

Contents

PART I Introduction to Physical Agents, 1

1 Physical Agents: Essentials, 1

- How to Use This Book, 1
- What Are Physical Agents?, 2
- Categories of Physical Agents, 2
- Effects of Physical Agents, 3
- General Contraindications and Precautions for Physical Agent Use, 5
- Evaluation and Planning for the Use of Physical Agents, 7
- Documentation, 9
- Chapter Review, 9
- Glossary, 9
- References, 10

2 Physical Agents in Clinical Practice, 11

- Michelle H. Cameron and Ashley L. Shea*
- History of Physical Agents in Medicine and Rehabilitation, 11
- Approaches to Rehabilitation, 12
- The Role of Physical Agents in Rehabilitation, 14
- Practitioners Using Physical Agents, 14
- Evidence-Based Practice, 15
- Using Physical Agents Within Different Health Care Delivery Systems, 18
- Chapter Review, 19
- Glossary, 19
- References, 19

PART II Pathology and Patient Problems, 21

3 Inflammation and Tissue Repair, 21

- Erika L. Hagstrom and David Adelson*
- Phases of Inflammation and Healing, 21
- Chronic Inflammation, 34
- Factors Affecting the Healing Process, 34
- Healing of Specific Musculoskeletal Tissues, 37
- Chapter Review, 41
- Glossary, 41
- References, 42

4 Pain and Pain Management, 45

- William Rubine and Kimberly Jones*
- Terminology, 46
- The Nociceptive System, 46
- Efferent Systems, 49
- Types of Pain, 50
- Pain Mechanisms, 51
- Preventing Acute Pain From Becoming Chronic, 53
- Palliative Care, 54
- Measuring Pain, 54
- Pain Management, 57

Chapter Review, 65

Glossary, 65

References, 66

5 Managing Abnormal Muscle Tone, 70

*Diane D. Allen, Gail L. Widener, and
Dana F. Lindberg*

- What Is Muscle Tone?, 70
- Categories and Definitions of Abnormal Muscle Tone, 72
- Measuring Muscle Tone, 73
- Mechanisms Underlying Muscle Tone, 78
- Managing Abnormal Muscle Tone and Its Effects on Function, 88
- Chapter Review, 100
- Glossary, 100
- References, 102

6 Motion Restrictions, 105

Linda G. Monroe

- Types of Motion, 106
- Patterns of Motion Restriction, 107
- Tissues That Can Restrict Motion, 108
- Pathologies That Can Cause Motion Restriction, 109
- Examination and Evaluation of Motion Restriction, 111
- Contraindications and Precautions to Range-of-Motion Techniques, 114
- Treatment Approaches for Motion Restrictions, 114
- Role of Physical Agents in the Treatment of Motion Restrictions, 116
- Chapter Review, 119
- Glossary, 120
- References, 120

PART III Thermal Agents, 123

7 Introduction to Thermal Agents, 123

- Specific Heat, 123
- Modes of Heat Transfer, 123
- Chapter Review, 126
- Glossary, 126

8 Superficial Cold and Heat, 127

- Cryotherapy, 128**
- Effects of Cold, 128
- Clinical Indications for Cryotherapy, 131
- Contraindications and Precautions for Cryotherapy, 133
- Adverse Effects of Cryotherapy, 135
- Application Techniques, 135

Documentation, 141
Thermotherapy, 146
 Effects of Heat, 146
 Clinical Indications for Superficial Heat, 148
 Contraindications and Precautions for

Thermotherapy, 149

Adverse Effects of Thermotherapy, 152

Application Techniques, 153

Documentation, 162

Choosing Between Cryotherapy and
 Thermotherapy, 168

Chapter Review, 168

Glossary, 169

References, 169

9 **Ultrasound**, 173

Physical Properties of Ultrasound, 174

Ultrasound Parameters, 175

Effects of Ultrasound, 177

Clinical Indications for Ultrasound, 181

Contraindications and Precautions for Ultrasound, 187

Adverse Effects of Ultrasound, 189

Application Technique, 189

Documentation, 192

Ultrasound Machine Care and Calibration, 192

Chapter Review, 198

Glossary, 198

References, 199

10 **Diathermy**, 204

Physical Properties of Diathermy, 205

Types of Diathermy Applicators, 206

Effects of Diathermy, 207

Clinical Indications for Diathermy, 209

Contraindications and Precautions for
 Diathermy, 210

Adverse Effects of Diathermy, 213

Application Technique, 213

Documentation, 215

Chapter Review, 220

Glossary, 220

References, 220

PART IV Electrical Currents, 225

11 **Introduction to Electrotherapy**, 225

Michelle H. Cameron and Michelle Ocelnik

Electrical Current Devices, Waveforms, and
 Parameters, 226

Effects of Electrical Currents, 231

Contraindications and Precautions for Electrical
 Currents, 234

Adverse Effects of Electrical Currents, 237

Application Technique, 237

Documentation, 240

Chapter Review, 240

Glossary, 241

References, 243

12 **Electrical Currents for Muscle**

Contraction, 244

Michelle H. Cameron and Michelle Ocelnik

Effects of Electrically Stimulated Muscle

Contractions, 244

Clinical Applications of Electrically Stimulated Muscle

Contractions, 246

Contraindications and Precautions for Electrically
 Stimulated Muscle Contractions, 252

Application Techniques, 253

Documentation, 257

Chapter Review, 262

Glossary, 262

References, 263

13 **Electrical Currents for Pain Control**, 269

Michelle H. Cameron and Michelle Ocelnik

Mechanisms Underlying Electrical Current Use for
 Pain Control, 269

Clinical Applications of Electrical Currents for Pain
 Control, 272

Contraindications and Precautions for Electrical
 Currents for Pain Control, 273

Adverse Effects of Transcutaneous Electrical Nerve
 Stimulation, 273

Application Technique, 274

Documentation, 276

Chapter Review, 280

Glossary, 280

References, 281

14 **Electrical Currents for Soft Tissue**

Healing, 284

Michelle H. Cameron and Michelle Ocelnik

Mechanisms Underlying Electrical Currents for Tissue
 Healing, 285

Clinical Applications of Electrical Stimulation for Soft
 Tissue Healing, 286

Contraindications and Precautions for Electrical
 Currents for Tissue Healing, 289

Adverse Effects of Electrical Currents for Tissue
 Healing, 290

Application Techniques, 290

Documentation, 295

Chapter Review, 300

Glossary, 300

References, 300

15 **Electromyographic (EMG)**

Biofeedback, 304

Jason E. Bennett

Introduction, 304

Physiological Effects of EMG Biofeedback, 307

Clinical Indications for EMG Biofeedback, 309

Contraindications and Precautions for EMG
 Biofeedback, 311

Adverse Effects of EMG Biofeedback, 312

Application Technique, 313

- Documentation, 314
- Chapter Review, 319
- Glossary, 319
- References, 319

PART V Electromagnetic Agents, 323

- 16 Lasers, Light, and Photobiomodulation, 323**
 - History of Electromagnetic Radiation, 324
 - Physical Properties of Electromagnetic Radiation, 325
 - Clinical Indications for Photobiomodulation, 331
 - Contraindications and Precautions for Photobiomodulation, 333
 - Adverse Effects of Photobiomodulation, 335
 - Application Technique, 335
 - Documentation, 338
 - Chapter Review, 341
 - Glossary, 342
 - References, 342
- 17 Ultraviolet Therapy, 348**
 - Physical Properties of Ultraviolet Radiation, 348
 - Effects of Ultraviolet Radiation, 349
 - Clinical Indications for Ultraviolet Radiation, 351
 - Contraindications and Precautions for Ultraviolet Radiation, 353
 - Adverse Effects of Ultraviolet Radiation, 353
 - Application Techniques, 354
 - Documentation, 357
 - Ultraviolet Lamps, 357
 - Chapter Review, 359
 - Glossary, 360
 - References, 360

PART VI Mechanical Agents, 363

- 18 Shock Wave Therapy, 363**
 - Physical Properties of Shock Waves, 363
 - Effects of Shock Waves, 366
 - Clinical Indications for Shock Waves, 367
 - Contraindications and Precautions for Shock Waves, 370
 - Adverse Effects of Shock Waves, 371
 - Application Techniques, 372
 - Documentation, 374
 - Chapter Review, 378
 - Glossary, 378
 - References, 378

19 Hydrotherapy and Negative Pressure Wound Therapy, 380

- Physical Properties of Water, 381
- Physical Properties of Negative Pressure Wound Therapy, 384
- Physiological Effects of Hydrotherapy and Negative Pressure Wound Therapy, 384
- Additional Physiological Effects of Hydrotherapy, 385
- Clinical Indications for Hydrotherapy and Negative Pressure Wound Therapy, 387
- Additional Clinical Indications for Hydrotherapy, 390
- Contraindications and Precautions for Hydrotherapy and Negative Pressure Wound Therapy, 394
- Adverse Effects of Hydrotherapy, 398
- Adverse Effects of Negative Pressure Wound Therapy, 399
- Application Techniques, 399
- Safety Issues Regarding Hydrotherapy, 405
- Documentation, 405
- Chapter Review, 409
- Glossary, 409
- References, 410

20 Traction, 414

Michelle H. Cameron and Tony Rocklin

- Effects of Traction, 415
- Clinical Indications for Traction, 417
- Contraindications and Precautions for Traction, 419
- Adverse Effects of Spinal Traction, 423
- Application Techniques, 423
- Documentation, 438
- Chapter Review, 444
- Glossary, 445
- References, 445

21 Compression, 448

- Effects of External Compression, 448
- Clinical Indications for External Compression, 449
- Contraindications and Precautions for External Compression, 456
- Adverse Effects of External Compression, 459
- Application Techniques, 459
- Documentation, 468
- Chapter Review, 472
- Glossary, 472
- References, 473

Appendix, 476

Index, 477

How to Use This Book

This book is intended primarily as a course text for those learning to use physical agents in rehabilitation. It was written to meet the needs of students learning about the theory and practice of applying physical agents and to help practicing rehabilitation professionals review and update their knowledge. This book describes the effects of physical

Part I: Introduction to Physical Agents includes this introductory chapter, followed by a chapter introducing the physiological effects of physical agents and their clinical use by various professionals.
