Acknowledgments	xvii
List of Abbreviations	xix
Introduction	1
 CHAPTER 1 The Basic Physics of Ultrasound	 5
Sound Waves	5
Describing Waves	9
Energy in a Sound Wave	11
Ultrasound Pulses	12
Energy Spectrum of a Pulse	13
Bandwidth	14
Quality Factor	16
Speed of Sound (C)	16
Characteristic Acoustic Impedance, Z_0	20
Energy in a Sound Wave	22
Decibels	23
 CHAPTER 2 The Interaction of Ultrasound with Tissue	 25
Reflection and Transmission at a Plane Interface	25
Specular Reflection	25
Reflection at an Angle and Refraction	27
Poor Visualisation	29
Scattering	30
Total Scattered Power	31
The Speckle Pattern	31
Attenuation	34
Attenuation Coefficient (α)	35
Summary	37
The Journey of the Ultrasound Pulse	37
User Control	37
Transmit Power	37
References	38

CHAPTER 3	Beam Shapes	39
Simple Beam Shape Model		40
Huygen's Wavelet Model and Diffraction		43
Focusing		44
Beam Forming with Transducer Arrays		47
Grating Lobes		48
Apodization		50
Beam Steering		50
Beam Shape and Beam Steering		52
Electronic Focusing		52
Resolution		54
Axial Resolution		55
Lateral Resolution		55
Resolution Versus Penetration		57
Clutter		58
Reference		58
CHAPTER 4	The Ultrasound Probe	59
The Transducer		59
Piezoelectric Effect		59
Single Crystal Technology		61
Resonant Frequency		62
Backing Layer		62
Matching Layer		63
Front Face Lens		65
Wide Band Transducers		65
Construction of an Array		66
CMUT Technology		66
1-D, 1.5-D, and 2-D Arrays		68
The Hanafy Lens		68
1.5-D Array		70
2-D Array		70
References		72
CHAPTER 5	Image Formation	73
Image Modes		74
A-Mode (Amplitude Mode)		74
M-Mode (Motion Mode)		74
B-Mode or Greyscale Image (Brightness Mode)		76
Linear Image Formation		76
Linear Array		76
Frame Rate		77
Curvilinear Array		77
Phased Array		78
Extended Field of View		78
Panoramic View		78
3D Imaging		80
Hand Scanning		80

Mechanical 3D Probe	80
2D Matrix Array	80
3D Image Display	81
Cine Loop	82
Endoprobes	82
Choosing A Probe	84
Focusing	84
Transmit Focus	84
Receive Focus	84
Increasing Frame Rate	86
Synthetic Aperture Imaging	86
User Control	86
Resolution/Penetration	86
Ultrasound Harmonics	89
Harmonic Imaging	90
Pros and Cons of Harmonic Imaging	91
Coded Excitation	92
References	94
 CHAPTER 6 The B-Mode Scanner	 95
Transmission Side of a Scanner	95
Beam Former	96
PRF – Pulse Repetition Frequency	96
User Controls	96
Transmit Power	96
Depth of Focus	96
Receive Side of a Scanner (R_x)	97
Beam Former	97
Gain	97
User Controls – Gain	98
Time Gain Compensation	98
Analogue to Digital Converter – ADC	99
Advantages of Digitising	101
Echo Detection	101
Dynamic Range and Transfer Function (Greyscale Mapping)	102
Dynamic Range	103
Transfer Function or Grey Scale Mapping	103
Contrast Resolution	106
User Controls	106
Image Memory	106
Frame Freeze	106
Read and Write Zoom	107
Read Zoom	107
Write Zoom	108
Image Processing	108
User Control	108
Exam Presets	108
Measurements	109

CHAPTER 7	Image Quality and Artefacts	111
Acoustic Window		111
Frame Rate: Frames Per Second (fps)		112
Interlacing Scan Lines		113
Interpolation – Writing in ‘Extra Lines’		114
Speckle		115
Frame Averaging or Persistence		116
User Control		117
Spatial Compound Imaging		117
Adaptive Filtering		118
Edge Enhancement		118
Contrast Resolution		118
Noise in an Image		119
Colour Enhancement of Greyscale Images		120
Human Visual Perception		120
How to Set Up a Monitor		121
Image Flicker		121
Ambient Lighting		121
Artefacts		122
Assumptions		122
Speed of Sound Artefacts		122
Refraction		122
Axial Misplacement		123
Attenuation Artefacts		127
Poorly Adjusted Time Gain Control (TGC)		127
Acoustic Shadowing		127
Post Cystic Enhancement		128
Shadowing from the Transducer Surface		129
Reflection Artefacts		130
Mirror Image Artefact		130
Reverberation		131
Reverberation Artefact		131
Probe – Interface Reverberation		131
Ringdown		131
Comet Tail or Ringing		132
Anisotropy		134
Beam Shape Artefacts		135
Slice Thickness Artefact		135
Side Lobes and Grating Lobes		136
Temporal Artefacts		137
Image Blurring		139
Final Example		139
References		140
CHAPTER 8	Principles of Doppler Ultrasound	141
The Doppler Effect		141
The Doppler Equation		143
Duplex Ultrasound		144

CW Doppler	145
Block Diagram of CW Doppler Instrument	146
Detection of Direction of Flow	146
The Doppler Waveform Display (Sonogram)	148
Examples	148
1. Slowly Moving Blood Flow in a Vessel	148
2. Fast Moving Blood Flow in a Vessel	149
CW Doppler Summary	152
Pulsed Wave Doppler (PW Doppler) and Range Gating	152
Detection of the Doppler Signal	153
Block Diagram of Pulsed Doppler Instrument	
with Sonogram Display	154
Aliasing	154
Appearance of Aliasing on the Sonogram	156
Observing Low Velocities	158
PW Doppler Summary	159
The PW Doppler Pulses	159
Intrinsic Spectral Broadening (ISB)	160
Question: What Doppler Angle Should We Use?	162
User Controls	163
Angle Correction	163
Doppler Beam Steering	163
Length and Depth of Sample Volume	163
Scale	164
Sweep Speed	164
Baseline Offset and Invert	165
Doppler Transmit Power	165
Doppler Gain	165
Peak Velocity Envelope	165
Autotrace	166
Average Velocity	167
Doppler Artefacts	170
Aliasing	170
Intrinsic Spectral Broadening	170
Wall Thump	171
User Control	172
Waveform Ghosting	172
Shadowing	173
References	173
 CHAPTER 9 Principles of Colour Doppler Ultrasound	 175
Autocorrelation	177
Colour Scale	180
Frame Rate	181
User Controls	181
Colour Box	181
Frame Averaging	182
Sampling	182

CDU and the Doppler Angle	183
Colour Aliasing	183
User Controls	185
Scale	185
Invert	186
Discrimination of Stationary Targets	187
Imaging Small Vessels	187
User Controls	188
Wall Filter	188
B-Mode Priority	188
Power Doppler (PD)	188
CDU Artefacts	190
Aliasing	190
Shadowing	190
Wall Discrimination	192
Flash Artefact	192
Mirror Image	192
Twinkle Artefact	192
Temporal Artefact	192
Colour Sensitivity	192
Presets	194
Colour M-Mode	194
Tissue Doppler Imaging (TDI)	194
Myocardial Strain Imaging	197
Strain	197
Strain Rate (SR)	197
Using TDI to Measure Strain	198
Speckle Tracking Echocardiography STE	199
STE Display	201
References	202
 CHAPTER 10 Making Measurements	 203
Accuracy	204
Precision	204
How Accurate or Precise Do We Need To Be?	205
Reproducibility	205
Systematic and Random Errors	206
Random Errors	206
Ultrasound Measurements in Practice	206
Physical Constraints	207
Scaling	207
Caliper Accuracy	207
Image Resolution	208
Sonographer-Based Constraints	209
Principles for Making Reliable Measurements	209
Target Visualisation	209
Frame Freeze	209
Use First Interface	209

Measurements Protocols	209
Actual Measurements	211
Factoring Variability	211
Ultrafine Measurements	212
Measurement of Circumference, Area, and Volume	213
Direct Measurement	213
Assume a Simple Shape	213
Use a Simplified Model of the Target	214
Slicing Models	214
Surface Segmentation and Automated Methods	214
Doppler Waveform Measurements	216
Image/Sonogram Size	216
Scale	216
Gain	217
Freeze the Image	217
Weak Signals	217
Doppler Angle	217
Waveform Indices	219
Pulsatility Index (PI)	219
Resistance Index (RI)	220
A/B Ratio	220
Colour Doppler Ultrasound	221
Measurement of Volume Flow Q	221
Cross-Section Area A	222
Average Velocity	222
References	224
 CHAPTER 11 Safety and Quality Assurance	 225
Energy, Power, and Intensity	226
Measuring Intensity	227
Intensity	227
Factors Affecting Damage Potential	230
Thermal Effects	231
Thermal Index (TI)	232
TIS	233
TIB	233
TIC	233
Transducer Self-Heating	234
Nonthermal Effects	235
Radiation Force	235
Streaming	235
Cavitation	236
Mechanical Index (MI)	239
ALARA	239
Contrast Agents	240
Clinical Risk	240
Bio-effects from Ultrasound	240
Quality Assurance and Routine Checks	241

Suggested Routine User Checks	241
Annual Service	243
The Use of Test Objects	244
Personal Risk Management	245
WRRSI Risk Mitigation	245
In Summary	246
New Techniques in Ultrasound	246
References	247

CHAPTER 12 Advanced Topics	249
Contrast Agents (CA)	249
Behaviour of Bubbles in the Ultrasound Field	251
Contrast Agent Harmonics	252
Amplitude Modulation	253
Pulse Inversion	254
Flashing	254
Advanced Micro-Bubble Techniques	255
B-Flow Blood Vessel Imaging	256
Doppler Measurement of Pressure Gradients	260
Advanced Image Processing	261
Artificial Intelligence	261
Segmentation	262
Examples (1–3)	262
Computer-Aided Diagnosis (CAD)	263
Feature Identification	266
Examples	266
Classification	266
Deep Learning	266
Diagnosis with Cad	268
Examples of CAD	269
Fusion Imaging	269
Needle Visualisation and Guidance	271
References	274

CHAPTER 13 Ultrafast Ultrasound	277
Synthetic Aperture Imaging (SA)	278
Plane-Wave Beamforming	279
Summary	283
Speed of Sound Correction	283
Benefits	286
Ultrafast Doppler	286
Ultrafast Colour Doppler (UFCD)	286
Microvascular Imaging	289
Pulsed Wave Doppler (PW)	290
Vector Flow Imaging (VFI)	291
The Flow Vector	291
Directional Beam Forming	292

Transverse Oscillation (TO)	293
Display of Flow Vectors	296
Vector Display	296
Colour Display	296
References	298
CHAPTER 14 Elastography	301
Background Theory	302
Elastography	303
Methods of Applying The Distorting Force	303
Strain Elastography (SE)	303
SE with Manual or Physiological Palpation	303
User Controls	307
Frequency	307
Frame Rate	307
Tracking Window	307
Frame Reject	307
Noise Reject	307
Line Density	308
Frame Averaging	308
Dynamic Range	308
Colour Map	308
Colour Blend	308
SE Artefacts	310
Stress Concentration Artefacts	312
Edge Enhancement Effects	312
Appearance of Cysts	313
Blue/Green/Red Artefact	314
Shadowing	314
Acoustic Radiation Force Impulse Imaging (ARFI Imaging)	314
Pros and Cons of ARFI	315
Strain Ratio	316
Shear Wave Elastography (SWE)	316
Background Theory	316
Point SWE (PSWE)	320
Supersonic Shear Imaging (SSI)	322
Shear Wave Compounding	323
SWE Artefacts	325
Bang Artefact	325
References	326
Appendix 1: Knobology	329
Appendix 2: Handling Equations and Decibels	335
Appendix 3: The Unfocused Transducer Beam Shape	345
Index	349
