

## Content

### CHAPTER 1

7

General introduction

### CHAPTER 2

25

Mitochondria as indispensable yet replaceable components of germ plasm: insights into PGCs specification in sturgeons

### CHAPTER 3

39

Cryopreservation of sturgeon egg mitochondria and their replacement in germline: A novel strategy for maternal genetic preservation in sturgeons

### CHAPTER 4

51

Visible blue light induces mitochondrial dysfunction in trout embryos during early development

### CHAPTER 5

71

General discussion
