

CONTENTS

PREFACE	7
I. INTRODUCTION	9
II. THE ONTOGENESIS AND PHYLOGENESIS OF THE LUNG ALVEOLUS OF VERTEBRATES	11
1. Submicroscopic Structure of the Lung Alveolus in Adult Mammals	17
2. Origin and Development of the Alveolar Lining in Mammals	22
3. A Comparative Ultramicroscopic Study of the Lining of the Lung Alveolus and Gill Filaments in Vertebrates	30
a) Fish (<i>Carassius carassius</i>)	33
b) The green frog (<i>Rana esculenta</i> L.)	34
c) Tortoises (<i>Testudo graeca</i> L., <i>Pseudemys scripta elegans</i>)	35
d) Chickens	36
e) The Hedgehog, Rat, Rabbit, Cat, Monkey and Man	37
III. THE PRESENCE OF A PHOSPHOLIPID AND MUROID FILM ON THE SURFACE OF THE ALVEOLAR LINING AND ITS RELATION TO GRANU- LAR PNEUMONOCYTES.	39
1. Attempts to Demonstrate a Phospholipid and Muroid Film on the Surface of the Alveolar Lining	46
a) The Phospholipid Layer of the Pulmonary Alveolus	46
b) The Muroid Layer of the Pulmonary Alveolus	48
2. The Source of Phospholipids and the "Secretion" of the Granular Pneumonocytes	50
3. The Effect of Unilateral Vagotomy on the Structure of Pulmonary Alveolus	52
IV. THE STORAGE AND PHAGOCYTTIC PROPERTIES OF THE ALVEOLAR EPITHELIUM	54
1. The Incorporation of Indian Ink into the Lung Alveoli	58
2. The Incorporation of Myofer into the Pulmonary Alveolus	60
V. THE HISTOCHEMISTRY OF THE LUNG ALVEOLUS	62
1. Alkaline Phosphatase	64
2. Acid Phosphatase	64
3. Nonspecific Esterase	64
4. Dehydrogenases	65
VI. DISCUSSION AND CONCLUSIONS	66
VII. SURVEY OF TREATMENT OF MATERIAL AND METHODS USED	70
VIII. SUMMARY	74
SOUHRN	77
PE3IOME	78
