<i>Foreword by Prof. Sangeeta Shukla</i>	xvii
<i>Foreword by Prof. Akbar Masood</i>	xix
<i>Preface</i>	xxi
<i>Acknowledgments</i>	xxiii
1. Introduction to Toxicology	1
1.1 Introduction	1
1.2 Scope of Toxicology	3
1.3 Brief History of Toxicology	4
1.4 Toxicology and Its Relations with Other Sciences	5
2. Toxicology: Disciplines and Importance	9
2.1 Disciplines of Toxicology	9
2.1.1 Descriptive Toxicology	9
2.1.2 Analytical Toxicology	11
2.1.3 Mechanistic Toxicology	12
2.1.4 Regulatory Toxicology	13
2.1.5 Clinical Toxicology	13
2.1.6 Occupational Toxicology	14
2.1.7 Forensic Toxicology	14
2.1.8 Environmental Toxicology	15
2.1.9 Food Toxicology	15
2.1.10 Toxicogenomics	16
2.1.11 Nanotoxicology	16
2.2 Importance of Toxicology	17
3. Navigating Toxicity: Concepts and Principles	19
3.1 Introduction to Toxicants	19
3.2 Occurrence of Toxicants	20
3.3 Exposure of Toxicants	20
3.3.1 Chemical Exposure Scenarios	20
3.4 Localization of Toxicity	22
3.4.1 Local Toxicity	22
3.4.2 Systemic Toxicity (Target Organ Toxicity)	23

3.5	Chemical Interactions	26
3.6	Dose–Response Relationship	26
3.6.1	Measurement of Dose–Response Relationship	28
3.7	Movement of Toxicants in the Environment	31
4.	Xenobiotics and Their Biotransformation/Metabolism	35
4.1	Introduction	35
4.2	History	36
4.3	Classification of Xenobiotics	36
4.4	Transport System of Xenobiotics	37
4.4.1	Passive Diffusion	37
4.4.2	Filtration	39
4.4.3	Carrier-Mediated Transport	39
4.4.4	Engulfing by the Cell (Endocytosis)	40
4.5	Absorption Pathways	40
4.5.1	Gastrointestinal Tract	41
4.5.2	Respiratory Tract	43
4.5.3	Skin	44
4.6	Permeability Barriers and Detoxification	45
4.7	Biotransformation and the Enzymes	46
4.7.1	Phase I (Degradation) Reactions	47
4.7.1.1	Oxidation	48
4.7.1.2	Microsomal oxidation	48
4.7.1.3	Non-microsomal oxidations catalyzed by enzymes in mitochondria, cytosol, and nuclei	49
4.7.1.4	Reduction	49
4.7.1.5	Microsomal reduction	50
4.7.1.6	Hydrolysis	50
4.7.2	Phase II (Conjugation) Reactions	50
4.7.2.1	Glucuronide formation	51
4.7.2.2	Sulfate conjugation	51
4.7.2.3	Methylation	51
4.7.2.4	Acetylation	51
4.7.2.5	Amino acid conjugation	52
4.7.2.6	Glutathione conjugation	52
4.7.2.7	Bioactivation	52

4.7.2.8	Epoxide formation	53
4.7.2.9	N-hydroxylation	53
4.7.2.10	Free radical and superoxide formation	54
4.8	Other Pathways	55
4.8.1	Activation in the GI Tract	55
4.9	Sites of Metabolism/Transformation of Xenobiotics	55
4.10	Factors Affecting Drug Metabolism	56
5.	Pesticide Toxicity	59
5.1	Introduction to Pesticides	59
5.2	Adverse Effects of Pesticides	60
5.3	Categories of Pesticides	61
5.3.1	Insecticides	61
5.3.1.1	Organophosphate insecticides	61
5.3.1.2	Carbamate insecticides	63
5.3.1.3	Organochlorine insecticides	63
5.3.1.4	Neonicotinoids	64
5.3.1.5	Fipronil	64
5.3.1.6	Amitraz	65
5.3.1.7	Pyrethrins and pyrethroids	65
5.3.1.8	Rotenone	66
5.3.1.9	Nicotine	66
5.3.2	Herbicides	67
5.3.3	Fungicides	68
5.3.4	Rodenticides	69
5.3.5	Fumigants	71
5.4	Bioaccumulation and Biomagnification	71
6.	Heavy Metal Toxicity	73
6.1	Introduction to Heavy Metals	73
6.2	Metals of Major Toxicological Concern	74
6.2.1	Arsenic	76
6.2.1.1	Environmental occurrence, industrial production, and use	76
6.2.1.2	Potential for human exposure	76
6.2.2	Cadmium	78
6.2.2.1	Environmental occurrence, industrial production, and use	78

6.2.2.2	Potential for human exposure	78
6.2.3	Chromium	79
6.2.3.1	Environmental occurrence, industrial production, and use	79
6.2.3.2	Potential for human exposure	80
6.2.4	Lead	82
6.2.4.1	Environmental occurrence, industrial production, and use	82
6.2.4.2	Potential for human exposure	82
6.2.5	Mercury	84
6.2.5.1	Environmental occurrence, industrial production, and use	84
7.	Toxicity Tests and Antidotal Therapy	87
7.1	Introduction	87
7.2	Toxicity Testing	87
7.3	Types of Toxicity Testing	88
7.3.1	Acute Toxicity	88
7.3.1.1	Types of acute toxicity	89
7.3.1.2	Importance of toxicity studies	90
7.3.2	Sub-acute Studies	91
7.3.2.1	Sub-chronic toxicity testing	91
7.3.3	Chronic Toxicity Testing	92
7.4	Concluding Remarks and Future Directions	93
7.5	Antidotal Therapy	94
7.5.1	How Does an Antidote Work?	94
8.	Endocrine Disruption: Chemicals and Hormonal Systems	101
8.1	Historical Perspectives	101
8.1.1	The Thalidomide Tragedy and DES Controversy	102
8.2	Hormonal Imbalance	103
8.3	Properties of Endocrine Disrupters	104
8.4	Environmental and Health Impact of Endocrine Disrupters	105
8.4.1	Fish and Fish-Eating Birds	106
8.4.2	Mollusks	107
8.4.3	Marine Mammals	107

8.4.4	Reptiles	108
8.4.5	Terrestrial Mammals	108
8.4.6	Humans	109
9.	Medical Toxicity and Pathology	111
9.1	Introduction	111
9.2	Definition	111
9.3	Absorption, Distribution, Metabolism, and Excretion (ADME)	113
9.4	Organ-Specific Toxicity	115
9.4.1	Hepatotoxicity	115
	9.4.1.1 Major toxic responses of the liver	119
	9.4.1.2 Major hepatotoxicant classes	123
9.4.2	Nephrotoxicity	129
	9.4.2.1 Major human nephrotoxics	134
9.4.3	Neurotoxicity	136
	9.4.3.1 Agents that act on the neuron	139
	9.4.3.2 General population exposure to environmental neurotoxics	141
9.4.4	Cardiotoxicity	141
	9.4.4.1 General considerations	141
	9.4.4.2 Toxic effects on the heart	142
	9.4.4.3 Cardiomyopathy	143
	9.4.4.4 Interference with nucleic acid synthesis and DNA damage	144
	9.4.4.5 Arrhythmias	144
	9.4.4.6 Myocardial depression	145
	9.4.4.7 Toxic effects on blood vessels	145
	9.4.4.8 Vasoconstriction and vasodilation	146
	9.4.4.9 Fibrosis	147
	9.4.4.10 Tumors	147
9.4.5	Reproductive Toxicity	147
	9.4.5.1 Disruption of male reproduction by toxicants	148
	9.4.5.2 Disruption of female reproduction by toxicants	151

10. Air Pollution	155
10.1 Introduction	155
10.2 Importance of Air Quality for Human Health and the Environment	156
10.3 Historical Context and Evolution of Air Pollution Concerns	157
10.4 Sources of Air Pollution	158
10.5 Major Air Pollutants	160
10.5.1 Domestic Air Pollutants	163
10.6 Health Impacts of Exposure	164
10.7 Environmental Impacts	165
10.7.1 Effects on Ecosystems	165
10.8 Greenhouse Gases and Their Role in Climate Change	166
10.9 Acid Rain and Its Consequences	168
10.10 Ozone Depletion in the Stratosphere	168
10.11 International Efforts and Agreements	169
10.12 Case Studies of Successful Pollution Control Measures in Different Countries	170
10.13 Mitigation and Control Strategies	172
10.13.1 Role of Plants in Mitigating Air Pollution	173
11. Water Pollution	175
11.1 Introduction	175
11.2 Definition	176
11.3 Sources of Water Pollution	176
11.4 Types of Water Pollutants	176
11.5 Indicators of Water Pollution	178
11.6 International Standards for Drinking Water	179
11.7 Impacts of Water Pollution	180
11.8 Case Studies and Notable Incidents of Water Pollution and Its Consequences	181
11.9 Control Measures for Preventing Water Pollution	183
11.10 Treatment of Sewage	183
11.11 Ongoing Challenges in Addressing Water Pollution	184

11.12	Future Prospects for Water Quality Improvement	184
11.13	Role of Plants in Mitigating Water Pollution	185
12.	Ecotoxicology	189
12.1	Introduction	189
12.2	Ecosystem	190
12.3	Ecosystem Structure and Community Dynamics	191
12.3.1	Terrestrial Ecosystem	192
12.3.1.1	Grassland ecosystem	192
12.3.1.2	Forest ecosystem	193
12.3.1.3	Desert ecosystem	196
12.3.2	Aquatic Ecosystem	197
12.3.2.1	Freshwater ecosystems	197
12.3.2.2	Saline water ecosystem	202
12.4	Evolutionary Ecology	205
12.4.1	Interactions Between Species	207
12.4.1.1	Interspecific interaction	207
12.4.1.2	Intraspecific interaction	208
12.5	Biological Productivity	208
12.6	Energy Flow	209
12.7	Distribution of Toxicants in the Ecosystem	210
12.8	Terrestrial Ecotoxicology	211
12.8.1	Lethal Effect	213
12.8.2	Sublethal Effect	213
12.8.3	Non-lethal Effect	214
12.9	Aquatic Ecosystem	214
12.10	Effects of Toxicants on Terrestrial Ecosystem	215
12.11	Genotoxicity	216
12.11.1	Types of Mutation	217
12.11.2	Teratogenesis	219
13.	Biomarkers and Environmental Monitoring	221
13.1	Introduction	221
13.2	Environmental Toxicity	222
13.3	Biomonitoring	222
13.3.1	Validation of Biomarkers	226

13.4	Biomarkers of Environmental Toxicants Are Measures of Exposures and Effects	227
13.5	Applications	229
13.6	Case Study	229
13.7	Conclusion	230
14.	Role of Environmental Toxicology in Public Health	231
14.1	Introduction	231
14.2	Risk Assessment	232
14.3	Case Studies	236
14.3.1	A 35-Year-Old Carpenter with Peripheral Neuropathy and Skin Lesions (Arsenic Toxicity)	236
14.4	Exposure Pathways	237
14.5	Conclusion	238
15.	Carcinogenesis: Environmental Factors in Cancer Development	241
15.1	Introduction to Carcinogenesis	241
15.2	Chemical Carcinogens	241
15.3	Radiation and Carcinogenesis	243
15.4	Lifestyle and Behavioral Factors	244
15.5	Infectious Agents and Cancer	246
15.6	Hormonal Influences on Carcinogenesis	248
15.7	Epigenetic Modifications and Environmental Exposures	250
15.8	Gene-Environment Interactions	252
15.8.1	Gene-Environment Interactions in Carcinogenesis	253
15.9	Environmental Carcinogenesis and Public Health	254
16.	Toward A Sustainable Future: Mitigating Toxicological Risks	257
16.1	Introduction	257
16.1.1	Hazard Assessment	257
16.1.1.1	Bacterial mutagenesis test	258
16.1.1.2	DNA repair assay	259
16.1.1.3	Mammalian mutagenicity assays	259

16.1.1.4	Sister chromatid exchange assay	262
16.1.1.5	Cell transformation assay	262
16.1.1.6	Carcinogenicity testing in fish	262
16.1.1.7	Biological testing in rodents	263
16.1.2	Dose–Response Assessment	264
16.1.2.1	Biological extrapolation	264
16.1.2.2	Numeric extrapolation	265
16.1.2.3	Negative results	267
16.1.3	Exposure Assessment	267
16.1.4	Risk Characterization	268
16.2	Risk Assessment of Endocrine Disrupters	269
16.3	Ecological Risk Assessment	270
16.4	Adaptive Management Strategies in Response to Changing Environmental Conditions	271
16.5	Use of Ecological Restoration to Mitigate the Impacts of Pollution	272
16.6	Incorporation of Habitat Management in Polluted Ecosystems	273
16.7	Case Studies Highlighting Successful Restoration Projects	275
16.8	Mitigating Ecotoxicological Risks	277
16.8.1	Environmental Regulations and Policies	277
16.8.1.1	Overview of international, national, and regional regulations	277
16.8.2	Role of Regulatory Frameworks in Controlling Pollutant Discharges	278
16.8.3	Success Stories and Challenges in Implementing Ecotoxicology-Based Regulations	278
