

Contents

Author's Bio	4
Introduction	5
1 Aim of the Habilitation Thesis	7
1.1 Research Objectives and Methodology	7
2 Energy Grid Requirements Toward eMTC	9
2.1 Energy Grid Specifics and Requirements for Smart Meters in Czech Republic .	9
2.1.1 Mobile Operator Capacity Planing for NB-IoT Driven Smart Meters . .	9
2.2 New Data Traffic Type for Permanently Connected Smart Meters	13
3 Discussion of Main Findings	17
3.1 Impact of the Frequency Spectrum Utilization and Operators' Involvement for the CIoT	17
3.2 Accuracy Assessment and Cross-Validation of LPWAN Propagation Models in Urban Scenarios	18
3.3 Definition of the Key Communication Parameters for the Massive Deployment of Smart Metering	19
3.4 Evaluated Recommendations for the Optimal Load Balancing in mMTC	21
4 Conclusion	23
4.1 Key Contributions of Habilitation Thesis	23
4.2 Research and Educational Outcomes	30
Bibliography	33
