Preface.....	xi
Acknowledgments.....	xiii
Authors.....	xv
Series Editor.....	xvii

Chapter 1	Introduction	1
1.1	Common Definitions of Light	1
1.2	Visual and Non-Visual Response to Light.....	1
1.3	Light and Circadian Rhythm.....	3
1.4	LED Lighting and Potential Health Hazard.....	3
1.5	New Idea of Lighting Design – Human-Centric Lighting (HCL).....	4
1.6	What Is This Book About?.....	5

Chapter 2	The Biological Bases of Photoreception in the Process of Image Vision	7
2.1	Optics of the Eye – From the Pupil to the Retina.....	7
2.2	Photoreceptors	9
2.3	Cellular Organization of the Visual Pathways	11
2.3.1	Synaptic Connections – Photoreceptor Cells – Bipolar Cells.....	11
2.3.2	Synaptic Connections – Bipolar Cells – Horizontal Cells (Ribbon Synapse).....	12
2.3.3	Synaptic Connections – Horizontal Cells	13
2.3.4	Synaptic Connections – The Cone Synapse.....	13
2.3.5	Synaptic Connections – The Role of Amacrine Cells.....	14
2.3.6	Synaptic Connections – From Rods and Cones to Ganglion Cells.....	14
2.4	Calculation of Color at the Level of Ganglion Cells	16
2.5	Higher Visual Processing	17
2.6	The Role of Purinergic Signaling in the Retina	19
2.7	Age-Related Changes in the Optics and Retina of the Eye	20
2.7.1	Loss of Lens Elasticity – Loss of Accommodation ...	20
2.7.2	Lens Yellowing – Changes of Perceived Colors	20
2.7.3	Damage of Photoreceptor and Ganglion Cells.....	20
2.7.4	Structural Changes in the Optics	20
2.7.5	Disturbed Rod Pigment Regeneration.....	20
2.8	Summary	20

Chapter 3	The Biological Basis of Non-Image-Forming Vision	23
3.1	Introduction	23
3.2	The Discovery, Function, and Diversity of Intrinsically Photosensitive Retinal Ganglion Cells (ipRGCs); Some Interactions with the Conventional Photoreceptors.....	23
3.3	Brain Regions Innervated by ipRGCs	25
3.4	Phototransduction by ipRGCs, Physiological Role of Melanopsin, Clinical Implications of Melanopsin Pathways	27
3.5	The Neurobiology of Circadian Rhythms – Do We Need Light?.....	29
3.6	The Alerting Effects of Light.....	32
3.7	Summary	33
Chapter 4	Lighting Quality and Well-Being.....	35
4.1	What Do We Mean by Lighting Quality and Well-Being?	35
4.1.1	Well-Being.....	35
4.1.2	Lighting Quality	35
4.1.3	Standardization Concerning Lighting Design.....	37
4.1.3.1	International/European Lighting Standards	37
4.1.3.2	Standard for Building Design.....	38
4.2	Lighting Intensity	39
4.3	Spatial Distribution of Light.....	43
4.3.1	Luminance Distribution	43
4.3.2	Discomfort Glare at Indoor Workplaces	44
4.4	Color Aspects	48
4.4.1	Correlated Color Temperature (CCT) and Illuminance Level.....	49
4.4.2	Color Perception.....	51
4.5	Perception of Flicker and the Stroboscopic Effect.....	52
4.6	Summary	52
Chapter 5	Visual Performance.....	53
5.1	Visual Performance: Definition and Recommendations	53
5.2	Weber's Fraction and Contrast	53
5.2.1	The Weber Fraction.....	53
5.2.2	Luminance Contrast.....	55
5.3	Contrast Sensitivity.....	55
5.3.1	Contrast Sensitivity Function	55
5.3.2	Contrast Sensitivity and Suprathreshold Visibility	57
5.4	Visual Acuity.....	59
5.5	Relative Visual Performance (<i>RVP</i>)	60

5.6	The Lateral Inhibition Phenomenon.....	61
5.7	Flicker and Stroboscopic Effect as a Hazardous Problem of Performance	63
5.7.1	Critical Fusion Frequency	65
5.8	Color Rendering	66
5.8.1	Artificial Light Sources.....	66
5.8.2	Color Space	67
5.8.3	Color Rendering Index R_a	67
5.8.4	Color Fidelity Index R_f and Color Gamut R_g	68
5.9	Light Sources and Their Impact on Well-Being and Visual Performance	70
5.9.1	Classification of Solid-State Light Sources.....	71
5.9.2	LEDs and Their Properties	72
5.9.2.1	LED Advantages.....	72
5.9.2.2	LED Disadvantages	74
5.10	Summary	75
Chapter 6	New Metrics for Circadian Lighting	77
6.1	Introduction	77
6.2	α -Opic Metrics	77
6.3	Circadian Light and Circadian Stimulus.....	81
6.4	Equivalent Melanopic Lux	86
6.5	Circadian Action Factor	88
6.6	Circadian Efficiency	89
6.7	Universal Illuminance	89
6.8	Relative Spectral Effectiveness (<i>RSE</i>).....	91
6.9	Circadian Potency.....	91
6.10	Effective Watts and Melanopic-Photopic Ratios	92
6.11	Summary	94
Chapter 7	Lighting Design Taking into Account the Non-Visual Effects of Light	95
7.1	Living in Biological Darkness.....	95
7.2	What Do We Expect from Healthy Lighting?	96
7.3	Dynamic Lighting	96
7.3.1	Daylight Oriented – Horizontal Illuminance Controlled.....	97
7.3.2	Supporting Occupants’ Activity – Horizontal Illuminance Controlled	98
7.3.3	Diurnal Synchronization – Vertical (at the Eye) Illuminance Controlled	102
7.4	Lighting Design with Circadian Metrics.....	105
7.4.1	Circadian Stimulus (<i>CLA</i> Model) in Lighting Design.....	106

7.4.1.1	Examples of Dynamic Lighting Schedules	107
7.4.1.2	Desktop Lighting for Delivering Circadian Stimulus	109
7.4.2	Equivalent Melanopic Lux in Lighting Design	109
7.4.3	Comparison of <i>CS</i> and <i>EML</i>	110
7.5	Summary	113
Chapter 8	The Biology of Shift Work and the Role of Lighting in the Workplace.....	115
8.1	Shift Work and Health.....	115
8.1.1	Shift Work Tolerance.....	115
8.1.2	Shift Work Disorder	117
8.2	Shift Work Lighting.....	119
8.2.1	Dealing with Conflicting Visual and Non-Visual Needs.....	119
8.2.2	Lighting Protocols Supporting the Occupant's Activity	120
8.2.2.1	Short-Term (Rotating) Night Shift Work.....	120
8.2.2.2	Rotating "Swing Shift" Night Work.....	123
8.2.2.3	Long-Term (Permanent) Night Shift Work.....	125
8.2.2.4	Circadian Stimulus in Designing Lighting for Shift Work	126
8.2.3	Practical Examples of Shift Work Lighting	127
8.2.3.1	Desktop Luminaire.....	127
8.2.3.2	Localized Luminaire	127
8.2.3.3	General Lighting.....	137
8.3	Summary	139
Chapter 9	Human-Centric/Integrative Lighting Design	141
9.1	The Philosophy of Human-Centric Lighting.....	141
9.2	General Guidelines	142
9.3	Visual Effects of Light	143
9.3.1	Standard Lighting Code-Based Design.....	143
9.3.2	Principles Beyond the Standard Lighting Codes	143
9.4	Non-Visual Effects of Light.....	144
9.4.1	Circadian Lighting Guidelines	144
9.4.2	Cognitive and Creative Performance vs Some Lighting Aspects	145
9.5	Importance of Room Surface Reflectance and Color.....	146
9.6	Possible "Traps" in Lighting Assumptions.....	147
9.6.1	CCT vs Spectral Power Distribution (SPD)	147

9.6.2	Cautious Exposure to Blue Light	149
9.6.3	Circadian Lighting and Glare.....	150
9.7	Estimated Benefits of Circadian Lighting for Employers	151
9.8	Summary	152
Chapter 10	Measurements and Assessment of Lighting Parameters and Measures of Non-Visual Effects of Light.....	153
10.1	Basic Classification.....	153
10.2	Periodic Fast-Changing Light Intensity Over Time (Temporal Distribution).....	153
10.2.1	Flicker Assessment.....	153
10.2.2	Stroboscopic Effect Assessment	155
10.3	Spatial Distribution of Luminance in the Field of View (Luminance Map)	157
10.4	Glare Assessment	159
10.4.1	Subjective Assessment of Glare	160
10.4.2	Simulation Assessment of Glare	160
10.4.3	Objective Assessment of Glare at Indoor Workplaces	161
10.4.4	Uncertainty of <i>UGR</i> Determination.....	162
10.4.5	<i>UGR</i> Determination – the Problem of the Angular Size of Glare Sources.....	163
10.5	Spectral Power Distribution of Light (SPD)	164
10.5.1	Spectroradiometric Method.....	164
10.5.2	Radiometric/Dosimetric Method	165
10.6	Measurement of Psychophysiological Response to Light.....	167
10.6.1	Basic Assessment Methods	167
10.6.2	Brain Activity Recognition: EEG and fMRI	168
10.6.3	Light Impact on Alertness.....	169
10.6.4	Signals from Which Electrodes Should Be Considered in the Alertness Assessment	170
10.7	Summary	171
