

Contents

	List of Contributors	v
	Preface	xi
Part I	Introduction to Epigenetics and Epigenetic Methods	1
1	Early Life Environment, DNA Methylation and Behaviour Moshe Szyf	3
2	Concepts in Histone Acetyltransferase Biology Anne K. Voss and Tim Thomas	25
3	Murine Models of Transgenerational Epigenetic Inheritance Jennifer E. Cropley and Catherine M. Suter	51
4	The Molecular Mechanisms of Mammalian X Inactivation Marnie E. Blewitt and Linden J. Gearing	67
5	Epigenetic Memory in Plants: Polycomb-group Regulation of Responses to Low Temperature Sandra N. Oliver and E. Jean Finnegan	83
6	Centromeres and Telomeres Emma L. Northrop and Lee H. Wong	99
7	DNA Sequence Contribution to Nucleosome Distribution Justin A. Fincher and Jonathan H. Dennis	133
8	Macrosatellite Epigenetics Brian P. Chadwick	143
9	Histones: Dosage and Degradation Rakesh Kumar Singh, Johanna Paik and Akash Gunjan	161
10	The Epigenetic Basis of Cell Fate Specification and Reprogramming Hongchang Cui	183
11	DNA Methylation Changes in Cancer Samson Mani and Zdenko Herceg	195

12	Variant Histones H2A and Cancer Development	211
	Danny Rangasamy	
13	5-Methylcytosine as a Modification in RNA	227
	Jeffrey E. Squires and Thomas Preiss	
14	Paramutation in Plants	237
	Mario A. Arteaga-Vazquez and Ana E. Dorantes-Acosta	
15	Lessons from DNMT3L-dependent Methylation During Gametogenesis	255
	Sarah A. Kinkel and Hamish S. Scott	
16	Non-coding RNA: an Overview	271
	Alka Saxena and Piero Carninci	
Part II	Epigenetic Techniques	291
17	Bisulfite-enabled Technologies	293
	Miina Ollikainen	
18	Methylation-sensitive High Resolution Melting for the Rapid Analysis of DNA Methylation	325
	Thomas Mikeska and Alexander Dobrovic	
19	Microarray Mapping of Nucleosome Position	337
	Brian Spetman, Sarah Lueking, Brooke Roberts Druliner and Jonathan H. Dennis	
20	Enzymatic Approaches for Genome DNA Methylation Profiling	349
	Benjamin Chanrion, Yurong Xin and Fatemeh Haghighi	
21	ChIP Sequencing	357
	Sebastian Lunke and Assam El-Osta	
22	Genome-wide DNA Methylation Analysis	371
	Marcel W. Coolen and Susan J. Clark	
Part III	Epigenetics Reference Manual	393
23	Bioinformatics Analysis of Epigenomic Methylation Patterns in the Era of Massively Parallel Sequencing	395
	Mark D. Robinson, Bryan Beresford-Smith, Anthony Kaspi and Izhak Haviv	
24	Genetic Resources for the Study of Epigenetic Gene Regulation in Maize	409
	Andre Irsigler and Karen M. McGinnis	
25	Online Resources and Tools for Epigeneticists	421
	Nicholas C. Wong	
26	Educational Resources for Epigenetics	435
	Yuk Jing Loke and Jeffrey M. Craig	
	Index	447
	Colour plate	A1
