

Sekcia I: Aplikovaná biológia/Applied Biology

Baklanova, T., Vozárová, A., Seman, M.

7

Antimicrobial resistance and susceptibility of environmental isolates of the genus *Vibrio*

Bariová, K., Gerši, Z.

9

Monitoring the presence of selected targets on the seed surface of vegetable from the *Brassicaceae* family

Blažeková, T., Jedlička, A., Vešelényiová, D.

11

Utilizing the CRISPR-CAS9 system to study the function of the gene encoding beta-1,3-glucan synthase in *Euglena gracilis*

Boldiš, M., Alaxin, P., Mrkvová, M., Glasa, M.

13

Evaluation of the genetic diversity of Plum Pox Virus (PPV, genus *Potyvirus*) at the regional level

Čáková, V., Glasa, M., Alaxin, P.

15

Molecular detection and characterization of grapevine Pinot gris virus

Domiňáková, H., Alaxin, P., Glasa, M.

17

Viroids - unique RNA pathogens of grapevine

Genšorová, P., Krajčovič, J.

19

Effect of fluoroquinolone antibacterial drugs on the chloroplast system of the flagellate *Euglena gracilis*

Gunárová, D., Üргеová, E.

21

Antimicrobial properties of silver nanoparticles prepared by green synthesis

Klokočíková, I., Maliar, T.

25

The study of inhibition activity of plant extract on SARS-CoV-2 M protease

Kotradyová, L., Uváčková, L.

27

Monitoring the effect of NiCl_2 on the amount of proline in *Euglena gracilis* cells

Kuklina, O., Mrkvová, M., Alaxin, P., Predajňa, L., Glasa, M.

29

Wild plant species as reservoirs of cucumber mosaic virus

Paprčková, A., Uváčková, Ľ. 31

Monitoring the effect of cultivation in the dark on the metabolism of *Euglena gracilis*

Šalantayová, N., Uváčková, Ľ. 33

Biochemical analyzes of barley seeds germinated at elevated temperature

Trusová, K., Vozárová, A., Seman, M. 35

Prevalence, isolation, and identification of emergent pathogens of the taxon *Vibrionaceae* from surface waters of Slovakia

Ťurgeová, E., Trčková, M. 37

Antimicrobial potential of the components of plant essences

Vrecková, Z., Konečný, M. 39

Identification of causal DNA predispositions in patients with autism spectrum disorders

Sekcia II: Aplikovaná chémia/Applied Chemistry

Čierna, D., Gašparová, R. 43

4-oxo-4H-chromene-3-carbaldehyde as the reagent in new heterocycles synthesis

Kendrová, D., Gašparová, M., Eckstein, A., Tokárová, Z. 45

Development of the novel type of mono-/di-/tert- and tetrapyrroles with perspectives towards research/applications in photodynamic therapy and related areas

Košíková, V., Nemeček, P. 47

Development and validation of the HPLC method for determination of phytic acid in plant samples

Maliarová, M., Kudláčová, S. 49

Avenanthramides as pharmacologically interesting substances

Rusová, R., Rajnák, C., Titiš, J., Samoľová, E. 51

Synthesis and characterisation of Cu(II) complexes with various nuclearity

Síkel'a, L., Purdešová, A., Jurčová, A. 53

Optimization of chromatographic conditions for the determination of selected pharmaceuticals

Sokol, J., Tóthová, K. 55
Determination of biogenic amines in wine samples by liquid chromatography

Šabová, M., Maliar, T. 57
CADD and antibacterial activity of quinoline derivatives

Sekcia III: Aplikovaná informatika/Applied Informatics

Bartek, M., Dirgová Luptáková, I. 61
New strategies for attacking central nodes of complex rated networks

Brlej, I., Ölvecký, M. 63
Detection tools of deepfake photos

Hafner, P., Čerňanský, M. 65
Human-computer interaction for inclusion: a mobile application for piano playing

Holeš, P., Beňo, M. 67
Exploring indexing and querying strategies for efficient data access in a custom database system

Lietava, J., Huraj, L. 69
Dataset creation and generation of DDoS attacks on Fibaro Home Center 3 for cybersecurity research

Ondrejka, R., Gabriška, D. 71
Modification of the scrum software development methodology for use by a single developer

Šalgovič, I., Jurinová, J. 73
Utilizing design patterns in game development

Uhrina, J., Jurinová, J. 75
Development of a prototype card multiplayer game

Vaský, S., Jurinová, J. 77
Extension of custom 3D game engine with volumetric fog and light rendering

Sekcia IV: Biotechnológia/Biotechnology

Baťová, Z., Ondrejovič, M., Chmelová, D.

81

PHB production by *Halomonas halophila*

Habdák, J., Kaňuková, Š., Kraic, J.

83

In vitro micropropagation of country mallow (*Sida cordifolia* L.)

Lenkavská, K., Kaňuková, Š., Gubišová, M., Kraic, J.

85

Pre-treatment of marigold explants for increasing the number of stem cells in callus

Mišiaková, H., Moravčíková, J.

89

Synthesis of copper nanoparticles using plant extracts

Neverišová, M., Ondrejovič, M., Chmelová, D.

91

Biotransformation of diclofenac by laccase from *Trametes versicolor*

Rond'ošová, S., Ondrejovič, M., Chmelová, D.

93

Laccase production by the white-rot fungus *Pleurotus ostreatus* under solid-state cultivation conditions

Scherrens, J., Kaňuková, Š., Kraic, J.

95

Callus cultures of thornapple induction induced from roots

Sremaňáková, I., Ondrejovič, M., Chmelová, D.

97

Use do laccase from *Pleurotus ostreatus* in the removal of synthetic monoazo dyes

Šimiaková, M., Chmelová, D., Ondrejovič, M.

99

Proteases produced by the cereal sourdough microbiota to improve the hydrolysis of cereal gluten

Tkáčiková, S., Moravčíková, J.

101

Synthesis of silver nanoparticles using plant extracts

Sekcia V: Inžinierstvo životného prostredia/Environmental Engineering

Hlubina, P., Matušíková, I., Hančinský, R.

105

Effect of mycorrhizal fungi on the bioaccumulation of metals when growing crops on moderately polluted soils

Porteleky, A., Adamcová, V., Vavrinová, L., Valica, M., Horník, M. 107

Effect of soil nutrients on the stability of superabsorbent polymers
as a tool for climate change mitigation

Rezbárik, Š., Valica, M., Adamcová, V., Horník, M. 109

Solidification of hazardous wastes into geopolymer matrices
