

## CONTENTS

Preface ---- 9

### 1. THE NETWORK REVOLUTION IN THE MENTAL LEXICON ---- 13

1.1 Views of lexical connectivity ---- 14

1.1.1 Phonological neighbors ---- 14

1.1.1.1 Spoken word recognition ---- 18

1.1.1.2 Spoken word production ---- 21

1.1.2 The “cauldron of lexical soup” ---- 22

1.1.3 Complex systems approach to the lexicon ---- 23

1.2 Phonological networks ---- 24

1.2.1 Micro-level analysis ---- 26

1.2.1.1 Degree centrality ---- 26

1.2.1.2 Closeness centrality ---- 27

1.2.1.3 Betweenness centrality ---- 28

1.2.1.4 Eigenvector centrality ---- 29

1.2.2 Assortativity by degree ---- 29

1.2.3 Macro-level analysis ---- 30

1.2.3.1 Network components ---- 30

1.2.3.2 Connectivity ---- 32

1.2.3.3 Neighborhood clustering ---- 33

1.2.3.4 Small-worldness ---- 35

1.2.4 Meso-level analysis ---- 36

1.2.5 Activation spreading in the phonological network ---- 38

1.2.6 Outlook ---- 44

### 2. MODELING NETWORKS ---- 47

2.1 Constructing phonological networks ---- 48

2.1.1 ESL lexica ---- 49

2.1.2 L1 British English network ---- 52

2.2 Network properties ---- 52

2.3 Macro-level network statistics ---- 55

2.3.1 Network connectivity ---- 56

2.3.2 Giant components, lexical islands, and singleton words ---- 57

2.3.2.1 Lexical characteristics of ESL network parts ---- 61

2.3.2.2 Lexical characteristics of L1 British English network parts ---- 65

2.3.3 Assortativity by degree ---- 67

2.3.4 Phonological distances: Edge weights ---- 69

2.3.5	Diameters and average path lengths in the giant components	70
2.4	Micro-level centralities	71
2.4.1	Small-worldness	78
2.4.2	Phonemic inventories and neighborhood formation	79
2.5	Meso structure of the networks: Communities	83
2.5.1	ESL networks	83
2.5.2	L1 British English network	88
<b>3.</b>	<b>EVOLVING NETWORKS</b>	<b>91</b>
3.1	Theoretical approaches to network growth	92
3.1.1	Random and scale-free network growth	92
3.1.2	Evolvability and robustness of networks	95
3.1.2.1	Evolving networks	95
3.1.2.2	Robustness measures	96
3.1.3	Growing scale-free networks	98
3.1.3.1	Barabási-Albert model	98
3.1.3.2	Fitness model	100
3.1.3.3	Internal linking: "double preferential attachment"	103
3.1.3.4	Aging effects and declining networks	104
3.1.3.5	Accelerated growth	105
3.1.3.6	Local-world networks	105
3.1.3.7	Uniform and preferential attachment	106
3.2	Growing phonological networks	107
3.2.1	Growing nodes in the learner networks	110
3.2.1.1	Network parts	110
3.2.1.2	Community growth	127
3.2.2	Growth probability algorithms	128
3.2.2.1	Preferential attachment probability	128
3.2.2.2	Fitness probability	130
3.2.2.3	Preferential attachment and fitness: PAFit	132
3.2.2.4	Hybrid model of uniform and preferential attachment	133
3.2.2.5	Statistical assessment	135
3.2.3	Developmental growth trends	145
3.2.3.1	Growth fluctuations: Aging effects	145
3.2.3.2	Initial attractiveness	146
3.2.3.3	First-mover-advantage	151
3.2.4	Growth principles in communities	151
3.2.5	Summary	156
<b>4.</b>	<b>CONCLUSION</b>	<b>159</b>
4.1	Utility of network science for lexical research	160
