

CONTENTS

Preface. v

I. Engine Types and Construction 1

II. Idealized Cycles 33

III. Thermodynamic-calculation Methods for Combustion-engine Cycles 48

IV. Combustion 75

V. Cycle Analysis 123

VI. Fuel Metering and Injection 158

VII. Ignition 197

VIII. Fuels and Lubricants 214

IX. Intake and Exhaust Manifolds 256

X. Lubrication 270

XI. Cooling 289

XII. Supercharging 322

XIII. Performance Analysis 337

XIV. Gas Turbines 361

XV. Engine Installations 387

XVI. Overhaul and Maintenance 405

Appendix. 425

Index. 429
