5.4.3 Information seeking, communicating, and belonging to online groups 111
5.4.4 Digital platforms – networking, bridging, and bonding with individuals 112
5.4.5 Risks and controversies 114
5.5 Implications and conclusions 114

Bibliography 116

6 Digital technologies in EU migration governance 124
Sinem Yilmaz and Tuba Bircan

6.1 Introduction 124
6.2 Migration and technologies: Context and theoretical framework 126
6.2.1 New technologies 127
6.2.2 EU borders 127
6.3 Evolution of digital technologies in EU migration governance 128
6.3.1 Digital tools 129
6.3.2 The pact on migration and asylum and the new regulations 130
6.4 Migration stages and technologies 131
6.5 The case of Polish-Ukrainian and Polish-Belarusian borders 132
6.5.1 Polish-Belarusian border 133
6.5.2 Polish-Ukrainian border 133
6.5.3 Further differences 134
6.5.4 EU migration pact and the advanced border technologies 135
6.6 Conclusion 136

Bibliography 137

7 Challenges of technology's use and migration 141

Ewa Ślęzak-Belowska, Marie Jelínková, Karin Amit, and Agnieszka Bielewska

7.1 Introduction 141
7.2 The monograph findings 141
7.3 The general outlook on concerns and challenges 145
7.4 Major challenges at stake 146
7.5 The value added 153
7.6 Scenarios for the future and recommendations 154
