*About the author* xi

## **PART ONE**

### **Forming Circular Supply Chains from Key Concepts 1**

#### **Introduction 3**

#### **01 Events Leading to Today's Economy 5**

- The Origin Story of the Linear Economy 5
- From Depression to Obsession 6
- The War Machine and the Consumer Dream 7
- The Mad Men Era 7
- The Oil Crisis 8
- Reaganomics and Thatcherism 9
- The Rise of Global Trade 10
- The Digital Revolution 10
- The Great Recession 11
- The Smartphone 11
- The Pandemic 12
- The Circular Economy: A New Hope 12
- Notes 13

#### **02 The Pioneers of Circular Thinking 17**

- Walter Stahel 17
- McDonough and Braungart 18
- Ellen MacArthur 19
- Kate Raworth 20
- Janine Benyus 20
- Gunter Pauli 21
- The Power of Many Minds 22
- Patagonia 22
- Interface 23

Renault 23  
Philips 24  
The Road Ahead 24  
Notes 25

### **03 Where Circular Economy Meets Supply Chain 27**

Business Models 28  
Materials 30  
Operations 32  
Market Dynamics 34  
Strategy 36  
Connections into Predictions 37  
Notes 37

### **04 Building Tomorrow's Circular Supply Chain 39**

The Path to the Future 39  
Defining the Path 41  
People and Culture Capabilities 42  
Process Capabilities 45  
Technology Capabilities 48  
Industry Standards Capabilities 51  
Governance Capabilities 54

## **PART TWO**

### **The Capability to Repair at Scale 57**

Fictional Example: The Repair Revolution 57

### **05 People and Culture Capabilities: Repairing at Scale 61**

Circular Leadership to Repair at Scale 61  
New Circular Supply Chain Roles to Repair at Scale 67  
Continuous Learning Culture to Repair at Scale 72

### **06 Process Capabilities: Orchestrating Circular Flows to Repair at Scale 79**

The Circular Value Stream to Repair at Scale 79  
Smart Recovery Protocols to Repair at Scale 84  
Resource Optimization to Repair at Scale 90

- 07 Technology Capabilities: Digital Enablement to Repair at Scale 96**  
Digital Product Memory to Repair at Scale 96  
Predictive Recovery Intelligence to Repair at Scale 102  
Network Optimization Platform to Repair at Scale 107
- 08 Industry Standards Capabilities: Common Language for Circularity to Repair at Scale 113**  
Multi-Life Performance Metrics to Repair at Scale 113  
Digital Interoperability to Repair at Scale 119  
Ecosystem Collaboration Protocols to Repair at Scale 124
- 09 Governance Capabilities: Ensuring Circular Success to Repair at Scale 130**  
Value-Sharing Mechanisms to Repair at Scale 131  
Quality Assurance Through Multiple Lives to Repair at Scale 136  
Continuous Evolution to Repair at Scale 142

### **PART THREE**

#### **The Capability to Manufacture In-Market 149**

Fictional Example: Global to Local 149

- 10 People and Culture Capabilities: Manufacturing In-Market 153**  
Circular Leadership to Manufacture In-Market 153  
New Circular Supply Chain Roles to Manufacture In-Market 159  
Continuous Learning Culture to Manufacture In-Market 164
- 11 Process Capabilities: Orchestrating Circular Flows to Manufacture In-Market 170**  
The Circular Value Stream to Manufacture In-Market 170  
Smart Recovery Protocols to Manufacture In-Market 176  
Resource Optimization to Manufacture In-Market 181

**12 Technology Capabilities: Digital Enablement to Manufacture In-Market 187**

Digital Product Memory to Manufacture In-Market 187

Predictive Recovery Intelligence to Manufacture  
In-Market 192

Network Orchestration Platform to Manufacture  
In-Market 197

**13 Standards Capabilities: Common Language for Circularity to Manufacture In-Market 203**

Multi-Life Performance Metrics to Manufacture  
In-Market 203

Digital Interoperability to Manufacture In-Market 208

Ecosystem Collaboration Protocols to Manufacture  
In-Market 214

**14 Governance Capabilities: Ensuring Circular Success to Manufacture In-Market 220**

Value-Sharing Mechanisms to Manufacture In-Market 220

Quality Assurance Through Multiple Lives to Manufacture  
In-Market 225

Continuous Evolution to Manufacture In-Market 231

**PART FOUR**

**The Capability to Circulate Locally 237**

Fictional Example: The Urban Mining Revolution 237

**15 People and Culture Capabilities: Circulating Locally 239**

Circular Leadership to Circulate Locally 239

New Circular Supply Chain Roles to Circulate Locally 244

Continuous Learning Culture to Circulate Locally 249

**16 Process Capabilities: Orchestrating Circular Flows to Circulate Locally 255**

The Circular Value Stream to Circulate Locally 255

Smart Recovery Protocols to Circulate Locally 260

Resource Optimization to Circulate Locally 265

- 17 Technology Capabilities: Digital Enablement to Circulate Locally 271**
  - Digital Product Memory to Circulate Locally 271
  - Predictive Recovery Intelligence to Circulate Locally 276
  - Network Orchestration Platform to Circulate Locally 281
- 18 Standards Capabilities: Common Language for Circularity to Circulate Locally 287**
  - Multi-Life Performance Metrics to Circulate Locally 287
  - Digital Interoperability to Circulate Locally 292
  - Ecosystem Collaboration Protocols to Circulate Locally 297
- 19 Governance Capabilities: Ensuring Circular Success to Circulate Locally 303**
  - Value-Sharing Mechanisms to Circulate Locally 303
  - Quality Assurance Through Multiple Lives to Circulate Locally 309
  - Continuous Evolution to Circulate Locally 314

## **PART FIVE**

### **The Capability to Collaborate Transparently 321**

Fictional Example: The Transparency Revolution 321

- 20 People and Culture Capabilities: Collaborating Transparently 325**
  - Circular Leadership to Collaborate Transparently 325
  - New Circular Supply Chain Roles to Collaborate Transparently 331
  - Continuous Learning Culture to Collaborate Transparently 336
- 21 Process Capabilities: Orchestrating Circular Flows to Collaborate Transparently 341**
  - The Circular Value Stream to Collaborate Transparently 341
  - Smart Recovery Protocols to Collaborate Transparently 346
  - Resource Optimization to Collaborate Transparently 351
  - Notes 357

## **22 Technology Capabilities: Digital Enablement to Collaborate Transparently 358**

Digital Product Memory to Collaborate Transparently 358

Predictive Recovery Intelligence to Collaborate Transparently 363

Network Orchestration Platform to Collaborate Transparently 368

## **23 Standards Capabilities: Common Language for Circularity to Collaborate Transparently 374**

Multi-Life Performance Metrics to Collaborate Transparently 374

Digital Interoperability to Collaborate Transparently 379

Ecosystem Collaboration Protocols to Collaborate Transparently 383

## **24 Governance Capabilities: Ensuring Circular Success to Collaborate Transparently 389**

Value-Sharing Mechanisms to Collaborate Transparently 389

Quality Assurance Through Multiple Lives to Collaborate Transparently 394

Continuous Evolution to Collaborate Transparently 399

## **PART SIX**

## **Conclusion 405**

## **25 Next Steps 407**

Getting Started: Where Are You Today? 407

Building Your Core Team 411

Cost-Effective Starting Points 416

Common Pitfalls and How to Avoid Them 418

Creating Your Roadmap 420

Next Steps Checklist 422

Your First Year 423

The Journey Begins 423

Notes 424
