

TABLE OF CONTENTS

Preface.....	ix
SECTION I: THE OVERARCHING ARGUMENT	1
CHAPTER 1. Doing the Best Things First.....	3
What comes next?	5
CHAPTER 2. Promises, promises	7
The Millennium Development Goals actually changed the world..	8
The Sustainable Development Goals: Far Too Many Promises..	13
The SDGs haven't made a difference.....	15
We will be half a century late	17
CHAPTER 3. Do the smartest solutions first	23
Using benefit-cost analysis.....	23
All the policies that didn't make it into the final 12.....	26
The 12 best policies for the world.....	29
We can afford it.....	35
\$35 billion to make the world amazingly better off.....	36
SECTION II: THE 12 MOST EFFICIENT POLICIES.....	39
CHAPTER 4. Tuberculosis	41
How a tsunami of death receded from the rich world	41

Tuberculosis is still deadly for the poorer half of the world.....	45
Global progress in the last three decades and our SDG promises	48
Why haven't we tackled tuberculosis yet?	50
A cost-efficient way to save 27 million lives.....	53
A chance to end a flow of needless death.....	56
CHAPTER 5. Education.....	59
We've invested a lot in schools — but not in learning.....	59
SDG education promises won't be fulfilled until 2056.....	63
Helping students learn more: Teach at the right level.....	65
Helping teachers teach better: Structured pedagogy.....	69
More learning at low costs	70
We can do better for less.....	72
CHAPTER 6. Maternal and newborn health.....	75
Global inequality for mothers and infants.....	76
The MDG targets made a difference	80
SDG promises won't be met	81
A simple and phenomenally efficient solution	83
Saving the SDGs and more	89
CHAPTER 7. Agricultural R&D: More and cheaper food.....	91
Key is economic growth and agricultural innovation.....	91
For all the SDGs' ambition, we're not solving hunger	99
Many popular policies don't add up	103
Solving hunger without having to bet the farm	106
A chance to almost eradicate hunger.....	111

CHAPTER 8. Malaria	113
An illness that shaped history.....	113
How humanity cleared out the ‘bad air’ — for the most part ...	115
MDGs and SDGs on malaria: Impetus lost?	120
How to save lives from an endemic killer at little cost.....	124
An incredible investment in saving lives.....	129
CHAPTER 9. e-procurement: reducing corruption	131
Corruption’s massive cost	131
The corruption SDG: Zero progress, dismal prognosis	134
A simple, substantial solution with many benefits.....	135
What will it cost?	140
Fantastic benefits for a modest price	142
So, why isn’t e-procurement everywhere already?.....	143
CHAPTER 10. Nutrition	147
Malnutrition: Long-term harm to the most vulnerable.....	147
Failing by more than 100 million children	150
Supplements during pregnancy: Nutrition in the womb.....	151
Complementary Feeding Promotion: Ensuring infants get the food they need	156
SQ-LNS: Transforming a child’s life for \$90.....	158
Feeding children better	161
CHAPTER 11. Chronic Diseases	163
Out of the age of pestilence.....	163
Fighting the last century’s battles.....	167
The chronic disease SDG — still centuries away	170

Best healthcare investments for NCDs.....	171
A tobacco tax can smoke lung cancer.....	174
Cutting problem drinking.....	178
Salt reduction.....	179
Reaching the SDG target completely would be very expensive....	180
CHAPTER 12. Childhood immunization.....	183
Smallpox: The power of vaccines.....	183
Cheap jabs' big payoff for rich and poor alike.....	185
Despite global promises, we are not doing enough.....	187
Vaccines can save many more at low cost.....	190
More childhood immunization could save millions.....	192
Conclusion.....	197
CHAPTER 13. More trade.....	199
Real costs to trade.....	199
Trade makes us richer.....	201
A particular help for the poor.....	204
Trade SDGs held at a standstill.....	205
Calculating costs and benefits.....	207
Conclusion.....	211
CHAPTER 14. Highly skilled migration.....	213
Inequality: Better than you may think, but still far off the SDG...	213
Doubling global GDP and vanquishing most inequality — A world with unlimited migration.....	216
How high are the costs of migration?.....	222
A more acceptable migration increase.....	225
The benefits of migrating doctors.....	226
The costs of migrating doctors.....	229

Benefit-costs ratios for skilled migration.....	230
A regional option: Open Africa to skilled migration	231
A politically viable chance to lower global inequality	234
CHAPTER 15. Land tenure security	235
Securing land ownership to drive development	236
More secure property rights could unlock a continent of potential	237
On land tenure SDGs, we're entirely off-track	240
How to improve land security — Starting in sub-Saharan Africa.....	242
From farms to skyscrapers: The costs of surveying and registering land.....	243
Factoring in the costs of digitization and dispute resolution ...	248
Annual operations and maintenance costs	249
Making rural fields more productive — The benefits of improving land tenure security	251
Making urban house ownership more secure	254
It is better knowing what you have	255
APPENDIX. Benefit-cost analysis, discounting, and value-of-life.....	259
Wages over the 21 st century	260
Discounting the future	262
The value of a statistical life.....	264
The usefulness of consistent benefit-cost analysis.....	269
Also by Bjorn Lomborg.....	271
References.....	273
Index	275
