Tool Geometry Change During
Machining of Fibre Carbon Composites..... 20

Křena J., et al.

Radom with Thermoplastic Matrix of PMMA 26

Lach R., et al.

Improved Tensile and Microindentation Properties
of Fully Biobased Short-Fibre Reinforced Composites
Based on Polybutylene Succinate and Different Natural Fibres..... 34

Ogunleye R. O., et al.

The Effect of Prestressing on Mechanical
Properties of Unidirectional Carbon Epoxy Laminate Composites..... 40

Perrot A., et al.

Composite Sandwich Panels for High Ballistic Resistance..... 47

Potěšil A., et al.

Creation and Verification of Material Models
of Composite Plates and Their Use in the CAFICO Project 53

Ščerba M.

Saertex Contribution for the Sustainability of the Composite Industry 59

Váňa M.

Initial Research on the Machinability
of Biocomposite Materials Produced by the SMC Method..... 62

Vomáčko V., et al.

Composite Blade for High-Frequency Flutter Measurements..... 68

Zbončák R.

Modal Analysis of Functionally Oriented
Fabric Laminate with 10 mm Wide Carbon Strips and a 30 mm Circular Notch..... 73

Zemanová J., et al.

Development of Infusion Technology for
Thermoplastic Composites with PMMA Matrix..... 79

Zouhar J.

Applicability of Natural Long Fibre Composites..... 85
