List of abbreviations	x		
Foreword	xi		
ICD-O topographical coding	1		
ICD-O morphological coding	4		
Pituitary tumours	5		
Thyroid tumours	7		
Parathyroid tumours	9		
Adrenal gland tumours	10		
Adrenal medulla and extra-adrenal paraganglia tumours	11		
Pancreatic neuroendocrine neoplasms	12		
Neuroendocrine neoplasms in non-endocrine organs	13		
Mesenchymal and stromal tumours	14		
Haematolymphoid tumours	16		
Germ cell tumours	17		
TNM staging of endocrine and neuroendocrine tumours	18		
Carcinomas of the thyroid gland	18		
Carcinomas of the adrenal cortex	20		
Tumours of the pancreas	21		
Well-differentiated neuroendocrine tumours of the gastrointestinal tract	22		
1 Introduction to endocrine and neuroendocrine tumours	28		
2 Pituitary tumours	33		
Introduction	34		
Anterior pituitary neuroendocrine tumours (PitNETs)			
PitNETs of PIT1 lineage			
Somatotroph PitNET/adenoma	40		
Mammotroph PitNET/adenoma	45		
Lactotroph PitNET/adenoma	48		
Thyrotroph PitNET/adenoma	53		
Mature plurihormonal PIT1-lineage PitNET/adenoma	55		
Immature PIT1-lineage PitNET/adenoma	57		
Acidophil stem cell PitNET/adenoma	59		
Mixed somatotroph–lactotroph PitNET/adenoma	62		
PitNETs of TPIT lineage			
Corticotroph PitNET/adenoma	65		
PitNETs of SF1 lineage			
Gonadotroph PitNET/adenoma	70		
PitNETs without distinct lineage differentiation			
Null cell PitNET/adenoma	73		
Plurihormonal PitNET/adenoma	75		
Multiple PitNETs			
Multiple synchronous PitNETs/adenomas of distinct lineages	77		
Metastatic PitNETs			
Metastatic PitNET	79		
Other anterior pituitary tumours			
Adamantinomatous craniopharyngioma	82		
Papillary craniopharyngioma	86		
Pituitary blastoma	89		
Posterior pituitary and hypothalamic neoplasms			
Pituicyte-derived tumours			
Pituicytomas	92		
Neuronal tumours			
Gangliocytoma and mixed gangliocytoma–PitNET/adenoma	97		
		Sellar neurocytoma	100
		Other sellar tumours	
		Meningiomas	103
		Chordoma	105
3 Thyroid tumours			
Introduction	108		
Developmental abnormalities			
Thyroglossal duct cyst	113		
Other congenital thyroid abnormalities	116		
Follicular cell-derived neoplasms			
Benign tumours			
Thyroid follicular nodular disease	119		
Follicular thyroid adenoma	122		
Follicular thyroid adenoma with papillary architecture	126		
Oncocytic adenoma of the thyroid gland	129		
Low-risk neoplasms			
Non-invasive follicular thyroid neoplasm with papillary-like nuclear features	132		
Thyroid tumours of uncertain malignant potential	135		
Hyalinizing trabecular tumour	138		
Malignant neoplasms			
Follicular thyroid carcinoma	142		
Invasive encapsulated follicular variant of papillary thyroid carcinoma	147		
Papillary thyroid carcinoma	150		
Oncocytic carcinoma of the thyroid gland	161		
High-grade follicular cell-derived non-anaplastic thyroid carcinoma	165		
Anaplastic thyroid carcinoma	170		
Thyroid C cell-derived carcinoma			
Medullary thyroid carcinoma	174		
Mixed medullary and follicular cell-derived carcinomas			
Mixed medullary and follicular cell-derived thyroid carcinoma	179		
Salivary gland-type carcinomas of the thyroid gland			
Mucoepidermoid carcinoma	182		
Secretory carcinoma	184		
Thyroid tumours of uncertain histogenesis			
Sclerosing mucoepidermoid carcinoma with eosinophilia	186		
Cribriform morular thyroid carcinoma	189		
Thymic tumours within the thyroid			
Thymoma	192		
Spindle epithelial tumour with thymus-like elements	194		
Intrathyroidal thymic carcinoma	196		
Embryonal thyroid neoplasms			
Thyroblastoma	199		
4 Parathyroid tumours	201		
Introduction	202		
Parathyroid hyperplasia	204		
Parathyroid adenoma	207		
Parathyroid lipoadenoma	213		
Atypical parathyroid tumour	215		
Parathyroid carcinoma	218		
5 Adrenal gland tumours	223		
Introduction	224		
Lesions in the adrenal cortex			
Adrenal rests	226		

Adrenal cysts	228	9 Mesenchymal and stromal tumours	357
Adrenal myelolipoma	230	Introduction	358
Adrenal cortical tumours		Lipocytic tumours	
Congenital adrenal hyperplasia	232	Lipoma	359
Adrenocortical nodular disease	236	Fibrous tumours	
Adrenal cortical adenoma	240	Solitary fibrous tumour	360
Adrenal cortical carcinoma	246	Vascular tumours	
Sex cord stromal and other tumours		Benign vascular tumours	362
Adrenal sex cord stromal tumour	254	PEComa	364
Adenomatoid tumour	256	Glomangioma and glomus tumour	366
Adrenal melanoma	258	Angiosarcoma	368
6 Adrenal medulla and extra-adrenal paraganglia tumours	261	Smooth muscle tumours	
Introduction	262	Leiomyoma	371
Neuroblastic tumours		Leiomyosarcoma	373
Neuroblastoma	265	Skeletal muscle tumours	
Ganglioneuroblastoma, intermixed	271	Rhabdomyosarcomas	376
Ganglioneuroblastoma, nodular	273	Peripheral nerve sheath tumours	
Ganglioneuroma	275	Schwannoma	379
Paraganglioma and pheochromocytoma		Neurofibroma	381
Pheochromocytoma	277	Granular cell tumour	383
Sympathetic paraganglioma	285	Malignant peripheral nerve sheath tumour	385
Parasympathetic paraganglioma	288		
Composite paraganglion tumours		10 Haematolymphoid tumours	387
Composite pheochromocytomas and paragangliomas	292	Introduction	388
7 Pancreatic neuroendocrine neoplasms	295	IgG4-related disease	389
Introduction	296	Extranodal marginal zone lymphoma of mucosa-associated lymphoid tissue	392
Neuroendocrine neoplasms		Diffuse large B-cell lymphoma NOS	395
Neuroendocrine tumours		Langerhans cell histiocytosis	397
Non-functioning (non-syndromic) pancreatic neuroendocrine tumours	300	Rosai–Dorfman disease	400
Insulinoma	305	Erdheim–Chester disease	402
Glucagonoma	309	Follicular dendritic cell sarcoma	404
Somatostatinoma	312		
Gastrinoma	315	11 Germ cell tumours	407
VIPoma	317	Introduction	408
Serotonin-producing tumours with and without carcinoid syndrome	320	Germ cell tumours	
Other pancreatic neuroendocrine tumours with ectopic hormone production	322	Germ cell tumours in endocrine organs	409
Neuroendocrine carcinomas		Teratomas with endocrine differentiation	412
Pancreatic neuroendocrine carcinoma	325	12 Metastasis	415
Mixed neuroendocrine–non-neuroendocrine neoplasms		Introduction	416
Mixed ductal adenocarcinoma–neuroendocrine neoplasms	328	Metastasis to the pituitary gland	417
Mixed acinar–neuroendocrine carcinoma	330	Metastasis to the thyroid gland	419
8 Neuroendocrine neoplasms in non-endocrine organs	333	Metastasis to the adrenal gland	422
Introduction	334	13 Genetic tumour syndromes associated with endocrine lesions and tumours	425
Neuroendocrine neoplasms		Introduction	426
Neuroendocrine tumours		Multiple endocrine neoplasia type 1	429
Neuroendocrine tumours	337	Multiple endocrine neoplasia type 2	435
Neuroendocrine carcinomas		Multiple endocrine neoplasia type 4	440
Small cell neuroendocrine carcinoma	339	Multiple endocrine neoplasia type 5 (MAX-related tumours)	444
Large cell neuroendocrine carcinoma	342	Hyperparathyroidism–jaw tumour syndrome	448
Merkel cell carcinoma	346	Von Hippel–Lindau syndrome	452
Mixed neuroendocrine neoplasms		SDH-deficient tumour syndromes	457
Mixed neuroendocrine–non-neuroendocrine neoplasms	348	Neurofibromatosis type 1	463
Paraganglioma-like neuroendocrine neoplasms		Carney complex	466
Composite gangliocytoma/neuroma and neuroendocrine tumour	351	McCune–Albright syndrome	471
Cauda equina neuroendocrine tumour (previously paraganglioma)	354	DICER1 syndrome	474
		Glucagon cell hyperplasia and neoplasia	478
		MAFA-related familial insulinomatosis	480
		Syndromic familial follicular cell–derived thyroid tumours	482
		Non-syndromic familial follicular cell–derived thyroid tumours	488
