

Contents

1	Introduction	1
1.1	Historical Development of the Subject	1
1.2	The Sinusoids	4
1.3	Orthogonal Functions	15
1.3.1	Set of Orthogonal Functions	16
1.4	Odd and Even Mathematical Functions	18
1.5	Series Expansion of a Function	20
1.6	Complex Variables	22
1.7	Differentiation and Integration of Complex Numbers	29
1.8	Useful Mathematical Formulae	32
1.8.1	Trigonometrical Relations	32
1.8.2	Hyperbolic Relations	33
1.8.3	Taylor Series Expansion	34
1.8.4	Standard Derivatives	34
1.8.5	Standard Integrals	36
1.9	Closure	38
	Reference	39
2	Signals and Systems	41
2.1	Signals	41
2.2	Basic Signal Examples	43
2.2.1	Sinusoids	44
2.2.2	Exponential and Geometric Signals	44
2.2.3	Box and <i>rect</i> signals	45
2.2.4	Kronecker Delta Function	47
2.2.5	Heaviside Step Function	47
2.2.6	Signum Function	50
2.2.7	<i>sinc</i> Function	50
2.2.8	$\wedge(x)$ Function	51
2.2.9	Gaussian Function	52
2.2.10	Bessel Function	52

2.2.11	Random Signals	54
2.3	Systems	54
2.3.1	Linearity.....	59
2.3.2	Time-Invariant Systems	60
2.3.3	Causality	61
2.3.4	Stability	62
2.3.5	Memory	63
2.4	Noise	64
2.5	Closure	64
	Reference	65
3	The Fourier Series	67
3.1	Observation from Nature.....	67
3.2	Fourier Series Expansion of Odd and Even Functions	79
3.3	Complex Number Representation of Fourier Series	81
3.4	The Double Fourier Series	83
3.5	Fourier Series Expansion of Some Common Signals.....	85
3.6	Closure	111
	References	112
4	The Fourier Analysis	113
4.1	Fourier Series to Fourier Analysis.....	113
4.2	Existence of Fourier Integral.....	124
4.3	Properties of Fourier Transform	126
4.3.1	Physical Realization of Fourier Transform	126
4.3.2	Transform Pair and Duality in Fourier Transform	128
4.3.3	Linearity in Fourier Transform.....	131
4.3.4	Constant Multiplication with Fourier Transform.....	132
4.3.5	Symmetric Properties of Fourier Pair.....	133
4.3.6	Time Delay or Space Shift in Fourier Transform	133
4.3.7	Frequency or Wavenumber Shift in Fourier Transform...	135
4.3.8	Stretching and Shrinking Phenomenon in Fourier Transform	139
4.3.9	Differentiation of Fourier Transform Pair	141
4.4	Closure	141
	References	142
5	Fourier Transform of Generalized Functions	143
5.1	The Universality of the Fourier Transform.....	143
5.1.1	Rapidly Decreasing Function	145
5.1.2	Dirac's Delta Function	147
5.1.3	Distribution Induced by Functions.....	151
5.1.4	Derivative of Distributions	155
5.1.5	Few More Properties of Distributions	157
5.1.6	Dirac's Comb or Sha Function	159
5.2	Fourier Transform of Some Standard Functions	164

5.3	Closure	167
	References	168
6	The Laplace Transform	169
6.1	History of Laplace Transform	169
6.2	Definition of the Laplace Transform	171
6.3	Existence and Uniqueness of Laplace Transforms	173
6.4	Important Properties of Laplace Transform	176
6.4.1	Linearity of the Laplace Transform	177
6.4.2	Heaviside's First Shifting Theorem	181
6.4.3	Time Shifting (t-Shifting): Second Shifting Theorem	182
6.4.4	Scaling Property of the Laplace Transform	183
6.4.5	Laplace Transform of Impulse Response	186
6.5	The Inverse Laplace Transform	187
6.5.1	Partial Fraction Decomposition Method	188
6.5.2	Contour Integration of the Laplace Inversion Integral	190
6.5.3	Heaviside's Expansion Theorem for Inverse Laplace Transform	196
6.6	Derivatives and Integration of Laplace Transforms	197
6.6.1	Laplace Transform of Derivatives of a Function	198
6.6.2	Laplace Transform of the Integral of a Function	206
6.6.3	Derivative of the Laplace Transform of a Function	212
6.6.4	Integral of the Laplace Transform of a Function	213
6.7	Initial and Final Value Theorems of the Laplace Transform	214
6.7.1	Initial Value Theorem (IVT)	215
6.7.2	Final Value Theorem (FVT)	215
6.8	Laplace Transform for System Modeling	216
6.9	The Bilateral Laplace Transform	223
6.10	Laplace Transform of Some Standard Functions	225
6.11	Closure	227
	Reference	228
7	Discrete Fourier Transform	229
7.1	Introduction	229
7.1.1	Signal Processing	230
7.1.2	Communications	230
7.1.3	Medical Imaging	231
7.1.4	Scientific Research	231
7.1.5	Economic and Financial Analysis	231
7.2	Discrete Representation of Data	231
7.3	From Continuous to Discrete Fourier Transform	233
7.3.1	Linearity of DFT	241
7.3.2	Circular Shift of a Sequence	241
7.3.3	Circular Shift of a Spectrum	242
7.3.4	Circular Time Reversal	243
7.3.5	Symmetry Relations of DFT	243

7.3.6	Difference of Sequence and Its DFT.....	244
7.3.7	Simultaneous Calculation of Real Transforms	244
7.3.8	Upsampling of a Sequence	245
7.4	Fast Fourier Transform.....	246
7.4.1	Cooley-Tukey Algorithm.....	247
7.4.2	Mixed Radix Fast Transforms.....	251
7.5	Spectrum Analysis	255
7.6	Sampling and Interpolation	257
7.7	Windowing	261
7.7.1	Rectangular Window	263
7.7.2	Hann (or Hanning) Window.....	263
7.7.3	Hamming Window.....	264
7.7.4	Blackman Window	264
7.7.5	Gaussian Window	264
7.8	Noise Characterization	266
7.8.1	White Noise.....	266
7.8.2	Pink Noise	266
7.8.3	Brown Noise (Red Noise)	267
7.8.4	Blue Noise (Azure Noise)	267
7.8.5	Violet Noise (Purple Noise).....	267
7.8.6	Gray Noise	268
7.8.7	Black Noise	268
7.9	Quantization	268
7.10	Practicality in DFT Analysis.....	271
7.11	Closure.....	272
	References.....	272
8	Convolution, Cross-correlation, and Stochastic Analysis	275
8.1	Introduction.....	275
8.2	Convolution.....	276
8.3	Discrete Convolution	284
8.4	Application of Convolution	287
8.4.1	Convolution to Calculate Inverse Laplace Transform.....	288
8.4.2	Convolution for Solution of Volterra Integral	292
8.4.3	Convolution for Signal Filtering	293
8.4.4	Convolution for Time Series Analysis	295
8.4.5	Image Processing	297
8.5	Circular Convolution	306
8.6	Introduction to Probability Theory	309
8.6.1	History of Probability Theory.....	311
8.6.2	Grammar of Probability Theory	316
8.6.3	Joint Probability Distributions	328
8.6.4	Correlations and Random Signals	335
8.6.5	Ensembles and Expected Values of a Random Signal	339
8.6.6	Systems and Random Signal	342

8.7	Convolution and Probability Distribution	345
8.7.1	Central Limit Theorem	350
8.8	Cross-correlation	355
8.8.1	Mathematical Properties of Cross-correlation.....	358
8.9	Closure	362
	References	363
9	Linear Systems	365
9.1	Description of a System.....	365
9.2	Linear System	366
9.3	Translation or Shifting	369
9.4	Cascading Linear Systems	370
9.5	The Impulse Response	371
9.6	Linear Time-Invariant (LTI) Systems	372
9.7	Eigenfunctions.....	375
9.8	Translating in Time and Plugging into L	377
9.9	The Fourier Transform and LTI Systems.....	378
9.10	Causality	380
9.11	System Stability	382
9.12	Matched Filters	387
9.13	Closure	389
	References	390
10	Z Transform	391
10.1	History of Z Transform	391
10.2	Definition of the Z Transform	392
10.3	Basic Operational Properties of Z Transforms	404
10.3.1	Linearity of Z Transforms	404
10.3.2	Translation	406
10.3.3	Multiplication	407
10.3.4	Division	408
10.3.5	Convolution	408
10.3.6	Parseval's Formula.....	410
10.3.7	Initial Value Theorem	410
10.3.8	Final Value Theorem	412
10.3.9	The Z Transform of Partial Derivatives	413
10.4	The Inverse Z Transform	413
10.5	Applications of Z Transforms	417
10.5.1	Solution of Difference Equation	417
10.5.2	Transfer Function	422
10.5.3	Characterization of a System by Its Poles and Zeros	424
10.5.4	Frequency Response and the Locations of the Poles and Zeros	425
10.5.5	System Stability	429
10.5.6	Summation of Infinite Series	429
10.6	Closure	432
	References	433

11	Higher-Dimensional Fourier Analysis	435
11.1	Introduction.....	435
11.2	Properties of Multidimensional Fourier Transform.....	438
11.3	Multidimensional Fourier Transform of Separable Functions	443
11.4	Radial Functions in 2D and Their Fourier Transforms	446
11.5	Higher-Dimensional Impulse Response.....	451
11.6	Higher-Dimensional Sampling	454
11.7	Closure.....	457
	Reference.....	458
12	Fourier Analysis for the Solution of Differential and Integral Equations	459
12.1	Introduction.....	459
12.2	Fourier Transforms for the Solution of Ordinary Differential Equations	462
12.3	Fourier Transforms for the Solution of Integral Equations	472
12.4	Fourier Transforms for the Solution of Partial Differential Equations	477
12.4.1	The Principle of Superposition of Solutions	477
12.4.2	The Concept of Variable Separation Method in PDE Solutions	482
12.4.3	One-Dimensional Heat Equation	483
12.4.4	Two-Dimensional Heat Equation	488
12.4.5	Solutions for the 2D Laplace Equations with Boundary Conditions	490
12.4.6	The One-Dimensional Wave Equation	496
12.4.7	Classification of Partial Differential Equations	504
12.5	Closure.....	510
	References.....	511
