12

### Elevating the next generation

The NHA believes strategic investment in the future of energy is urgently required

14

### No quick fix

Report highlights how a shortage of green skills could impact the development of the UK's hydropower workforce

19

### Finding the right person

Insight into the work of Plan Recruit in the hydro industry

20

### Building tomorrow's dam experts

ICOLD's Young Engineers Forum continues to go from strength to strength

---

## Seismic analysis

22

### Key prerequisite for sustainable dams

Why the earthquake safety of dams is a key prerequisite for sustainable dams

---

## Hydraulic machinery

26

### New turbine design silences penstock noise

A redesigned turbine distributor at the Melezet hydropower plant has resolved long-standing RSI-induced noise issues in the residential area of Bardonecchia, reducing vibrations and ensuring compliance with environmental noise regulations.

30

### Powering progress together

Hydro projects across continents show how technology partnerships are enabling efficient, and future-proofed energy generation

---

## Refurbishment & modernisation

32

### Modernising global water structures

Repair, refurbishment and repowering works have been taking place at projects globally

35

### Stainless steel secures sustainability

A switch to duplex stainless steel has played a crucial role for the Lossen hydropower plant in Sweden

---

## Fish passage solutions

36

### No one-size approach

How the challenge to fish migration presented by hydro schemes must be assessed and appropriately mitigated afresh each time

38

### Innovative solutions

New research and field trials are driving innovation in fish passage technology
